Active View Vulnerability Details Report

Report Data Source: Active View
Date Sourced:

Prepared for: Demo Account
Businessgroup: Enterprise Admins
Date Generated:
Data Options: Default | Include Acceptable Risk | 730 day window | Rating Method: DDI

Table of Contents

1 Identification and Purpose

Frontline provides an Active View of all assets that have been assessed. This document presents the most current findings across all of the assets that have been included in the scope of this report. The results in the sections below include high-level remarks about the security issues that were identified and general recommendations for improving the security posture of Demo Account.

This report on the current Active View was generated to highlight deficiencies in the patch level and security configuration of assets and to aid Demo Account in managing risk.

The following sections provide a summary of findings that includes the Security GPA for the assets that are within the scope of this report, and an overview of vulnerabilities at a high level. The next section contains a detailed report on the assets that were within the scope of the assessment. The last section contains high-impact recommendations for improving general security posture. An explanation of the ratings that are used throughout the report are provided in the appendix section.

2 Overview

This report provides a summary for Demo Account and covers 251 assets. The assets have 79 occurrences of 11 critical-severity vulnerabilities, 547 occurrences of 329 high-severity vulnerabilities, 588 occurrences of 323 medium-severity vulnerabilities, 406 occurrences of 59 low-severity vulnerabilities, and 3169 occurrences of 637 trivial-severity vulnerabilities.

Overall security posture: **C-**

Based on existing vulnerabilities, associated asset ratings, and assigned business risk of individual assets, the overall Security GPA for Demo Account is **1.35 (C-)**.

Data for this report is sourced from Active View as of . Details concerning the rating system are provided in the Appendix.

3 Asset Vulnerability Information

The severity attributed to each asset contributes to the overall security posture. The figures provided are intended to aid in performing a qualitative analysis of Demo Account security posture.

3.1 Comprehensive Asset Rating Overview

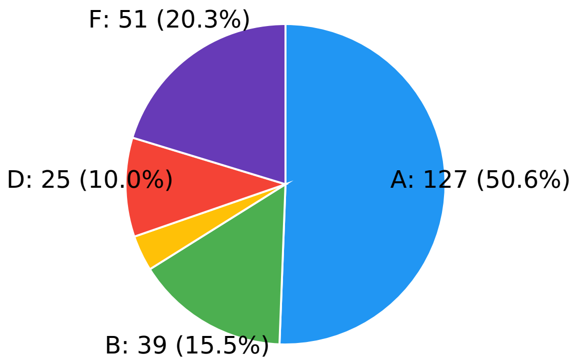

Figure 3.1: Number and percentage of assets covered by this report that have a given asset rating.

3.2 Vulnerability Counts by Severity

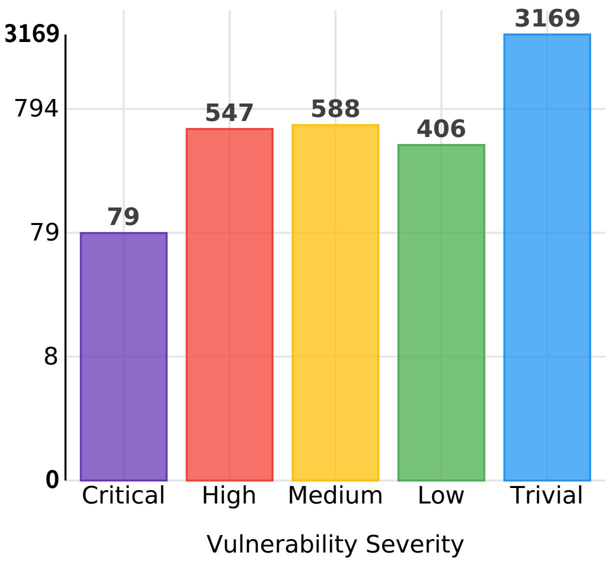

Figure 3.2: Number of vulnerabilities per Severity Rating that exist in the assets covered by this report.

3.3 Top 5 At Risk Assets

It is important to understand which of Demo Account's assets are most at risk. Table 3.3 shows the 5 assets which have the highest risk rating.

#	Rating	Hostname	Operating System	Vulns
1	F	BUFF-HEARTBLEED 192.168.69.106	Ubuntu Linux server	170
2	F	BUFF-HEARTBLEED 192.168.68.101	Ubuntu Linux server	165
3	F	BUFF-HEARTBLEED 192.168.67.55	Ubuntu Linux server	153
4	F	WINXP-ORACLE 192.168.67.62	Windows XP client	57
5	F	ATS-WIN7-ENT64 192.168.69.245	Windows 7 Enterprise client	43

Table 3.3 The 5 assets with the most severe rating are listed in this table.

4 Trending Information

Trending provides a quick and easy way to see how well you are doing over time.

4.1 Security GPA Trends

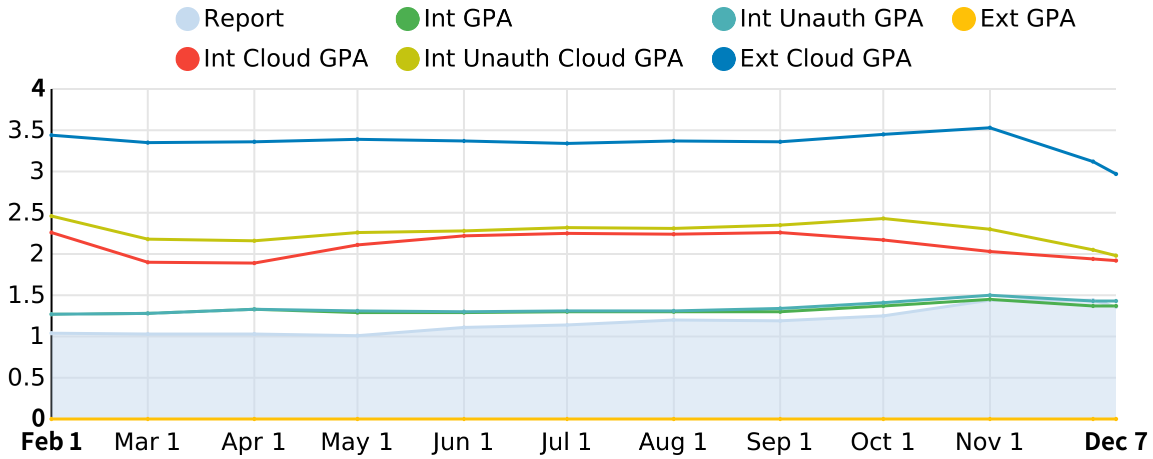

Figure 4.1: Security GPA trending graphs shows trends over the past year for all assets in this report.

4.2 Vulnerability Severity Trends

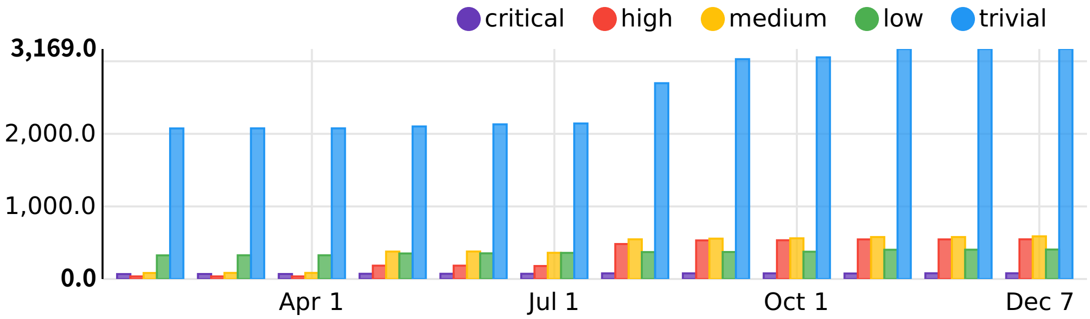

Figure 4.2: Vulnerability severity trending shows trends over the past year for all vulnerabilities in this report.

4.3 Vulnerability Status Trends

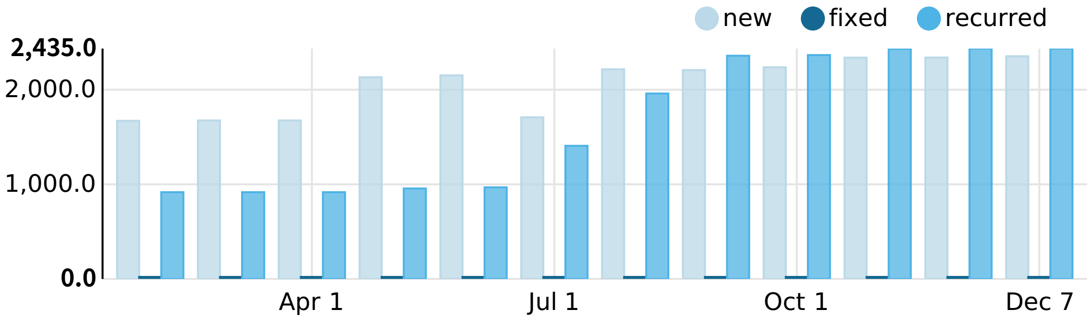

Figure 4.3: Vulnerability status trending shows trends over the past year for all vulnerabilities in this report.

5 Vulnerability Summary

This section covers 1359 unique vulnerabilities. A summary of the unique vulnerability counts and their associated instance counts are located below followed by a list of each unique vulnerability within the scope of this report.

