

DATASHEET (INFRASTRUCTURE PROTECTION)

# PCI-ASV Scanning

## Self-Service Compliance Scanning in Fortra VM

Any business that accepts credit card payments is subject to a set of security guidelines in the Payment Card Industry Data Security Standard (PCI DSS). PCI DSS covers how customer payment data is stored, transmitted, processed, and protected to prevent credit card fraud and sensitive data breaches.

Depending on your business merchant level and how you process credit card transactions, your company could be required to submit quarterly external vulnerability reports to confirm your business's PCI compliance status. PCI-ASV Scanning helps identify those vulnerabilities that would compromise the confidentiality and integrity of customer credit card information and disrupt your ability to process credit cards.

### Experienced, Approved PCI-ASV

We have been PCI-ASV approved since 2005 which means we are one of the most experienced Approved Scanning Vendors (ASV) in the world. Our PCI compliance guidance experience is greater than 90% of the rest of the industry.

PCI security standards are continually evolving as new technologies are developed and adopted. Ensure you stay ahead of emerging threats and in compliance with PCI Scanning. Leverage our Fortra Vulnerability Management platform to access scan results with details on tested devices, including vulnerabilities detected and remediation details with 3rd party references and resources. Additionally, process disputes, track compensating controls, and generate PCI compliant reporting on demand in our easy-to-use interface.

Need more help? Managed services are also available to provide expert remediation guidance and resources to help you pass your next quarterly assessment.

**PCI-ASV approved  
since 2005**
