FORTRA®

Simple, Scalable Pricing for Managed Security Services

## Cost-Effective Options Based on Your Specific Needs

Cost-Effective Options Based on Your Specific Needs

When it comes to cybersecurity, every organization has unique needs. Fortra's Alert Logic managed security solutions are customized to each asset in your estate, aligning coverage with business criticality and cost.

Our pricing model is designed to achieve your desired security outcomes in a cost-effective and scalable manner. With no surprises, unexpected charges, hidden fees, or cost uncertainty, you can predictably budget for your security.

How Our Pricing Works

Our licensing is based on the service we're providing to you each month, not an arbitrary measurement, like the number of employees or company revenue. All our services include our technology, access to new features and capabilities released, self-serve reports, and benchmark reporting.

XDR and MDR Pricing

he cost of our detection and response solutions (XDR and MDR) include the below:

- Your base cost (only applicable for XDR) is a fixed monthly fee for our managed services.
- Your host/node cost is determined by the number of hosts or nodes you want to protect.
  - XDR is licensed by hosts. Whether you want to use your licenses to protect servers, endpoints, network devices, or logs, our flexible licensing model allows you to protect what you choose. Pricing starts at 50 protected hosts.
  - MDR is licensed by nodes. Pricing starts at 25 protected nodes.
- Your setup fee is a one-time cost. This is only relevant for some of our subscription tiers.

WAF Pricing

The cost of Fortra Managed WAF includes your WAF licenses plus your web security profile licenses.

- Your WAF license cost is based on the number of WAF deployments you have, including environments, cloud regions, and data centers.
- Your web security profile license cost is based on the number of web endpoints and unique web applications you are protecting.

XDR and MDR Subscription Tiers

Each subscription provides different levels of vulnerability and threat management services and capabilities for your on-premises, cloud, or hybrid environments.

SERVICE ELEMENTS	MDR ESSENTIALS	MDR PROFESSIONAL	MDR ENTERPRISE †	XDR
Implementation	●	●	●	●
24/7 Platform	●	●	●	●

Incident Correlation with Endpoint and Network Traffic				●

† Alert Logic MDR Enterprise requires Alert Logic MDR Professional licenses for protected assets included in the Alert Logic MDR Enterprise service

* Log retention is always online, no restriction on search window exists and more than 12 months retention is available upon request

> We couldn't put together a security team in house that does what Alert Logic does for anywhere near the cost of their MDR solution."
>
> **Jarrod Rues, President Vertére**

Alert Logic MDR Essentials

24/7 hybrid visibility and vulnerability scanning, audit-ready reporting, and endpoint detection and response.

Alert Logic MDR Professional

24/7 threat detection, log management, and vulnerability scanning plus a customer success team.

Alert Logic MDR Enterprise

An enhancement to the MDR Professional service, MDR Enterprise is purpose-built to protect your highest risk assets.

Fortra XDR

Enhancing our MDR offering with SOC incident review for endpoints, managed containment, and access to the Fortra agent.