Severity Counts Breakdown					
Severity	Critical	High	Medium	Low	Trivial
Unique:	11	329	323	59	637
Instances:	79	547	588	406	3169

Vulnerability Title	Count	Severity
Easily Guessable SSH Credentials (104120)	27	Critical
SSL Connection: Server Vulnerable to Heartbleed Attack (113790)	15	Critical
MS17-010: SMB Remote Code Execution Vulnerability (Network Check) (122051)	14	Critical
MS19-MAY: Microsoft RDP 'BlueKeep' Unauthenticated Remote Code Execution (Network Check) (128831)	6	Critical
Emerson Avocent Default SSH Credentials (118921)	3	Critical
MS08-067 Microsoft Windows Server Service Stack Overflow (Network Check) (103802)	3	Critical
MS09-050 Microsoft Windows SMB2 Command Execution Vulnerabilities (Network Check) (104045)	3	Critical
Unix Server Common Password (100151)	3	Critical
Samba IsKnownPipename Remote Code Execution (122062)	2	Critical
Threat Detected: Trojan Variant (126460)	2	Critical
HTTP Easily Guessable Credentials (104433)	1	Critical
Microsoft Windows 7 End of Life (131864)	8	High

MS12-020 Remote Desktop Protocol Use-After-Free Vulnerability (Network Check) (104735)	7	High
OpenSSH 'ssh-agent' Double Free Vulnerability (144213)	7	High
MS15-034: Microsoft IIS HTTP.sys Remote Code Execution (Network Check) (117590)	6	High
MS22-JUL: Microsoft Windows Security Update (149222)	5	High
Apache HTTP Server 'mod_proxy_ftp' Uninitialized Memory Usage Vulnerability (133605)	4	High
Apache HTTP Server Security Update 2.4.48 (145498)	4	High
MS21-DEC: Microsoft Windows Security Update (147272)	4	High
MS22-APR: Microsoft Windows Security Update (148319)	4	High
MS22-FEB: Microsoft Windows Security Update (147753)	4	High
MS22-JAN: Microsoft Windows Security Update (147420)	4	High
MS22-JUN: Microsoft Windows Security Update (148994)	4	High
MS22-MAR: Microsoft Windows Security Update (148037)	4	High
MS22-MAY: Microsoft Windows Security Update (148572)	4	High
Apache HTTP Server 2.4.53 Security Release (148390)	3	High
Apache HTTP Server Security Update 2.4.51 (147293)	3	High
Microsoft Windows Server 2008 End of Life (131869)	3	High
Microsoft Windows XP End of Life (113789)	3	High
MS13-098: Vulnerability in Windows Could Allow Remote Code Execution - Registry Entry Not Set (149637)	3	High
Apache httpd '2.2.32 2.4.24' Remote Segmentation Fault Vulnerability (290291)	2	High
Apache httpd '2.2.x before 2.2.33 and 2.4.x before 2.4.26' 'mod_mime' subcomponent Remote Read Vulnerability (290301)	2	High

Apache httpd '2.2.x before 2.2.33' and '2.4.x before 2.4.26' 'mod_ssl' subcomponent NULL pointer Vulnerability (290295)	2	High
Apache HTTP Server 'ap_get_basic_auth_pw' Authentication Bypass (290284)	2	High
Apache HTTP Server Internal Data Buffering Denial of Service Vulnerability (129589)	2	High
Apache HTTP Server 'Module Scripts' Privilege Escalation Vulnerability (128443)	2	High
MS14-068: Vulnerability in Kerberos Could Allow Elevation of Privilege (116972)	2	High
MS15-009: Security Update for Internet Explorer (117381)	2	High
MS15-010: Vulnerabilities in Windows Kernel-Mode Driver Could Allow Remote Code Execution (117380)	2	High
MS15-018: Cumulative Security Update for Internet Explorer (117479)	2	High
MS15-021: Vulnerabilities in Adobe Font Driver Could Allow Remote Code Execution (117476)	2	High
MS15-032: Cumulative Security Update for Internet Explorer (117588)	2	High
MS15-043: Cumulative Security Update for Internet Explorer (117738)	2	High
MS15-044: Vulnerabilities in Microsoft Font Drivers Could Allow Remote Code Execution (117737)	2	High
MS15-056: Cumulative Security Update for Internet Explorer (117878)	2	High
MS15-065: Security Update for Internet Explorer (118050)	2	High
MS15-078: Vulnerability in Microsoft Font Driver Could Allow Remote Code Execution (118096)	2	High
MS15-079: Cumulative Security Update for Internet Explorer (118134)	2	High
MS15-080: Vulnerabilities in Microsoft Graphics Component Could Allow Remote Code Execution (118133)	2	High
MS15-093: Security Update for Internet Explorer (118245)	2	High
MS15-106: Cumulative Security Update for Internet Explorer (118394)	2	High

MS15-124: Cumulative Security Update for Internet Explorer (118670)	2	High
MS16-001: Cumulative Security Update for Internet Explorer (118689)	2	High
MS16-009: Cumulative Security Update for Internet Explorer (118985)	2	High
MS16-012: Security Update for Microsoft Windows PDF Library to Address Remote Code Execution (118984)	2	High
MS16-023: Cumulative Security Update for Internet Explorer (119094)	2	High
MS16-028: Security Update for Microsoft Windows PDF Library to Address Remote Code Execution (119089)	2	High
MS16-037: Cumulative Security Update for Internet Explorer (119278)	2	High
MS16-039: Security Update for Microsoft Graphics Component (119276)	2	High
MS16-040: Security Update for Microsoft XML Core Services (119275)	2	High
MS16-063: Cumulative Security Update for Internet Explorer (119505)	2	High
MS16-087: Security Update for Windows Print Spooler Components (119630)	2	High
MS16-095: Cumulative Security Update for Internet Explorer (119722)	2	High
MS16-104: Cumulative Security Update for Internet Explorer (120918)	2	High
MS16-116: Security Update in OLE Automation for VBScript Scripting Engine (120906)	2	High
MS16-118: Cumulative Security Update for Internet Explorer (121027)	2	High
MS16-130: Security Update for Microsoft Windows (121132)	2	High
MS16-132: Security Update for Microsoft Graphics Component (121130)	2	High
MS16-144: Cumulative Security Update for Internet Explorer (121327)	2	High
MS16-146: Security Update for Microsoft Graphics Component (121325)	2	High
MS16-147: Security Update for Microsoft Uniscribe (121324)	2	High

MS17-006: Cumulative Security Update for Internet Explorer (121910)	2	High
MS17-010: Security Update for Microsoft Windows SMB Server (121906)	2	High
MS17-013: Security Update for Microsoft Graphics Component (121903)	2	High
MS17-APR: Microsoft Internet Explorer Security Update (122044)	2	High
MS17-APR: Microsoft .NET Security Update (122049)	2	High
MS17-APR: Microsoft Windows Security Update (122045)	2	High
MS17-AUG: Microsoft Windows Security Update (122397)	2	High
MS17-DEC: Microsoft Internet Explorer Security Update (123543)	2	High
MS17-DEC: Microsoft Windows Security Update (123544)	2	High

Compliance: Ensure 'Modify firmware environment values' is set to 'Administrators' (120550)	7	Trivial
Compliance: Ensure 'MSS: (AutoAdminLogon) Enable Automatic Logon (not recommended)' is set to 'Disabled' (120689)	7	Trivial
Compliance: Ensure 'MSS: (DisableIPSourceRouting) IP source routing protection level (protects against packet spoofing)' is set to 'Enabled: Highest protection, source routing is completely disa... (120691)	7	Trivial

Compliance: Ensure 'MSS: (DisableIPSourceRouting IPv6) IP source routing protection level (protects against packet spoofing)' is set to 'Enabled: Highest protection, source routing is completely... (120690)	7	Trivial
Compliance: Ensure 'MSS: (EnableICMPRedirect) Allow ICMP redirects to override OSPF generated routes' is set to 'Disabled' (120692)	7	Trivial
Compliance: Ensure 'MSS: (NoNameReleaseOnDemand) Allow the computer to ignore NetBIOS name release requests except from WINS servers' is set to 'Enabled' (120694)	7	Trivial
Compliance: Ensure 'MSS: (SafeDllSearchMode) Enable Safe DLL search mode (recommended)' is set to 'Enabled' (120696)	7	Trivial
Compliance: Ensure 'MSS: (ScreenSaverGracePeriod) The time in seconds before the screen saver grace period expires (0 recommended)' is set to 'Enabled: 5 or fewer seconds' (120697)	7	Trivial
Compliance: Ensure 'MSS: (WarningLevel) Percentage threshold for the security event log at which the system will generate a warning' is set to 'Enabled: 90% or less' (120700)	7	Trivial
Compliance: Ensure 'Network access: Allow anonymous SID/Name translation' is set to 'Disabled' (120595)	7	Trivial
Compliance: Ensure 'Network access: Do not allow anonymous enumeration of SAM accounts and shares' is set to 'Enabled' (120597)	7	Trivial
Compliance: Ensure 'Network access: Do not allow anonymous enumeration of SAM accounts' is set to 'Enabled' (120596)	7	Trivial
Compliance: Ensure 'Network access: Let Everyone permissions apply to anonymous users' is set to 'Disabled' (120599)	7	Trivial
Compliance: Ensure 'Network access: Remotely accessible registry paths' (120600)	7	Trivial
Compliance: Ensure 'Network access: Remotely accessible registry paths and sub-paths' (120601)	7	Trivial
Compliance: Ensure 'Network access: Restrict anonymous access to Named Pipes and Shares' is set to 'Enabled' (120602)	7	Trivial
Compliance: Ensure 'Network access: Shares that can be accessed anonymously' is set to 'None' (120603)	7	Trivial
Compliance: Ensure 'Network access: Sharing and security model for local accounts' is set to 'Classic - local users authenticate as themselves' (120604)	7	Trivial

