

DATASHEET (CYBERSECURITY SOLUTIONS)

Fortra Solutions for SaaS

Future-proof software-as-a-service (SaaS) investments. Arm your organization with scalable, enterprise-level cybersecurity solutions.

Benefits of SaaS Cybersecurity

While SaaS providers are responsible for securing the application itself, the onus of defending the sensitive information that resides inside is completely on the customer. With Fortra's arsenal of best-of-breed cybersecurity solutions for SaaS organizations, customers are never alone.

As your relentless ally in the fight against cybercrime, Fortra provides additional layers of security to both cloud-based software and data.

Fortra's integrated, scalable portfolio supports the encryption, authentication, authorization, and data privacy standards fast-moving companies must comply with, allowing them to grow while confidently protecting customer data, scale while staying ahead of attackers, and remain agile in a competitive cloud environment while never letting business outstrip security.

Compliance for SaaS Applications

Fortra's solutions hold SaaS architecture and the data it holds to the highest compliance standards.

- **HIPAA** – In a connected cloud environment, keep medical data safe as it flows from patient apps through healthcare portals.
- **PCI DSS** – Know that their online payments are secure — and that your bases are covered — with PCI DSS compliant SaaS payment functions.
- **SOX** – Limit access to financial data with SOX compliant SaaS solutions.
- **GDPR** – If your SaaS solutions are used by teams or consumers in the EU, Fortra's cybersecurity solutions ensure that GDPR guidelines are followed.
- **FISMA** – Vet SaaS solutions in the public sector to secure FISMA compliant data with Fortra.
- **DFARS** – Make sure your SaaS applications comply with federal guidelines to qualify you to contract with the Department of Defense.

SOLUTION SUMMARY

BENEFITS

- Protect the sensitive data inside SaaS applications, not just the applications themselves.
- Provide an optimized, customized layer of defense to standard, vendor-issued SaaS security measures.
- Confidently use, produce, and share SaaS applications, knowing they are compliant with industry data privacy standards.

COMPLIANCE & FRAMEWORKS

- HIPAA
- PCI DSS
- SOX
- GDPR
- FISMA
- DFARS

FORTRA SOLUTIONS

- Vulnerability Management
- Email Security and Anti-Phishing
- Digital Risk Protection
- Offensive Security
- Data Protection
- Secure File Transfer
- Managed Security Services
- Security Awareness Training
- Compliance
- IBM i Cybersecurity

Fortra Solutions

Vulnerability Management

Discover, prioritize, and remediate vulnerabilities across your IT estate and software development processes.

Anti-Phishing and Email Security

Secure your brand from consumer phishing attacks and protect against business email compromise.

Application Security Testing

Test your application against extensive attack combinations.

Managed Security Services

Let the experts help secure your IT estate.

Compliance

Help meet requirements to comply with Sarbanes-Oxley (SOX).

Integrity Management

Deploy consistent security controls across cloud and on-premises environment.

Data Protection

Discover, monitor, and protect source code, patents, contracts, and other critical business data.

Secure File Transfer

Secure, automate, and streamline sensitive file transfers between departments and business partners.

IBM i Cybersecurity

Fortra is your IBM i security partner for managing evolving threats with automated solutions for SaaS providers.

Security Awareness Training

Educate employees on handling business critical data and execute phishing simulations.

Visit fortra.com/saas for more ways Fortra works to secure your evolving SaaS business.
