

Classifier Overview

Fortra's Classifier Suite enables organizations to better manage and control their data, streamline operational performance, and improve return on technology investment.

We're entering a new era of data protection – one that promises ever greater protection for data subjects, tighter regulatory oversight and even larger fines for non-compliance.

While data classification offers an increasingly persuasive answer to the questions of unintended data leakage, it doesn't stop here. With Gartner pointing to rapidly growing adoption, the benefits of effectively categorizing data go far beyond protection.

Data classification extends the value and efficacy of your wider data security and governance ecosystem – adding new levels of intelligence to data loss prevention and data archiving solutions, to name just two. All of which drives greater levels of return across your data protection investments. Ultimately though, data classification allows data security controls, rules, and policies to be more easily and consistently enforced.

1. Engage Users

- Fully customizable interface
- Simple classification label selection
- Single click classification functionality

2. Increase Awareness

- Application of visual markings to documents
- Attachment inventories maintain awareness of original content, even when printed

3. Increase Accountability

- Users are responsible for selecting the appropriate classification based upon their knowledge of the content

4. Optimize Security Technology

- Working with best-of-breed technology providers to deliver data classification as part of a complete solution

KEY BENEFITS

"You can't be following best practice in today's world without doing data classification. Data classification makes efficiencies inevitable... if you are not leveraging classification data, you are working too hard."

Renee Murphy,
*Principal Analyst, Forrester
Research Inc.*

What Does Classifier Suite Include?

- **Email Classifier** – Adds Message classification capabilities to Microsoft Outlook or Lotus Notes.
- **Office Classifier** – Incorporates data classification into the primary productivity tools of Microsoft Office, including Outlook, Outlook Web App, Exchange, SharePoint, Word, Excel, PowerPoint, Visio, and Project.
- **File Classifier** – DCS provides users with the means to classify any file held in Windows File Store and review its classification status.
- **Power Classifier** – Build classification into routine tasks using Fortra's Power Classifier for Files.
- **Classifier Mail add-in for OWA** – Classify emails within Microsoft Outlook Web App.
- **CAD Classifier** – Classify design documents from creation for AutoCAD and DraftSight.
- **Mac Classifier** – Supports each user in correctly classifying documents and emails as they are worked on within the Microsoft Office for Mac applications.
- **Notes Classifier** – Adds message classification capabilities to Lotus Notes.
- **Exchange Classifier** – Enhanced external data control and safer collaboration.
- **SharePoint Classifier** – Adds classification capabilities to Microsoft SharePoint documents.
- **Reporting** – Monitor and report on classification events and how classified data is handled so you have full knowledge of user behavior and insights to inform your security strategy.

Additional Products

Fortra's DCS for Data at Rest offers data discovery and protection for data at rest via our Data Detection Engine, which identifies and automatically handles personally identifiable information (PII).

SAFEmail Military Messaging enhances COTS Microsoft Outlook and Exchange message functionality to support Medium and High Grade messaging within defense and intelligence applications.

Enterprise Address Book Multi Directory enhances Microsoft Outlook to provide users with a powerful, flexible way to search and explore address books across multiple LDAP directories such as Active Directory, IBM Notes, and IBM Domino.