Compliance: Ensure 'Network security: Allow LocalSystem NULL session fallback' is set to 'Disabled' (120606)	7	Trivial
Compliance: Ensure 'Network security: Allow Local System to use computer identity for NTLM' is set to 'Enabled' (120605)	7	Trivial
Compliance: Ensure 'Network Security: Allow PKU2U authentication requests to this computer to use online identities' is set to 'Disabled' (120607)	7	Trivial
Compliance: Ensure 'Network Security: Configure encryption types allowed for Kerberos' is set to 'RC4_HMAC_MD5, AES128_HMAC_SHA1, AES256_HMAC_SHA1, Future encryption types' (120608)	7	Trivial
Compliance: Ensure 'Network security: Do not store LAN Manager hash value on next password change' is set to 'Enabled' (120609)	7	Trivial
Compliance: Ensure 'Network security: Force logoff when logon hours expire' is set to 'Enabled' (120610)	7	Trivial
Compliance: Ensure 'Network security: LAN Manager authentication level' is set to 'Send NTLMv2 response only. Refuse LM & NTLM' (120611)	7	Trivial
Compliance: Ensure 'Network security: LDAP client signing requirements' is set to 'Negotiate signing' or higher (120612)	7	Trivial
Compliance: Ensure 'Network security: Minimum session security for NTLM SSP based (including secure RPC) clients' is set to 'Require NTLMv2 session security, Require 128-bit encryption' (120613)	7	Trivial
Compliance: Ensure 'Network security: Minimum session security for NTLM SSP based (including secure RPC) servers' is set to 'Require NTLMv2 session security, Require 128-bit encryption' (120614)	7	Trivial
Compliance: Ensure 'No auto-restart with logged on users for scheduled automatic updates installations' is set to 'Disabled' (120815)	7	Trivial
Compliance: Ensure 'Notify antivirus programs when opening attachments' is set to 'Enabled' (120823)	7	Trivial
Compliance: Ensure 'Password must meet complexity requirements' is set to 'Enabled' (120520)	7	Trivial
Compliance: Ensure 'Password protect the screen saver' is set to 'Enabled' (120818)	7	Trivial

Compliance: Ensure 'Password Settings: Password Age (Days)' is set to 'Enabled: 30 or fewer' (MS only) (120688)	7	Trivial
Compliance: Ensure 'Password Settings: Password Complexity' is set to 'Enabled: Large letters + small letters + numbers + special characters' (MS only) (120686)	7	Trivial
Compliance: Ensure 'Password Settings: Password Length' is set to 'Enabled: 15 or more' (MS only) (120687)	7	Trivial
Compliance: Ensure 'Perform volume maintenance tasks' is set to 'Administrators' (120551)	7	Trivial
Compliance: Ensure 'Prevent downloading of enclosures' is set to 'Enabled' (120789)	7	Trivial
Compliance: Ensure 'Prevent enabling lock screen camera' is set to 'Enabled' (120681)	7	Trivial
Compliance: Ensure 'Prevent enabling lock screen slide show' is set to 'Enabled' (120682)	7	Trivial
Compliance: Ensure 'Prevent the usage of SkyDrive for file storage' is set to 'Enabled' (120792)	7	Trivial
Compliance: Ensure 'Prevent users from sharing files within their profile.' is set to 'Enabled' (120824)	7	Trivial
Compliance: Ensure 'Profile single process' is set to 'Administrators' (120552)	7	Trivial
Compliance: Ensure 'Profile system performance' is set to 'Administrators, NT SERVICE\WdiServiceHost' (120553)	7	Trivial
Compliance: Ensure 'Prohibit installation and configuration of Network Bridge on your DNS domain network' is set to 'Enabled' (120704)	7	Trivial
Compliance: Ensure 'Replace a process level token' is set to 'LOCAL SERVICE, NETWORK SERVICE' (120554)	7	Trivial
Compliance: Ensure 'Require domain users to elevate when setting a network's location' is set to 'Enabled' (120705)	7	Trivial
Compliance: Ensure 'Require secure RPC communication' is set to 'Enabled' (120783)	7	Trivial
Compliance: Ensure 'Reset account lockout counter after' is set to '15 or more minute(s)' (120524)	7	Trivial

Compliance: Ensure 'Restore files and directories' is set to 'Administrators' (120555)	7	Trivial
Compliance: Ensure 'Screen saver timeout' is set to 'Enabled: 900 seconds or fewer, but not 0' (120819)	7	Trivial
Compliance: Ensure 'Security: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (120765)	7	Trivial
Compliance: Ensure 'Security: Specify the maximum log file size (KB)' is set to 'Enabled: 196,608 or greater' (120766)	7	Trivial
Compliance: Ensure 'Set client connection encryption level' is set to 'Enabled: High Level' (120784)	7	Trivial
Compliance: Ensure 'Set the default behavior for AutoRun' is set to 'Enabled: Do not execute any autorun commands' (120751)	7	Trivial
Compliance: Ensure 'Setup: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (120767)	7	Trivial
Compliance: Ensure 'Setup: Specify the maximum log file size (KB)' is set to 'Enabled: 32,768 or greater' (120768)	7	Trivial
Compliance: Ensure 'Shutdown: Allow system to be shut down without having to log on' is set to 'Disabled' (120615)	7	Trivial
Compliance: Ensure 'Shut down the system' is set to 'Administrators' (120556)	7	Trivial
Compliance: Ensure 'Sign-in last interactive user automatically after a system-initiated restart' is set to 'Disabled' (120803)	7	Trivial
Compliance: Ensure 'Store passwords using reversible encryption' is set to 'Disabled' (120521)	7	Trivial
Compliance: Ensure 'System ASLR' is set to 'Enabled: Application Opt-In' (120760)	7	Trivial
Compliance: Ensure 'System: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (120769)	7	Trivial
Compliance: Ensure 'System DEP' is set to 'Enabled: Application Opt-Out' (120761)	7	Trivial
Compliance: Ensure 'System objects: Require case insensitivity for non-Windows subsystems' is set to 'Enabled' (120616)	7	Trivial

Compliance: Ensure 'System objects: Strengthen default permissions of internal system objects (e.g. Symbolic Links)' is set to 'Enabled' (120617)	7	Trivial
Compliance: Ensure 'System SEHOP' is set to 'Enabled: Application Opt-Out' (120762)	7	Trivial
Compliance: Ensure 'System: Specify the maximum log file size (KB)' is set to 'Enabled: 32,768 or greater' (120770)	7	Trivial
Compliance: Ensure 'Take ownership of files or other objects' is set to 'Administrators' (120558)	7	Trivial
Compliance: Ensure 'Turn off app notifications on the lock screen' is set to 'Enabled' (120737)	7	Trivial
Compliance: Ensure 'Turn off Automatic Download and Install of updates' is set to 'Disabled' (120794)	7	Trivial
Compliance: Ensure 'Turn off Autoplay' is set to 'Enabled: All drives' (120752)	7	Trivial
Compliance: Ensure 'Turn off background refresh of Group Policy' is set to 'Disabled' (120718)	7	Trivial
Compliance: Ensure 'Turn off Data Execution Prevention for Explorer' is set to 'Disabled' (120772)	7	Trivial
Compliance: Ensure 'Turn off heap termination on corruption' is set to 'Disabled' (120773)	7	Trivial
Compliance: Ensure 'Turn off shell protocol protected mode' is set to 'Disabled' (120774)	7	Trivial
Compliance: Ensure 'Turn off the offer to update to the latest version of Windows' is set to 'Enabled' (120795)	7	Trivial
Compliance: Ensure 'Turn off toast notifications on the lock screen' is set to 'Enabled' (120820)	7	Trivial
Compliance: Ensure 'Turn on convenience PIN sign-in' is set to 'Disabled' (120738)	7	Trivial
Compliance: Ensure 'Turn on PowerShell Script Block Logging' is set to 'Disabled' (120804)	7	Trivial
Compliance: Ensure 'Turn on PowerShell Transcription' is set to 'Disabled' (120805)	7	Trivial

Compliance: Ensure 'User Account Control: Admin Approval Mode for the Built-in Administrator account' is set to 'Enabled' (120618)	7	Trivial
Compliance: Ensure 'User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop' is set to 'Disabled' (120619)	7	Trivial
Compliance: Ensure 'User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode' is set to 'Prompt for consent on the secure desktop' (120620)	7	Trivial
Compliance: Ensure 'User Account Control: Behavior of the elevation prompt for standard users' is set to 'Automatically deny elevation requests' (120621)	7	Trivial
Compliance: Ensure 'User Account Control: Detect application installations and prompt for elevation' is set to 'Enabled' (120622)	7	Trivial
Compliance: Ensure 'User Account Control: Only elevate UIAccess applications that are installed in secure locations' is set to 'Enabled' (120623)	7	Trivial
Compliance: Ensure 'User Account Control: Run all administrators in Admin Approval Mode' is set to 'Enabled' (120624)	7	Trivial
Compliance: Ensure 'User Account Control: Switch to the secure desktop when prompting for elevation' is set to 'Enabled' (120625)	7	Trivial
Compliance: Ensure 'User Account Control: Virtualize file and registry write failures to per-user locations' is set to 'Enabled' (120626)	7	Trivial
Compliance: Ensure 'WDigest Authentication' is set to 'Disabled' (120713)	7	Trivial

Compliance: Ensure 'Devices: Allowed to format and eject removable media' is set to 'Administrators' (122951)	2	Trivial
Compliance: Ensure 'Devices: Prevent users from installing printer drivers' is set to 'Enabled' (122952)	2	Trivial
Compliance: Ensure 'Disable all apps from Windows Store' is set to 'Enabled' (123230)	2	Trivial
Compliance: Ensure 'Disable pre-release features or settings' is set to 'Disabled' (123182)	2	Trivial
Compliance: Ensure 'Disallow Autoplay for non-volume devices' is set to 'Enabled' (123172)	2	Trivial
Compliance: Ensure 'Disallow copying of user input methods to the system account for sign-in' is set to 'Enabled' (123147)	2	Trivial
Compliance: Ensure 'Disallow Digest authentication' is set to 'Enabled' (123248)	2	Trivial

