Redefining Data Security

Protect your data from endpoint to cloud with policies that enforce classification-based security.

Deliver full visibility to control data sprawl, shadow IT, and compliance.

Eliminate risky access by spotting excessive permissions, inactive users, and toxic permission overlaps.

Detect risky data transfers by employees, contractors, or compromised accounts in real time.

Simplify compliance audits by tracking data, access, and protection across your environment automatically.

Reduce security gaps by spotting and remediating misconfigurations and excess access.

Compliance Frameworks

● US: State Breach Notification Law	815
● US: Patriot Act	812
● US: PII	803
● US: State SSN Confidentiality Laws	788
● AU: Financial Data	87
● Others	182

The DSPM dashboard summarizes scanned files, sensitive identifiers, compliance frameworks, and classified data. Data exposure insights reveal where data is internal, external, public, or shared organization-wide, which enables faster, informed remediation decisions.
