FORTRA™

Protect Your Data. Free Your Business

Identify, Classify and Protect What Matters to Your Business.

The Foundation of Data Security

Fortra's Data Classification solutions enable organizations to classify, protect, analyze, and confidently share regulatory compliance requirements by identifying and securing unstructured data.

> "Forrester believes classification is the foundation for all of data security, and it's critical for the success of other data security solutions, such as DLP, rights management, and encryption."
>
> **Forrester Research**
> Forrester's TechRadar™: Data Security And Privacy, Q4 2017

Optimize Your Security Investments

Collaboration

Enable or block access to files depending on the attributes of the file, the user, and the device

Data Loss Prevention

Provide precise identification of IP, PII, and other sensitive information to increase the effectiveness of DLP systems

Encryption

Trigger consistent application of rights management and encryption technologies based on content, context, and classification

Compliance

Insert protective markings to comply with regulations and standards (GDPR, ITAR, NERC, ISO 27001, and many more)

Records Management

Apply retention codes to files that can be leveraged for compliant records management and data deletion
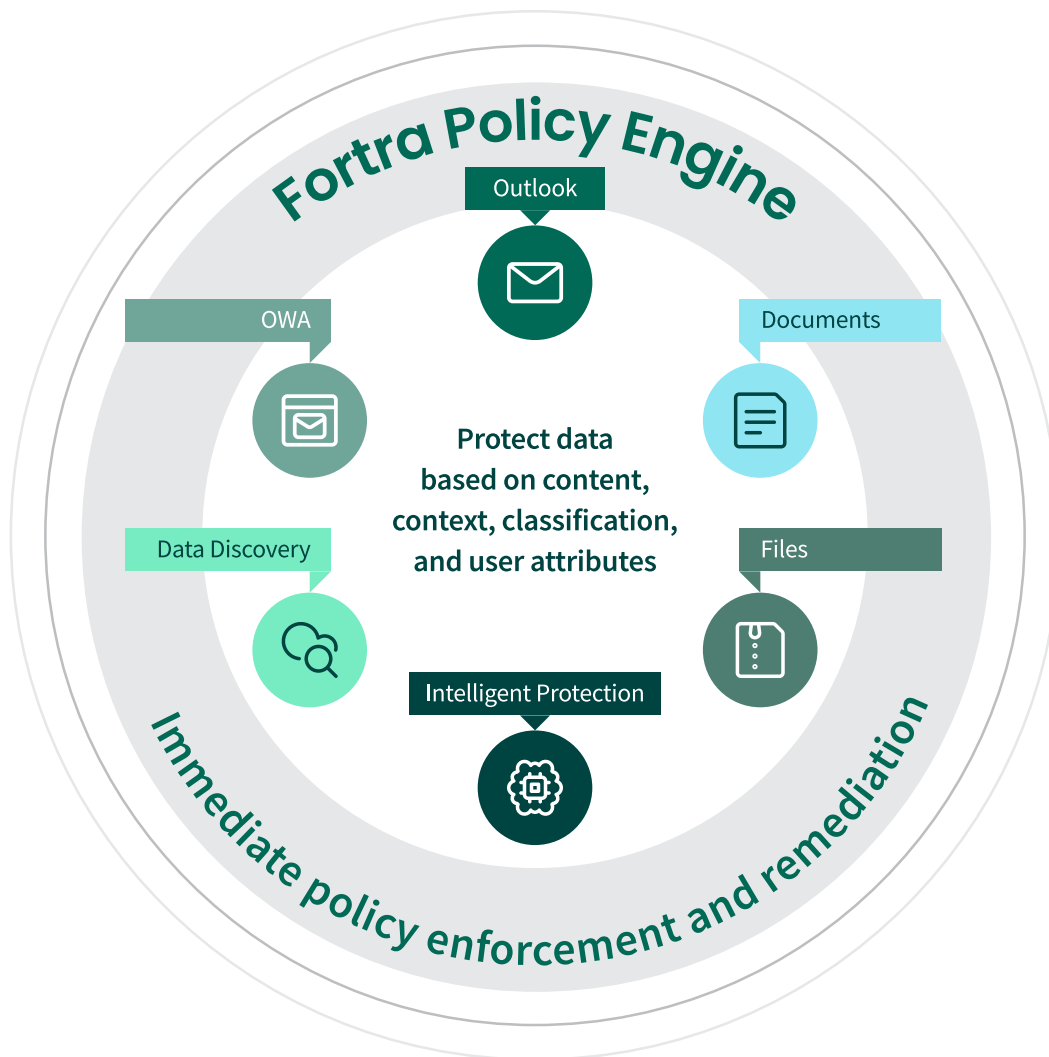

Threat Analysis

Analyze user activity with sensitive files to detect threats early

Enterprise Information Protection

Fortra's Data Classification Suite prevents data loss by increasing user security awareness and by enforcing policies that protect sensitive information in emails, documents, and other file types – on the desktop, on mobile devices, and in the Cloud.