Compliance: Ensure 'Disallow WinRM from storing RunAs credentials' is set to 'Enabled' (123252)	2	Trivial
Compliance: Ensure 'Domain member: Digitally encrypt or sign secure channel data (always)' is set to 'Enabled' (122956)	2	Trivial
Compliance: Ensure 'Domain member: Digitally encrypt secure channel data (when possible)' is set to 'Enabled' (122957)	2	Trivial
Compliance: Ensure 'Domain member: Digitally sign secure channel data (when possible)' is set to 'Enabled' (122958)	2	Trivial
Compliance: Ensure 'Domain member: Disable machine account password changes' is set to 'Disabled' (122959)	2	Trivial
Compliance: Ensure 'Domain member: Maximum machine account password age' is set to '30 or fewer days, but not 0' (122960)	2	Trivial
Compliance: Ensure 'Domain member: Require strong (Windows 2000 or later) session key' is set to 'Enabled' (122962)	2	Trivial
Compliance: Ensure 'Do not allow COM port redirection' is set to 'Enabled' (123212)	2	Trivial
Compliance: Ensure 'Do not allow drive redirection' is set to 'Enabled' (123213)	2	Trivial
Compliance: Ensure 'Do not allow LPT port redirection' is set to 'Enabled' (123214)	2	Trivial
Compliance: Ensure 'Do not allow passwords to be saved' is set to 'Enabled' (123210)	2	Trivial
Compliance: Ensure 'Do not allow supported Plug and Play device redirection' is set to 'Enabled' (123215)	2	Trivial
Compliance: Ensure 'Do not delete temp folders upon exit' is set to 'Disabled' (123222)	2	Trivial
Compliance: Ensure 'Do not display network selection UI' is set to 'Enabled' (123149)	2	Trivial
Compliance: Ensure 'Do not display the password reveal button' is set to 'Enabled' (123179)	2	Trivial
Compliance: Ensure 'Do not enumerate connected users on domain-joined computers' is set to 'Enabled' (123150)	2	Trivial

Compliance: Ensure 'Do not show feedback notifications' is set to 'Enabled' (123183)	2	Trivial
Compliance: Ensure 'Do not use temporary folders per session' is set to 'Disabled' (123223)	2	Trivial
Compliance: Ensure 'Enable/Disable PerfTrack' is set to 'Disabled' (123164)	2	Trivial
Compliance: Ensure 'Enable Font Providers' is set to 'Disabled' (123098)	2	Trivial
Compliance: Ensure 'Enable insecure guest logons' is set to 'Disabled' (123099)	2	Trivial
Compliance: Ensure 'Enable Windows NTP Client' is set to 'Enabled' (123166)	2	Trivial
Compliance: Ensure 'Enforce password history' is set to '24 or more password(s)' (122884)	2	Trivial
Compliance: Ensure 'Enumerate administrator accounts on elevation' is set to 'Disabled' (123180)	2	Trivial
Compliance: Ensure 'Enumerate local users on domain-joined computers' is set to 'Disabled' (123151)	2	Trivial
Compliance: Ensure 'Force shutdown from a remote system' is set to 'Administrators' (122923)	2	Trivial
Compliance: Ensure 'Generate security audits' is set to 'LOCAL SERVICE, NETWORK SERVICE' (122924)	2	Trivial
Compliance: Ensure 'Hardened UNC Paths' is set to 'Enabled, with "Require Mutual Authentication" and "Require Integrity" set for all NETLOGON and SYSVOL shares' (123112)	2	Trivial
Compliance: Ensure 'Include command line in process creation events' is set to 'Disabled' (123125)	2	Trivial
Compliance: Ensure 'Increase scheduling priority' is set to 'Administrators' (122927)	2	Trivial
Compliance: Ensure 'Interactive logon: Do not display last user name' is set to 'Enabled' (122963)	2	Trivial
Compliance: Ensure 'Interactive logon: Do not require CTRL+ALT+DEL' is set to 'Disabled' (122964)	2	Trivial

Compliance: Ensure 'Interactive logon: Machine inactivity limit' is set to '900 or fewer second(s), but not 0' (122965)	2	Trivial
Compliance: Ensure 'Interactive logon: Prompt user to change password before expiration' is set to 'between 5 and 14 days' (122970)	2	Trivial
Compliance: Ensure 'Interactive logon: Smart card removal behavior' is set to 'Lock Workstation' or higher (122973)	2	Trivial
Compliance: Ensure 'Join Microsoft MAPS' is set to 'Disabled' (123234)	2	Trivial
Compliance: Ensure 'Let Windows apps *' is set to 'Enabled: Force Deny' (123169)	2	Trivial
Compliance: Ensure 'Load and unload device drivers' is set to 'Administrators' (122928)	2	Trivial
Compliance: Ensure 'Lock pages in memory' is set to 'No One' (122929)	2	Trivial
Compliance: Ensure 'Maximum password age' is set to '60 or fewer days, but not 0' (122885)	2	Trivial
Compliance: Ensure 'Microsoft network client: Digitally sign communications (always)' is set to 'Enabled' (122974)	2	Trivial
Compliance: Ensure 'Microsoft network client: Digitally sign communications (if server agrees)' is set to 'Enabled' (122975)	2	Trivial
Compliance: Ensure 'Microsoft network client: Send unencrypted password to third-party SMB servers' is set to 'Disabled' (122976)	2	Trivial
Compliance: Ensure 'Microsoft network server: Amount of idle time required before suspending session' is set to '15 or fewer minute(s), but not 0' (122977)	2	Trivial
Compliance: Ensure 'Microsoft network server: Digitally sign communications (always)' is set to 'Enabled' (122979)	2	Trivial
Compliance: Ensure 'Microsoft network server: Digitally sign communications (if client agrees)' is set to 'Enabled' (122980)	2	Trivial
Compliance: Ensure 'Microsoft network server: Disconnect clients when logon hours expire' is set to 'Enabled' (122981)	2	Trivial
Compliance: Ensure 'Microsoft Support Diagnostic Tool: Turn on MSDT interactive communication with support provider' is set to 'Disabled' (123163)	2	Trivial

Compliance: Ensure 'Minimize the number of simultaneous connections to the Internet or a Windows Domain' is set to 'Enabled' (123121)	2	Trivial
Compliance: Ensure 'Minimum password age' is set to '1 or more day(s)' (122887)	2	Trivial
Compliance: Ensure 'Minimum password length' is set to '14 or more character(s)' (122888)	2	Trivial
Compliance: Ensure 'Modify an object label' is set to 'No One' (122933)	2	Trivial
Compliance: Ensure 'Modify firmware environment values' is set to 'Administrators' (122934)	2	Trivial
Compliance: Ensure 'MSS: (AutoAdminLogon) Enable Automatic Logon (not recommended)' is set to 'Disabled' (123084)	2	Trivial
Compliance: Ensure 'MSS: (DisableIPSourceRouting) IP source routing protection level (protects against packet spoofing)' is set to 'Enabled: Highest protection, source routing is completely disabled' (123086)	2	Trivial
Compliance: Ensure 'MSS: (DisableIPSourceRouting IPv6) IP source routing protection level (protects against packet spoofing)' is set to 'Enabled: Highest protection, source routing is completely ... (123085)	2	Trivial
Compliance: Ensure 'MSS: (EnableICMPRedirect) Allow ICMP redirects to override OSPF generated routes' is set to 'Disabled' (123087)	2	Trivial
Compliance: Ensure 'MSS: (KeepAliveTime) How often keep-alive packets are sent in milliseconds' is set to 'Enabled: 300,000 or 5 minutes (recommended)' (123088)	2	Trivial
Compliance: Ensure 'MSS: (NoNameReleaseOnDemand) Allow the computer to ignore NetBIOS name release requests except from WINS servers' is set to 'Enabled' (123089)	2	Trivial
Compliance: Ensure 'MSS: (PerformRouterDiscovery) Allow IRDP to detect and configure Default Gateway addresses (could lead to DoS)' is set to 'Disabled' (123090)	2	Trivial
Compliance: Ensure 'MSS: (SafeDllSearchMode) Enable Safe DLL search mode (recommended)' is set to 'Enabled' (123091)	2	Trivial
Compliance: Ensure 'MSS: (ScreenSaverGracePeriod) The time in seconds before the screen saver grace period expires (0 recommended)' is set to 'Enabled: 5 or fewer seconds' (123092)	2	Trivial

Compliance: Ensure 'MSS: (TcpMaxDataRetransmissions) How many times unacknowledged data is retransmitted' is set to 'Enabled: 3' (123094)	2	Trivial
Compliance: Ensure 'MSS: (TcpMaxDataRetransmissions IPv6) How many times unacknowledged data is retransmitted' is set to 'Enabled: 3' (123093)	2	Trivial
Compliance: Ensure 'MSS: (WarningLevel) Percentage threshold for the security event log at which the system will generate a warning' is set to 'Enabled: 90% or less' (123095)	2	Trivial
Compliance: Ensure 'Network access: Allow anonymous SID/Name translation' is set to 'Disabled' (122983)	2	Trivial
Compliance: Ensure 'Network access: Do not allow storage of passwords and credentials for network authentication' is set to 'Enabled' (122986)	2	Trivial
Compliance: Ensure 'Network access: Let Everyone permissions apply to anonymous users' is set to 'Disabled' (122987)	2	Trivial
Compliance: Ensure 'Network access: Restrict anonymous access to Named Pipes and Shares' is set to 'Enabled' (122992)	2	Trivial
Compliance: Ensure 'Network access: Shares that can be accessed anonymously' is set to 'None' (122994)	2	Trivial
Compliance: Ensure 'Network access: Sharing and security model for local accounts' is set to 'Classic - local users authenticate as themselves' (122995)	2	Trivial
Compliance: Ensure 'Network security: Allow LocalSystem NULL session fallback' is set to 'Disabled' (122997)	2	Trivial
Compliance: Ensure 'Network security: Allow Local System to use computer identity for NTLM' is set to 'Enabled' (122996)	2	Trivial
Compliance: Ensure 'Network Security: Allow PKU2U authentication requests to this computer to use online identities' is set to 'Disabled' (122998)	2	Trivial
Compliance: Ensure 'Network security: Configure encryption types allowed for Kerberos' is set to 'RC4_HMAC_MD5, AES128_HMAC_SHA1, AES256_HMAC_SHA1, Future encryption types' (122999)	2	Trivial
Compliance: Ensure 'Network security: Do not store LAN Manager hash value on next password change' is set to 'Enabled' (123000)	2	Trivial

