FORTRA®

Fortra's Cybersecurity Platform
A centralized security solution that breaks the attack chain

Fighting Complexity with Unified Defense

As attackers leverage advanced technologies like AI to constantly improve, organizations struggle to manage the host of tools required to stop them. In every industry, companies are turning to simplified, unified solutions to help them meet attackers at scale while diminishing operational burden.

Fortra offers a unified, comprehensive cybersecurity platform that delivers a full range of integrated solutions designed to break the attack chain at any stage.

This cloud-native, cyber defense platform makes enterprise-grade security simple, allowing customers to manage their Fortra solutions from a single login.

How the Fortra Platform Works

Fortra's platform is a unified environment for your Fortra solutions.

Each Fortra solution has been designed with the platform in mind, so you get consistent interactions, interfaces, and workflows with each tool.

- **Home App and Dashboard:** Find "at a glance" insights with the home app and dashboard. Get quick access to incident handling, automation, reporting, and logging functionality.
- **App Switcher:** Use the app switcher to easily toggle back and forth between tools.
- **Event Fusion Center:** Leverage Event Fusion Center to enhance visibility of security events and get a real-time snapshot of your security posture.
- **Endpoint Manager:** Probe Endpoint Manager for always-on monitoring of agents and endpoint health. Isolate endpoints, apply new versions, and maximize error detection with enhanced log monitoring.

PRODUCT SUMMARY

KEY FEATURES

- Cloud-native
- Single login
- Common UI
- Easy administration
- Home dashboard
- App switcher sidebar
- Centralized notifications
- Event correlation
- Endpoint management

KEY CAPABILITIES

- Vulnerability Management
- Cloud Email Protection
- Data Loss Prevention
- Data Classification
- Human Risk Management
- Suspicious Email Analysis
- Brand Protection
- DMARC Protection
- Cloud Access Security Broker
- Data Security Posture Management
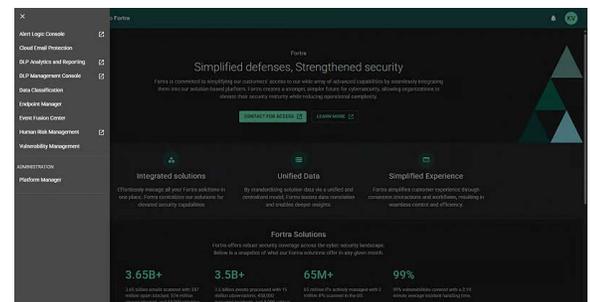

The Value Add of Fortra's Platform

Fortra removes the complexity in protecting against cyberattacks and enables defenders to break the attack chain, no matter the link of focus.

Simplify Your Reality

- Simplify sprawl by orchestrating your Fortra solutions all in one place.
- Simplify security with tools combined for interoperability and complete coverage of the attack chain.
- Simplify spending with scalable pricing models that meet you where you are now and build as you grow.

Secure Your Data

- Protect your data and IP wherever it lives.
- See, understand, and block threats to your sensitive information.
- Enrich your data with quality context.
- Apply flexible classification across Windows, Microsoft Office, Desktop, Outlook Web App, and more.

Protect Your Brand

- Secure your brand against external threats like executive spoofing, social engineering, account takeover, and sensitive data leakage.
- Get custom collection, curation, and mitigation for distinct dangers; from look-alike domains to fake social accounts.

Key Capabilities in Fortra's Platform

We've strategically combined the capabilities in Fortra's platform to offer the best end-to-end defense against full-scale modern cyber threats. Experience the optimization that comes from integrating essential Fortra solutions in one place. See what we've included, how it works, and why it matters.

Vulnerability Management

Easy-to-use SaaS VM with proprietary scanning technology. Get comprehensive network assessments and prioritized results with aided tracking and reporting.

Cloud Email Protection

Protect against business email compromise (BEC) and phishing threats with advanced, interoperable solutions that secure at a fraction of the cost.
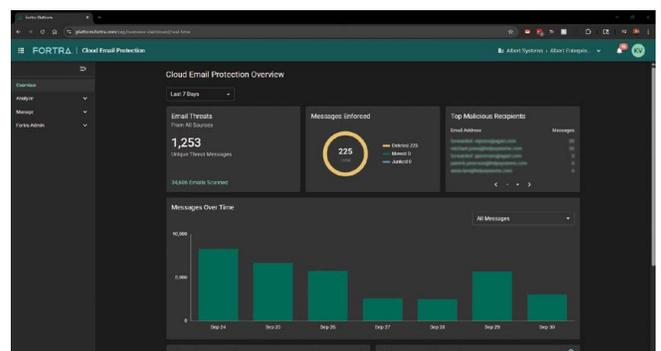

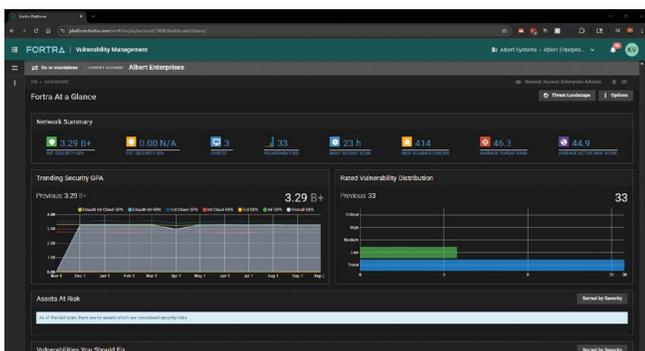

Data Loss Prevention

Get immediate visibility into all critical assets. Prevent data from leaving your organization's controls via both endpoint (eDLP) and network (nDLP).

Data Classification

Enforce compliant security policies across all data types with flexible data classification.

Human Risk Management

Turn your employees from liabilities into assets by training them to spot the signs of today's social engineering attacks.

Suspicious Email Analysis

Triage, analyze, and respond rapidly to user-reported emails.

Brand Protection

Protect against external brand threats, account takeover, social media attacks, data leakage, and fraud.

DMARC Protection

Prevent impersonation and abuse of your email domains with simplified DMARC management.

Cloud Access Security Broker

Put a security barrier between employees and cloud apps to prevent them from downloading malicious files, uploading sensitive data to the wrong places, and accessing risky locations.

Data Security Posture Management

Discover where your sensitive data lives, apply advanced classification that goes beyond labels, and integrate with DLP to protect it wherever it goes—from the endpoint to the cloud.

Next Steps

Ready to simplify cybersecurity with Fortra's platform? Fortra meets you where you are. Tiered pricing activates essential, advanced, and elite defensive capabilities. To get started, request a live demo of the platform or contact us today with questions.
