FORTRA™

SOLUTION BRIEF (Cybersecurity)

Fortra Threat Intelligence Services

Identify Major Threats Before Attackers Strike

It's no secret that the technology and threat actors crafting external threats are constantly changing which makes detection and mitigation difficult. An organization's threat data is valuable in stopping a portion of these external threats, but security teams often find their intelligence incomplete. They lack key threat indicators within a specific, highly disruptive threat category, or miss deep threat assessments on high-risk areas to better understand the threat landscape in enough detail to justify tactical and strategic adjustments.

Eliminate obstacles through a variety of threat intelligence solutions to enhance your overall cybersecurity and better understand the threats attacking your brands and employees. Fortra's Threat Intelligence helps supplement and reinforce existing threat intelligence to empower organizations to take proactive measures against threats.

Equipping Security Teams With Critical Insight

Through Fortra's Threat Intelligence, security teams can address blind spots in their data, and proactively disrupt threat actors, prevent fraud, and enrich security.

- **Cyber Threat Intelligence Feeds:** Access feeds based on unique threats including known indicators that have bypassed trusted security solutions.
- **Enhance Threat Actor Awareness:** Gain a better understanding of threats attacking your brand by exposing full attack cycles, capturing infrastructure intelligence, and uncovering threat actor operations.
- **Maximize Defense with Fortra's Proprietary Indicators:** Cast a broad net by immediately accessing Fortra's emerging threat indicators to reduce vulnerability and better anticipate emerging attacks.
- **Monitor, Track, and Report:** Monitor the threat landscape, benchmark threat exposure against peers, and keep stakeholders informed with detailed intelligence assessments.
- **Maintain Dark Web Vigilance:** Combine automated detection and expert human analysis to proactively identify and defend against future attacks that originate on the dark web.

PRODUCT SUMMARY

Fortra's Threat Intelligence services empower enterprises to take proactive measures against threats by delivering critical insight to disrupt threat actors, prevent fraud, and enrich security controls.

KEY FEATURES

Understand Threats
- Expose the full attack cycle
- Capture actor and infrastructure intel
- Enumerate actor operations

Optimize Defenses
- Add emerging threat indicators
- Reduce vulnerability
- Anticipate adversaries

Reduce Risk
- Keep stakeholders informed
- Monitor the threat landscape
- Benchmark exposure against peers

Threat Intelligence for Optimized Defense

With combined intelligence from PhishLabs, Agari, and the Fortra Threat Brain, users can augment existing security controls with additional insight.

- **Threat Engagement and Disruption** covertly interacts with threat actors to enumerate their infrastructure and disrupt operations with direct BEC threat actor engagement and credential baiting.

- **Intelligence Feeds** enrich existing internal threat data and enable the optimization of security controls to detect and mitigate more threats, including high-fidelity, expert-curated indicator feeds for credential theft cases, email threats reported by users, and money mule accounts.

- **Intelligence Assessments** enrich security controls and improve operational and strategic threat decision making with expanded insight from supplemental fraud and email intelligence assessments provided by Fortra researchers. Gain deep insight into credential theft incidents, email threats, and counterfeit sites.

- **Dark Web Monitoring** inspect sources not indexed by web browsers to detect brand content and threats on dark web sites, forums, and marketplaces, and compromised credentials stolen by malware.

Cybercriminal targets organization with BEC attack.

The threat is intercepted by Fortra

CYBERCRIMINAL

TARGET COMPANY

Fortra initiates engagement with attacker

Attacker takes bait. Fortra automates communication and captures key intelligence

Fortra provides visibility into the full attack cycle, resulting in actionable intelligence.

Gain actionable adversary intelligence with Fortra's BEC Threat Actor Engagement service.