Compliance: Ensure 'Network security: Force logoff when logon hours expire' is set to 'Enabled' (123001)	2	Trivial
Compliance: Ensure 'Network security: LAN Manager authentication level' is set to 'Send NTLMv2 response only. Refuse LM&NTLM' (123002)	2	Trivial
Compliance: Ensure 'Network security: LDAP client signing requirements' is set to 'Negotiate signing' or higher (123003)	2	Trivial
Compliance: Ensure 'Network security: Minimum session security for NTLM SSP based (including secure RPC) clients' is set to 'Require NTLMv2 session security, Require 128-bit encryption' (123004)	2	Trivial
Compliance: Ensure 'Network security: Minimum session security for NTLM SSP based (including secure RPC) servers' is set to 'Require NTLMv2 session security, Require 128-bit encryption' (123005)	2	Trivial
Compliance: Ensure 'No auto-restart with logged on users for scheduled automatic updates installations' is set to 'Disabled' (123261)	2	Trivial
Compliance: Ensure 'Password must meet complexity requirements' is set to 'Enabled' (122889)	2	Trivial
Compliance: Ensure 'Perform volume maintenance tasks' is set to 'Administrators' (122935)	2	Trivial
Compliance: Ensure 'Prevent access to the about:flags page in Microsoft Edge' is set to 'Enabled' (123205)	2	Trivial
Compliance: Ensure 'Prevent bypassing SmartScreen prompts for files' is set to 'Enabled' (123206)	2	Trivial
Compliance: Ensure 'Prevent bypassing SmartScreen prompts for sites' is set to 'Enabled' (123207)	2	Trivial
Compliance: Ensure 'Prevent downloading of enclosures' is set to 'Enabled' (123224)	2	Trivial
Compliance: Ensure 'Prevent enabling lock screen camera' is set to 'Enabled' (123075)	2	Trivial
Compliance: Ensure 'Prevent enabling lock screen slide show' is set to 'Enabled' (123076)	2	Trivial
Compliance: Ensure 'Prevent Internet Explorer security prompt for Windows Installer scripts' is set to 'Disabled' (123242)	2	Trivial

Compliance: Ensure 'Prevent the usage of OneDrive for file storage' is set to 'Enabled' (123209)	2	Trivial
Compliance: Ensure 'Prevent using Localhost IP address for WebRTC' is set to 'Enabled' (123208)	2	Trivial
Compliance: Ensure 'Profile single process' is set to 'Administrators' (122936)	2	Trivial
Compliance: Ensure 'Profile system performance' is set to 'Administrators, NT SERVICE\WdiServiceHost' (122937)	2	Trivial
Compliance: Ensure 'Prohibit access of the Windows Connect Now wizards' is set to 'Enabled' (123120)	2	Trivial
Compliance: Ensure 'Prohibit installation and configuration of Network Bridge on your DNS domain network' is set to 'Enabled' (123109)	2	Trivial
Compliance: Ensure 'Prohibit use of Internet Connection Sharing on your DNS domain network' is set to 'Enabled' (123110)	2	Trivial
Compliance: Ensure 'Replace a process level token' is set to 'LOCAL SERVICE, NETWORK SERVICE' (122938)	2	Trivial
Compliance: Ensure 'Require a password when a computer wakes (on battery)' is set to 'Enabled' (123157)	2	Trivial
Compliance: Ensure 'Require a password when a computer wakes (plugged in)' is set to 'Enabled' (123158)	2	Trivial
Compliance: Ensure 'Require domain users to elevate when setting a network's location' is set to 'Enabled' (123111)	2	Trivial
Compliance: Ensure 'Require pin for pairing' is set to 'Enabled' (123178)	2	Trivial
Compliance: Ensure 'Require secure RPC communication' is set to 'Enabled' (123217)	2	Trivial
Compliance: Ensure 'Reset account lockout counter after' is set to '15 or more minute(s)' (122894)	2	Trivial
Compliance: Ensure 'Restore files and directories' is set to 'Administrators' (122939)	2	Trivial
Compliance: Ensure 'Restrict Remote Desktop Services users to a single Remote Desktop Services session' is set to 'Enabled' (123211)	2	Trivial

Compliance: Ensure 'Security: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (123187)	2	Trivial
Compliance: Ensure 'Security: Specify the maximum log file size (KB)' is set to 'Enabled: 196,608 or greater' (123188)	2	Trivial
Compliance: Ensure 'Select when Feature Updates are received' is set to 'Enabled: Current Branch for Business, 180 days' (123254)	2	Trivial
Compliance: Ensure 'Select when Quality Updates are received' is set to 'Enabled: 0 days' (123257)	2	Trivial
Compliance: Ensure 'Set client connection encryption level' is set to 'Enabled: High Level' (123218)	2	Trivial
Compliance: Ensure 'Set the default behavior for AutoRun' is set to 'Enabled: Do not execute any autorun commands' (123173)	2	Trivial
Compliance: Ensure 'Set time limit for active but idle Remote Desktop Services sessions' is set to 'Enabled: 15 minutes or less' (123219)	2	Trivial
Compliance: Ensure 'Set time limit for disconnected sessions' is set to 'Enabled: 1 minute' (123221)	2	Trivial
Compliance: Ensure 'Setup: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (123189)	2	Trivial
Compliance: Ensure 'Setup: Specify the maximum log file size (KB)' is set to 'Enabled: 32,768 or greater' (123190)	2	Trivial
Compliance: Ensure 'Shutdown: Allow system to be shut down without having to log on' is set to 'Disabled' (123006)	2	Trivial
Compliance: Ensure 'Shut down the system' is set to 'Administrators' (122940)	2	Trivial
Compliance: Ensure 'Sign-in last interactive user automatically after a system-initiated restart' is set to 'Disabled' (123243)	2	Trivial
Compliance: Ensure 'Store passwords using reversible encryption' is set to 'Disabled' (122890)	2	Trivial
Compliance: Ensure 'Support device authentication using certificate' is set to 'Enabled: Automatic' (123145)	2	Trivial
Compliance: Ensure 'System: Control Event Log behavior when the log file reaches its maximum size' is set to 'Disabled' (123191)	2	Trivial

Compliance: Ensure 'System objects: Require case insensitivity for non-Windows subsystems' is set to 'Enabled' (123007)	2	Trivial
Compliance: Ensure 'System objects: Strengthen default permissions of internal system objects (e.g. Symbolic Links)' is set to 'Enabled' (123008)	2	Trivial
Compliance: Ensure 'System: Specify the maximum log file size (KB)' is set to 'Enabled: 32,768 or greater' (123192)	2	Trivial
Compliance: Ensure 'Take ownership of files or other objects' is set to 'Administrators' (122942)	2	Trivial
Compliance: Ensure 'Toggle user control over Insider builds' is set to 'Disabled' (123184)	2	Trivial
Compliance: Ensure 'Turn off access to the Store' is set to 'Enabled' (123131)	2	Trivial
Compliance: Ensure 'Turn off app notifications on the lock screen' is set to 'Enabled' (123152)	2	Trivial
Compliance: Ensure 'Turn off Automatic Download and Install of updates' is set to 'Disabled' (123231)	2	Trivial
Compliance: Ensure 'Turn off Autoplay' is set to 'Enabled: All drives' (123174)	2	Trivial
Compliance: Ensure 'Turn off background refresh of Group Policy' is set to 'Disabled' (123130)	2	Trivial
Compliance: Ensure 'Turn off Data Execution Prevention for Explorer' is set to 'Disabled' (123194)	2	Trivial
Compliance: Ensure 'Turn off downloading of print drivers over HTTP' is set to 'Enabled' (123132)	2	Trivial
Compliance: Ensure 'Turn off handwriting personalization data sharing' is set to 'Enabled' (123133)	2	Trivial
Compliance: Ensure 'Turn off handwriting recognition error reporting' is set to 'Enabled' (123134)	2	Trivial
Compliance: Ensure 'Turn off heap termination on corruption' is set to 'Disabled' (123195)	2	Trivial
Compliance: Ensure 'Turn off Internet Connection Wizard if URL connection is referring to Microsoft.com' is set to 'Enabled' (123135)	2	Trivial

Compliance: Ensure 'Turn off Internet download for Web publishing and online ordering wizards' is set to 'Enabled' (123136)	2	Trivial
Compliance: Ensure 'Turn off KMS Client Online AVS Validation' is set to 'Enabled' (123229)	2	Trivial
Compliance: Ensure 'Turn off location' is set to 'Enabled' (123197)	2	Trivial
Compliance: Ensure 'Turn off Microsoft consumer experiences' is set to 'Enabled' (123177)	2	Trivial
Compliance: Ensure 'Turn off Microsoft Peer-to-Peer Networking Services' is set to 'Enabled' (123108)	2	Trivial
Compliance: Ensure 'Turn off printing over HTTP' is set to 'Enabled' (123137)	2	Trivial
Compliance: Ensure 'Turn off Registration if URL connection is referring to Microsoft.com' is set to 'Enabled' (123138)	2	Trivial
Compliance: Ensure 'Turn off Search Companion content file updates' is set to 'Enabled' (123139)	2	Trivial
Compliance: Ensure 'Turn off shell protocol protected mode' is set to 'Disabled' (123196)	2	Trivial
Compliance: Ensure 'Turn off the advertising ID' is set to 'Enabled' (123165)	2	Trivial
Compliance: Ensure 'Turn off the offer to update to the latest version of Windows' is set to 'Enabled' (123232)	2	Trivial
Compliance: Ensure 'Turn off the "Order Prints" picture task' is set to 'Enabled' (123140)	2	Trivial
Compliance: Ensure 'Turn off the "Publish to Web" task for files and folders' is set to 'Enabled' (123141)	2	Trivial
Compliance: Ensure 'Turn off the Store application' is set to 'Enabled' (123233)	2	Trivial
Compliance: Ensure 'Turn off the Windows Messenger Customer Experience Improvement Program' is set to 'Enabled' (123142)	2	Trivial
Compliance: Ensure 'Turn off Windows Customer Experience Improvement Program' is set to 'Enabled' (123143)	2	Trivial
Compliance: Ensure 'Turn off Windows Error Reporting' is set to 'Enabled' (123144)	2	Trivial

