

## Fortra's Cybersecurity Solutions

It's often hard to tell heads from tails in the security space. Cybersecurity is overstuffed with products that go unused, vendors that go unresearched, and threats that go unmitigated. Current cybersecurity SOCs and setups were built for a simpler time, and old ways change slowly. What results is a lot of complexity and an infrastructure unprepared to handle it.

Consequently, teams divert most of their attention to cattle-herding sprawling security stacks rather than focusing on curating security posture. An expert is needed to help you cut through the clutter.

### Fortra can help you focus on what really matters to your cybersecurity strategy

With a new, focused security outlook, you can:

- Take an honest look at your cybersecurity maturity
- Determine how well your organization is prepared to handle risk – *today*
- Identify and reduce the risks that affect you the *most*
- Clean out shelfware and reduce operational costs by cutting redundant programs
- Pare down your security posture to its most essential elements, making your entire stack easy to run and exciting – not overwhelming – to manage

### Complete Cybersecurity from Fortra

Fortra offers best-of-breed solutions across the most prevalent threat vectors to give you a powerful, comprehensive cybersecurity package from a single vendor. Fortra lets you run lean, only keeping the strongest and most necessary solutions to help you overcome security obstacles without creating new ones in the process.

With Fortra, you can expect:

- A cloud-native, multi-vector cyber defense platform
- AI-powered cyber kill chain prevention
- Intelligence across infrastructure security, offensive security, and data security

Plus, industry-renowned experts and a company with the staying power to give you consistent, long-term results year after year.
