

DATASHEET (IBM i)

IBM i Solution Overview

Fortra and IBM i

Fortra aligns IT and business goals to help IBM i organizations build a competitive edge. Our software secures IBM i environments, monitors and automates processes, and provides easy access to the information people need.

Fortra is also home to some of the world's top IBM i experts. From cybersecurity to operations to analytics, our team understands the full potential of this powerful operating system. It shows in our tools, developed and designed with your needs in mind. It shows in our world-class, friendly technical support. And it shows in our highly respected IBM i advocates, including multiple IBM Champions.

We put our knowledge to work for you. As evidenced by our annual IBM i Marketplace Survey, we listen to the IBM i community. We know that time, resources, and expertise are in short supply. That's why we can help configure and implement your solutions, so there's no waiting on your side. If you have IT staff who are new to IBM i, our solutions shorten the learning curve. When you need a partner on IBM i — not just a vendor — you need Fortra.

Systems Management

Fortra offers native IBM i solutions for all critical areas of system management, including job scheduling and batch process management, data replication and high availability, performance and application monitoring, and more.

Our tools offer the building blocks that teams need to meet service-level agreements, support the organization as it grows, and make IT's workload more manageable. Fortra's system management tools have served the IBM i community for more than 35 years, growing alongside the platform and adapting to it every step of the way.

SYSTEMS MANAGEMENT

Cybersecurity

Fortra is your security partner in managing evolving data privacy threats with automated solutions. Our solutions are designed to help you simplify security, so you can easily meet auditor demands and harden your systems while conserving valuable IT resources.

Fortra’s IBM i security suite combines world-class security software with outstanding customer support. Whether your IT staff consists of security novices or seasoned professionals, we have the experience and resources to help you implement a multi-layered defense that protects your IBM i without disrupting business activity.

About Fortra

Fortra is a cybersecurity company like no other. We’re creating a simpler, stronger future for our customers. Our trusted experts and portfolio of integrated, scalable solutions bring balance and control to organizations around the world. We’re the positive changemakers and your relentless ally to provide peace of mind through every step of your cybersecurity journey. Learn more at fortra.com.

Business Intelligence

Fortra offers premier business intelligence solutions for IBM i. With powerful query and reporting capabilities, our BI solutions make it easy to access, analyze, and distribute data exactly how you want it. IT can get the software up and running quickly, easily integrate existing queries from Query/400, easily replace unsupported solutions like DB2 Web Query for i, and free up time by allowing users to access and interpret data via an intuitive web-based interface. Our BI solutions also offer multiple deployment options — including Excel, a web interface, and personalized dashboards — all without tasking IT with time-consuming programming.

Sequel		

Document Management

With Fortra's document management software, you can electronically capture, manage, and distribute all of your organization's documents and data. Replace outdated forms solutions like AFP, capture and deliver spool files and reports, enforce data collection workflows, and automate departmental processes for accounts payable, accounts receivable, HR, and more. Our document management solutions also allow you to automatically route documents through customizable workflows and integrate data with ERP and line of business solutions.

DOCUMENT MANAGEMENT