Compliance: Ensure 'Turn on convenience PIN sign-in' is set to 'Disabled' (123153)	2	Trivial
Compliance: Ensure 'Turn on Mapper I/O (LLTDIO) driver' is set to 'Disabled' (123100)	2	Trivial
Compliance: Ensure 'Turn on PowerShell Script Block Logging' is set to 'Disabled' (123244)	2	Trivial
Compliance: Ensure 'Turn on PowerShell Transcription' is set to 'Disabled' (123245)	2	Trivial

Compliance: Ensure 'Domain controller: Refuse machine account password changes' is set to 'Disabled' (DC only) (122955)	1	Trivial
Compliance: Ensure 'Do not allow password expiration time longer than required by policy' is set to 'Enabled' (MS only) (123079)	1	Trivial
Compliance: Ensure 'Enable Local Admin Password Management' is set to 'Enabled' (MS only) (123080)	1	Trivial
Compliance: Ensure 'Enable RPC Endpoint Mapper Client Authentication' is set to 'Enabled' (MS only) (123161)	1	Trivial
Compliance: Ensure 'Enable Windows NTP Server' is set to 'Disabled' (MS only) (123167)	1	Trivial
Compliance: Ensure 'Interactive logon: Number of previous logons to cache (in case domain controller is not available)' is set to '4 or fewer logon(s)' (MS only) (122969)	1	Trivial
Compliance: Ensure 'Interactive logon: Require Domain Controller Authentication to unlock workstation' is set to 'Enabled' (MS only) (122972)	1	Trivial

Compliance: Ensure LAPS AdmPwd GPO Extension / CSE is installed (MS only) (123078)	1	Trivial
Compliance: Ensure 'Log on as a batch job' is set to 'Administrators' (DC Only) (122930)	1	Trivial
Compliance: Ensure 'Microsoft network server: Server SPN target name validation level' is set to 'Accept if provided by client' or higher (MS only) (122982)	1	Trivial
Compliance: Ensure 'Network access: Do not allow anonymous enumeration of SAM accounts and shares' is set to 'Enabled' (MS only) (122985)	1	Trivial
Compliance: Ensure 'Network access: Do not allow anonymous enumeration of SAM accounts' is set to 'Enabled' (MS only) (122984)	1	Trivial
Compliance: Ensure 'Network access: Restrict clients allowed to make remote calls to SAM' is set to 'Administrators: Remote Access: Allow' (MS only) (122993)	1	Trivial
Compliance: Ensure 'Password Settings: Password Age (Days)' is set to 'Enabled: 30 or fewer' (MS only) (123083)	1	Trivial
Compliance: Ensure 'Password Settings: Password Complexity' is set to 'Enabled: Large letters + small letters + numbers + special characters' (MS only) (123081)	1	Trivial
Compliance: Ensure 'Password Settings: Password Length' is set to 'Enabled: 15 or more' (MS only) (123082)	1	Trivial
Compliance: Ensure 'Prohibit connection to non-domain networks when connected to domain authenticated network' is set to 'Enabled' (MS only) (123122)	1	Trivial
Compliance: Ensure 'Restrict Unauthenticated RPC clients' is set to 'Enabled: Authenticated' (MS only) (123162)	1	Trivial
Compliance: Ensure 'Synchronize directory service data' is set to 'No One' (DC only) (122941)	1	Trivial
Compliance: Ensure 'Turn off multicast name resolution' is set to 'Enabled' (MS Only) (123097)	1	Trivial
Compliance: Set 'NetBIOS node type' to 'P-node' (Ensure NetBT Parameter 'NodeType' is set to '0x2 (2)') (MS Only) (123096)	1	Trivial
Daytime Service Detected (101026)	1	Trivial

Discard Service Detected (100370)	1	Trivial
ICMP Timestamp Request (150396)	1	Trivial
SMB Domain SID Disclosure (100872)	1	Trivial
Web Server Directory Structure Disclosure (104434)	1	Trivial

6 Assets Overview

A detailed summary of findings for each asset is presented in this section. These listings provide an in-depth view of the issues that were identified on a particular asset.

WIN-0NVC5M7BAU7	F

IP: 10.27.34.43
Asset name: WIN-0NVC5M7BAU7
Operating system: Windows Server 2008 R2 Enterprise
Asset type: Server

Protocol	Service
msrpc	135 / tcp
netbios-ns	137 / udp
smb	445 / tcp
http	47001 / tcp
unknown	N/A / tcp
unknown	N/A / icmp

Authenticated Scan Status	OS	DB	CIS	Threatscan
	Failure	N/A	Failure	Failure

Vulnerability Title	Service(s)	Severity
MS17-010: SMB Remote Code Execution Vulnerability (Network Check) (122051) internal | explicit | unauth	445 / tcp smb	Critical
This asset is missing the MS17-010 patch. Vulnerable Response: ff 53 4d 42 25 05 02 00 c0 88 01 44 00 10 00 00 .SMB%......D.... 00 00 00 00 00 00 00 00 04 08 06 00 00 20 eb 3d ....= 00 00 00 ...		
Microsoft Windows Server 2008 R2 End of Life (131870) internal | explicit | unauth	N/A / tcp unknown	High

Support has ended for Windows Server 2008 R2. This host should be immediately upgraded.

MS16-047: Windows SAM and LSAD Downgrade Vulnerability - Badlock (Network Check) (121756)

135 / tcp
msrpc

Medium

internal | **explicit** | **unauth**

```
This asset permits binding to samr pipe using auth level Connect.
Response from asset:
02 .

22 00 00 c0 "...

Responding port: 1030
```

SMB Security Signatures Not Required (104188)

445 / tcp
smb

Low

internal | **explicit** | **unauth**

SMBv1 NTLM signatures are not required
SMBv2 NTLM signatures are not required

SMB Null Session Authentication (101373)

445 / tcp
smb

Trivial

internal | **recon** | **unauth**

It was possible to log into the remote host using a NULL session.

SMB Native LanMan Version (100092)

445 / tcp
smb

Trivial

internal | **recon** | **unauth**

LAN Manager: Windows Server 2008 R2 Enterprise 6.1
Domain: WORKGROUP
OS: Windows Server 2008 R2 Enterprise 7601 Service Pack 1

ubuntu.internal.cloudapp.net

IP: 10.27.34.67
Asset name: ubuntu.internal.cloudapp.net
Operating system: Ubuntu Linux
Asset type: Server

Protocol	Service
ssh	22 / tcp
http	80 / tcp
smb	139 / tcp
unknown	N/A / tcp
unknown	N/A / icmp

Authenticated Scan Status	OS	DB	CIS	Threatscan
	Failure	N/A	Failure	N/A

Vulnerability Title	Service(s)	Severity
Samba IsKnownPipename Remote Code Execution (122062) internal | explicit | unauth	139 / tcp smb	Critical
This asset is missing the CVE-2017-7494 patch Payload: nirv32.so Share: cherlengue Physical path: /sambarepo/nirv32.so Successful Exploitation: Successfully retreived touch file		
PHP Multiple Type Confusion Denial of Service Vulnerabilities (273413) internal | potential | unauth	80 / tcp http	High
5.5.9		
Samba Remote Code Execution Vulnerability (126509) internal | potential | unauth	139 / tcp smb	High
4.3.11		
PHP 'tar.c' Stack Buffer Overflow (276915) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'incomplete_class.c' Type Confusion Denial of Service (273414) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP phar_object.c 'phar_convert_to_other' Denial of Service (275411) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'zend_exceptions.c' Type Confusion Remote Code Execution (273415) internal | potential | unauth	80 / tcp http	High
5.5.9		

PHP 'escapeshellarg' Function Remote Command Execution Vulnerability (278617) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP 'soap.c' Type Confusion Denial of Service (273411) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP SoapClient Multiple Type Confusion Denial of Service Vulnerabilities (273412) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP php_http.c 'make_http_soap_request' Remote Code Execution (276912) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
Apache httpd '2.2.32 2.4.24' Remote Segmentation Fault Vulnerability (290291) **internal | potential | unauth**	80 / tcp http	High
2.4.7		
PHP sanitizing.c 'php_filter_encode' Integer Overflow Denial of Service (279636) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
Zend NULL Pointer Denial of Service (278089) **internal | potential | unauth**	80 / tcp http	High
php 5.5.9		
PHP WDDX Extension Use-after-free Vulnerability (276916) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP xml.c 'xml_utf8_encode' Integer Overflow Denial of Service (279482) **internal | potential | unauth**	80 / tcp http	High

5.5.9		
Ruby 'Oniguruma-mod' and PHP unicode_unfold_key in 'mbstring' Buffer Overflow (289396) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'spl_ptr_heap_insert' Function Arbitrary Code Execution Vulnerability (278838) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'php_url_parse_ex' Denial of Service (277705) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP string.c 'str_pad' Denial of Service (280596) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP php_zip.c 'getFromIndex', 'getFromName' Heap Overflow (277149) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'locale_methods.c' Argument Overflow Denial of Service (283453) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'ext/phar/phar_object.c' Zero-length Uncompress Denial of Service (277155) internal | potential | unauth	80 / tcp http	High
5.5.9		
OpenSSH 'kbdint_next_device' Function Denial of Service (273895) internal | potential | unauth	22 / tcp ssh	High
6.6.1p1		

PHP CGI Component Command Execution Vulnerability (269957) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
OpenSSH 'ssh/kex.c' Denial of Service Vulnerability (126638) **internal | potential | unauth**	22 / tcp ssh	High
6.6.1p1		
OpenSSH 'ssh-agent.c' Untrusted Search Path Vulnerability (283439) **internal | potential | unauth**	22 / tcp ssh	High
6.6.1p1		
PHP wddx.c 'wddx_stack_destroy' Denial of Service Vulnerability (281194) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP ext/standard/http_fopen_wrapper.c 'php_stream_url_wrap_http_ex' Stack-based Buffer Under-read (901430) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP phar.c 'phar_parse_pharfile' Denial of Service (284034) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP 'dynamicGetbuf' Denial of Service Vulnerability (127020) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
PHP 'process_nested_data' Function Use-After-Free Flaw (270531) **internal | potential | unauth**	80 / tcp http	High
5.5.9		
OpenSSH X11 Forwarding Access Bypass (276485) **internal | potential | unauth**	22 / tcp ssh	High
6.6.1p1		

