

HIPAA, NYDFS Part 500, PCI Compliance

HIPAA

Any healthcare, pharma, or medical company that deals with patient data

For the healthcare industry, patient confidentiality is paramount. The average cost of a breach in the US related to patient data is over \$10M dollars, with fines attributed to each instance data breached – not just a singular file, etc.

How Vera Helps

- Vera logs every action taken by any user on a Vera-protected file.
- Vera logs every administrative or system action within the VERA system.
- Vera's detailed audit logs provide defensible proof against data breaches.
- Ability to provide proof of breach reduces the overall requirement by the customer to report a breach occurred.
- Audit log reduces overall financial and brand implications associated with a breach.

NYDFS Part 500

Cybersecurity Regulation for Financial Services in NY State

Encrypt all “nonpublic information held or transmitted” in the firm. Restrict access privileges not only to systems but to the data itself. Implement an audit trail system to reconstruct transaction and log access privileges. Provide for the retention and “timely destruction” of nonpublic information.

How Vera Helps

- Vera leverages military-grade encryption for protecting customers' sensitive file data.
- Vera's dynamic access control ensures only the right people/parties have access to the data.
- Vera's detailed audit logs provide defensible proof against data breaches.
- Ability to provide proof of breach reduces the overall requirement by the customer to report a breach.
- Audit log reduces overall financial and brand implications associated with a breach.

PCI Compliance

Any company that is collecting and storing customer credit card data

For the healthcare industry, patient confidentiality is paramount. The average cost of a breach in the US related to patient data is over \$10M dollars, with fines attributed to each instance data breached – not just a singular file, etc.

How Vera Helps

- Vera logs every action taken by any user on a Vera-protected file.
- Vera logs every administrative or system action within the Vera system.
- Vera's detailed audit logs provide defensible proof against data breaches.
- Ability to provide proof of breach reduces the overall requirement by the customer to report a breach occurred.
- Audit log reduces overall financial and brand implications associated with a breach.
