

Frontline Peer Comparison Insight™

Peer comparison at your fingertips.

For over a decade, Digital Defense provided customers an annual report, *Digital Defense Insight*, providing valuable perspectives into security operations at peer organizations as they evaluated information security programs and practices.

#	Peer Overall Internal Vulnerability	Your Overall Internal Vulnerability	Severity
Critical Severity Top 5			
1	MS17-010: SMB Remote Code Execution Vulnerability (Network Check) (122051)	MS17-010: SMB Remote Code Execution Vulnerability (Network Check) (122051)	Critical
2	Microsoft SMB Remote Code Execution Vulnerability (Network Check) (122052)	MS19-MAY: Microsoft RDP 'BlueKeep' Unauthenticated Remote Code Execution (Network Check) (128831)	Critical
3	MS08-067 Microsoft Windows Server Service Stack Overflow (Network Check) (103802)	MS08-067 Microsoft Windows Server Service Stack Overflow (Network Check) (103802)	Critical
4	MS06-040 Microsoft Windows Server Service Stack Overflow (Network Check) (102000)	MS06-040 Microsoft Windows Server Service Stack Overflow (Network Check) (102000)	Critical
5	MS19-MAY: Microsoft RDP 'BlueKeep' Unauthenticated Remote Code Execution (Network Check) (128831)	N/A	Critical

Frontline Insight™ is now available on demand in Frontline.Cloud™

Frontline Insight empowers users with information they need to determine if their security practices align with peers in the industry. Gain visibility into whether your organization's top security risks parallel those for other organizations in your same vertical or company size.

Frontline Insight reporting presents on demand comparative information of your organizations current security posture (as reported in Frontline.Cloud Active View) by Frontline Security GPA® to others in your peer group and across verticals. Instantly see if your organization's highest risk vulnerabilities mirrors the threats experienced by peers. Measure your remediation efficiency to others and determine the efficacy of your vulnerability management program.

Timely, relevant, measurable data generated by you for you. Never secure your network in the dark again.