PHP bcmath.c 'bcpowmod' Negative Integer Denial of Service (277157) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP before 5.5.36 and 5.6.x before 5.6.22 'php_html_entities' Function Denial of Service (280828) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP Session Deserializer 'php_var_unserialize' Remote Code Execution (275415) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'uncompressed_filesize' Crafted PHAR Archive Denial of Service Vulnerability (281199) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'ext/spl/spl_array.c' Use-after-free Remote Code Execution (275416) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP exif.c 'exif_process_IFD_TAG' Denial of Service (277162) internal | potential | unauth	80 / tcp http	High
5.5.9		
Ruby 'Oniguruma-mod' and PHP 'mbstring' Denial of Service (289391) internal | potential | unauth	80 / tcp http	High
5.5.9		
Apache HTTP Server Security Update 2.4.51 (147293) internal | potential | unauth	80 / tcp http	High
2.4.7		
Ruby 'Oniguruma-mod' and PHP 'mbstring' parse_char_class Denial of Service (289402) internal | potential | unauth	80 / tcp http	High

5.5.9

PHP 'simplestring_addn' Denial of Service Vulnerability (127019)

internal | potential | unauth

80 / tcp
http

High

5.5.9

Apache HTTP Server 'ap_get_basic_auth_pw' Authentication Bypass (290284)

internal | potential | unauth

80 / tcp
http

High

2.4.7

PHP 'phar_parse_metadata' Function Denial of Service (272818)

internal | potential | unauth

80 / tcp
http

High

5.5.9

Apache HTTP Server Security Update 2.4.48 (145498)

internal | potential | unauth

80 / tcp
http

High

2.4.7

PHP Zend Engine 'zend_ts_hash_graceful_destroy' Function Denial of Service Flaw (269858)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP 'pcntl_exec' Implementation File Extension Restriction Bypass (272809)

internal | potential | unauth

High

5.5.9

PHP Heap-Based Buffer Over-Read Vulnerability (127909)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP soap.c 'SoapClient__call' Arbitrary Code Execution (275418)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP spl_array.c 'SPL Extension' Denial of Service (280835)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP spl_array.c SplArray Unserialization Denial of Service (281201)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP 'phar_set_inode' Function Stack Buffer Overflow (272067)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP before 5.5.36 and 5.6.x before 5.6.22 'php_escape_html_entities_ex' Function Denial of Service (280829)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP 'gd_webp.c' Denial of Service Vulnerability (127034)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP wddx.c 'php_wddx_process_data' Denial of Service Vulnerability (281190)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP File Extension Restriction Bypass (272803)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP 'Serializable Interface, SplObjectStorage class, SplDoublyLinkedList class' Multiple Use-after-free Remote Code Execution (275414)

internal | potential | unauth

80 / tcp
http

High

5.5.9

Ruby 'Oniguruma-mod' and PHP fetch_token in 'mbstring' Denial of Service (289398)

internal | potential | unauth

80 / tcp
http

High

5.5.9

PHP Phar Extension 'phar_analyze_path' Arbitrary Code Execution (277153) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP IMAP PHP Extension 'phar_fix_filepath' Function Buffer Overflow Vulnerability (275412) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP var_unserializer.re Object Deserialization Denial of Service (281197) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP 'wddx.c' XML Document Denial of Service (283454) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP SPL 'ArrayObject, SplObjectStorage, SplDoublyLinkedList' Multiple Use-after-free Remote Code Execution (275413) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP xml.c 'xml_parse_into_struct' Denial of Service (277159) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP 'php_snmp_error' Function Format String Arbitrary Code Execution (277152) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP zend_string_extend in 'Zend/zend_string.h' Denial of Service (288890) **internal | potential | unauth**	80 / tcp http	High
	5.5.9	
PHP 'ext/soap/soap.c' Type Confusion Vulnerability (272810) **internal | potential | unauth**	80 / tcp http	High

5.5.9		
PHP 'exif_process_IFD_in_TIFF' Uninitialized Read Vulnerability (128707) internal | potential | unauth	80 / tcp http	High
5.5.9		
Apache httpd '2.2.x before 2.2.33' and '2.4.x before 2.4.26' 'mod_ssl' subcomponent NULL pointer Vulnerability (290295) internal | potential | unauth	80 / tcp http	High
2.4.7		
PHP OPcache Extension '_zend_shared_memdup' Function Denial of Service Flaw (271046) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP Fileinfo Component 'apprentice_load' Denial of Service Flaw (269855) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'enchant_broker_request_dict' Function Arbitrary Code Execution (271564) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP 'ftp_genlist' Function LIST Command Buffer Overflow (273431) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP var_unserializer.c Invalid Object Denial of Service Vulnerability (281186) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP Fileinfo Component Crafted ELF File Denial of Service (271569) internal | potential | unauth	80 / tcp http	High
5.5.9		

Apache HTTP Server 2.4.53 Security Release (148390) internal | potential | unauth	80 / tcp http	High
2.4.7		
PHP exif.c 'exif_process_IFD_in_JPEG' Denial of Service (277163) internal | potential | unauth	80 / tcp http	High
5.5.9		
Fileinfo 'file_check_mem' Arbitrary Code Execution (277148) internal | potential | unauth	80 / tcp http	High
5.5.9		
PHP "phar_rename_archive" Function Denial of Service Flaw (271566) internal | potential | unauth	80 / tcp http	High
5.5.9

MS12-020 Remote Desktop Protocol Use-After-Free Vulnerability (Network Check) (104735)

internal | explicit | unauth

3389 / tcp
msrdp

High

Vulnerable to MS12-020:

```
03 00 00 0f 02 f0 80 3e 00 00 03 03 ed 03 ed .......>.......
```

Microsoft Windows XP End of Life (113789)

internal | explicit | unauth

N/A / tcp
unknown

High

Support has ended for Windows XP. This host should be immediately upgraded.

MS09-001 SMB Remote Code Execution (Network Check) (103879)

internal | explicit | unauth

445 / tcp
smb

Medium

MS09-001

MS10-012 Vulnerabilities In SMB Server Allow Remote Code Execution (Network Check) (104133)

internal | explicit | unauth

445 / tcp
smb

Medium

MS10-012 Weak NTLM Session Key Detected: (52c7c3e5f4596db4)

MS09-048 Microsoft Windows TCP/IP Remote Code Execution Vulnerabilities (104048)

internal | explicit | unauth

445 / tcp
smb

Low

MS09-048: TCP/IP DoS Detected

SMB Security Signatures Not Required (104188)

internal | explicit | unauth

445 / tcp
smb

Low

SMBv1 NTLM signatures are not required

SMB Null Session Authentication (101373)

internal | recon | unauth

445 / tcp
smb

Trivial

It was possible to log into the remote host using a NULL session.

Remote Desktop Protocol Allows Man in the Middle (117858)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

rdp5 server does not require ssl and is vulnerable to mitm attack (CVE-2005-1794)

SMB Native LanMan Version (100092)

internal | recon | unauth

445 / tcp
smb

Trivial

```
LAN Manager: Windows 2000 LAN Manager
Domain: WORKGROUP
OS: Windows 5.1
```

Microsoft RDP Network Level Authentication Disabled (128925) **internal | recon | unauth**	3389 / tcp msrdp	Trivial

NLA not enabled on target asset

internal | explicit | Threat Scan auth

Detected definition version: 2018/01/01 version 1089

Threat Scan: Windows Defender Disabled (127063) N/A / tcp Medium

internal | explicit | Threat Scan auth unknown

The Windows Defender service is not currently running.

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343) 3389 / tcp Low

internal | explicit | unauth msrdp

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1

SMB Security Signatures Not Required (104188) 445 / tcp Low

internal | explicit | unauth smb

SMBv1 NTLM signatures are not required
SMBv2 NTLM signatures are not required

Microsoft Windows Service Pack Outdated (104065) 445 / tcp Low

internal | explicit | unauth smb

Windows 7 Service Pack 1 is not installed

SMB Null Session Authentication (101373) 445 / tcp Trivial

internal | recon | unauth smb

It was possible to log into the remote host using a NULL session.

SSL Connection: Sweet32 Vulnerability (121110) 3389 / tcp Trivial

internal | explicit | unauth msrdp

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1:
DES-CBC3-SHA

Remote Desktop Protocol Allows Man in the Middle (117858) 3389 / tcp Trivial

internal | explicit | unauth msrdp

rdp5 server does not require ssl and is vulnerable to mitm attack (CVE-2005-1794)

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293) 3389 / tcp Trivial

internal | explicit | unauth msrdp

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

Weak Signature Algorithm: SHA-1

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: AES128-SHA

SMB Native LanMan Version (100092)

internal | recon | unauth

445 / tcp
smb

Trivial

LAN Manager: Windows 7 Enterprise 6.1
Domain: ATS
OS: Windows 7 Enterprise 7600

TLS Connection: TLS Version 1.0 Enabled (125641)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

Server supports TLS version 1.0

Microsoft RDP Network Level Authentication Disabled (128925)

internal | recon | unauth

3389 / tcp
msrdp

Trivial

NLA not enabled on target asset

internal | explicit | unauth

135 / tcp
msrpc

Medium

This asset permits binding to samr pipe using auth level Connect.
Response from asset:
02 .

22 00 00 c0 "...

Responding port: 49154

Threat Scan: Windows Defender Disabled (127063)

internal | explicit | Threat Scan auth

N/A / tcp
unknown

Medium

The Windows Defender service is not currently running.

Threat Scan: Antivirus Software Not Installed (126539) N/A / tcp Medium
internal | **explicit** | **Threat Scan auth** unknown

[Large data section omitted]

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343) 3389 / tcp Low
internal | **explicit** | **unauth** msrdp

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1

SMB Security Signatures Not Required (104188) 445 / tcp Low
internal | **explicit** | **unauth** smb

SMBv1 NTLM signatures are not required
SMBv2 NTLM signatures are not required

Microsoft Windows Service Pack Outdated (104065) 445 / tcp Low
internal | **explicit** | **unauth** smb

Windows 7 Service Pack 1 is not installed

SMB Null Session Authentication (101373) 445 / tcp Trivial
internal | **recon** | **unauth** smb

It was possible to log into the remote host using a NULL session.

SSL Connection: Sweet32 Vulnerability (121110) 3389 / tcp Trivial
internal | **explicit** | **unauth** msrdp

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1:
DES-CBC3-SHA

Remote Desktop Protocol Allows Man in the Middle (117858) 3389 / tcp Trivial
internal | **explicit** | **unauth** msrdp

rdp5 server does not require ssl and is vulnerable to mitm attack (CVE-2005-1794)

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293) 3389 / tcp Trivial
internal | **explicit** | **unauth** msrdp

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1

SSL Certificate: Weak Signature Algorithm SHA-1 (121119) **internal | explicit | unauth**	3389 / tcp msrdp	Trivial
Weak Signature Algorithm: SHA-1		
SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276) **internal | explicit | unauth**	3389 / tcp msrdp	Trivial
SSL connection supports the following SSLv3/TLSv1 CBC mode cipher: AES128-SHA - TLSv1 AES256-SHA - TLSv1 DES-CBC3-SHA - TLSv1 ECDHE-RSA-AES128-SHA - TLSv1 ECDHE-RSA-AES256-SHA - TLSv1 BEAST not mitigated: server ignores client order but prefers CBC mode ciphers Cipher used: AES128-SHA		
SMB Native LanMan Version (100092) **internal | recon | unauth**	445 / tcp smb	Trivial
LAN Manager: Windows 7 Enterprise 6.1 Domain: ATS OS: Windows 7 Enterprise 7600		
TLS Connection: TLS Version 1.0 Enabled (125641) **internal | explicit | unauth**	3389 / tcp msrdp	Trivial
Server supports TLS version 1.0		
Microsoft RDP Network Level Authentication Disabled (128925) **internal | recon | unauth**	3389 / tcp msrdp	Trivial
NLA not enabled on target asset

internal | explicit | OS auth unknown

Missing Microsoft Patch: MS21-JAN
Vulnerable Path: C:\Program Files (x86)\Microsoft SQL Server\120\Setup Bootstrap\SQLServer2014\x86\microsoft.sqlserver.chainer.infrastructure.dll
File Version: 12.0.6024.0
Fixed Version: 12.0.6164.21
Remediation KB(s): KB4583462,KB4583463

Threat Scan: Unsigned Software Processes (127839) N/A / tcp **Medium**
internal | explicit | Threat Scan auth unknown

[Large data section omitted]

Protocol Allows Authentication Over Clear Text (104798) 143 / tcp **Low**
internal | explicit | unauth imap

imap allows transmission of credentials in clear text

Protocol Allows Authentication Over Clear Text (104798)

internal | **explicit** | **unauth**

110 / tcp
pop3

Low

pop3 allows transmission of credentials in clear text

Protocol Allows Authentication Over Clear Text (104798)

internal | **explicit** | **unauth**

587 / tcp
smtp

Low

smtp allows transmission of credentials in clear text

Protocol Allows Authentication Over Clear Text (104798)

internal | **explicit** | **unauth**

25 / tcp
smtp

Low

smtp allows transmission of credentials in clear text

SSL Connection: Sweet32 Vulnerability (121110)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.1:
DES-CBC3-SHA

TLSv1.2:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
ECDHE-RSA-AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
AES256-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
AES128-SHA - TLSv1

BEAST not mitigated: all supported ciphers are CBC mode ciphers

Content Security Policy Missing (148043)

internal | **explicit** | **unauth**

9999 / tcp
http

Trivial

Missing Content Security Policy.

SSL Certificate: Chain Contains Weak RSA Keys (104022)

internal | **explicit** | **unauth**

8080 / tcp
http (ssl)

Trivial

Inadequate Certificate Key Size: 1024

SMB Native LanMan Version (100092)

internal | **recon** | **unauth**

139 / tcp
netbios

Trivial

LAN Manager: 10.0.22000.15
Domain: impact
OS: Windows 11 build 22000

TLS Connection: TLS Version 1.0 Enabled (125641) **internal | explicit | unauth**	3389 / tcp msrdp	Trivial

Server supports TLS version 1.0

TLS Connection: TLS Version 1.1 Enabled (145426) **internal | explicit | unauth**	3389 / tcp msrdp	Trivial

Server supports TLS version 1.1

Link Local Multicast Name Resolution (LLMNR) Enabled (129962) **internal | recon | OS auth**	N/A / tcp unknown	Trivial

LLMNR is enabled

IPv6 Enabled (142306) **internal | explicit | OS auth**	N/A / tcp unknown	Trivial

IPv6 enabled on network interfaces with the following IPv4 addresses

33.0.0.6
10.27.34.7
10.27.34.7

MS22-MAY: Microsoft .NET Security Update (148574)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Low

Missing Microsoft Patch: MS22-MAY
Vulnerable Path: C:\windows\microsoft.net\framework\v4.0.30319\system.data.dll
File Version: 4.8.4270.0
Fixed Version: 4.8.4455.0

SMB Security Signatures Not Required (104188)

internal | **explicit** | **unauth**

139 / tcp
netbios

Low

SMBv2 NTLM signatures are not required

SSL Connection: Sweet32 Vulnerability (121110)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.1:
DES-CBC3-SHA

TLSv1.2:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1
AES256-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
AES128-SHA - TLSv1

BEAST not mitigated: all supported ciphers are CBC mode ciphers

SMB Native LanMan Version (100092)

internal | **recon** | **unauth**

139 / tcp
netbios

Trivial

LAN Manager: 10.0.19041.15
Domain: acme
OS: Windows 10 Build 19041

TLS Connection: TLS Version 1.0 Enabled (125641)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

Server supports TLS version 1.0

TLS Connection: TLS Version 1.1 Enabled (145426)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

	Server supports TLS version 1.1

Link Local Multicast Name Resolution (LLMNR) Enabled (129962) **internal | recon | OS auth**	N/A / tcp unknown	Trivial
	LLMNR is enabled	
IPv6 Enabled (142306) **internal | explicit | OS auth**	N/A / tcp unknown	Trivial
	IPv6 enabled on network interfaces with the following IPv4 addresses 10.27.34.80 10.27.34.80

Windows EFSRPC NTLM Relay Vulnerability (PetitPotam) (146093) internal | explicit | unauth	445 / tcp smb	High
[Large data section omitted]		

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343)

internal | explicit | unauth

3389 / tcp
msrdp

Low

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-SHA - TLSv1
RC4-MD5 - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SMB Null Session Authentication (101373)

internal | recon | unauth

445 / tcp
smb

Trivial

It was possible to log into the remote host using a NULL session.

SMB Domain SID Disclosure (100872)

internal | explicit | unauth

445 / tcp
smb

Trivial

S-1-5-21-3985647337-4204166677-3319358195

SSL Connection: Sweet32 Vulnerability (121110)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.2:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

[Large data section omitted]

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-SHA - TLSv1
RC4-MD5 - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

This asset permits binding to samr pipe using auth level Connect. Response from asset: 02 . 22 00 00 c0 "... Responding port: 49158		

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343)

internal | explicit | unauth

3389 / tcp
msrdp

Low

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SMB Security Signatures Not Required (104188)

internal | explicit | unauth

139 / tcp
netbios

Low

SMBv1 NTLM signatures are not required
SMBv2 NTLM signatures are not required

SSL Connection: Sweet32 Vulnerability (121110)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1:
DES-CBC3-SHA

TLSv1.2:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA

Remote Desktop Protocol Allows Man in the Middle (117858)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

rdp5 server does not require ssl and is vulnerable to mitm attack (CVE-2005-1794)

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

Weak Signature Algorithm: SHA-1

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: ECDHE-RSA-AES256-SHA

TLS Connection: TLS Version 1.0 Enabled (125641)

internal | explicit | unauth

3389 / tcp
msrdp

Trivial

Server supports TLS version 1.0

SMB Native LanMan Version (100092)

Missing Microsoft Patch: MS21-NOV
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.20165
Remediation KB(s): KB5007255,KB5007247

MS15-043: Cumulative Security Update for Internet Explorer (117738)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS15-043
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17801

MS15-078: Vulnerability in Microsoft Font Driver Could Allow Remote Code Execution (118096)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS15-078
Vulnerable Path: C:\windows\system32\atmfd.dll
File Version: 5.1.2.238
Fixed Version: 5.1.2.243

MS15-018: Cumulative Security Update for Internet Explorer (117479)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS15-018
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17690

MS15-056: Cumulative Security Update for Internet Explorer (117878)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-056
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17842

MS15-009: Security Update for Internet Explorer (117381)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-009
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17631

MS15-032: Cumulative Security Update for Internet Explorer (117588)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-032
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17728

MS15-065: Security Update for Internet Explorer (118050)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-065
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17905

MS17-010: Security Update for Microsoft Windows SMB Server (121906)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: ms17-010
Vulnerable Path: C:\windows\system32\drivers\srv.sys
File Version: 6.3.9600.17238
Fixed Version: 6.3.9600.18604

MS15-021: Vulnerabilities in Adobe Font Driver Could Allow Remote Code Execution (117476)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-021
Vulnerable Path: C:\windows\system32\atmfd.dll
File Version: 5.1.2.238
Fixed Version: 5.1.2.241

MS15-080: Vulnerabilities in Microsoft Graphics Component Could Allow Remote Code Execution (118133)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-080
Vulnerable Path: C:\windows\system32\atmfd.dll
File Version: 5.1.2.238
Fixed Version: 5.1.2.245

MS15-079: Cumulative Security Update for Internet Explorer (118134)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-079
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17937

MS15-106: Cumulative Security Update for Internet Explorer (118394)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-106
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.18052

MS15-044: Vulnerabilities in Microsoft Font Drivers Could Allow Remote Code Execution (117737)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-044
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.17796

MS15-093: Security Update for Internet Explorer (118245)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-093
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.17963

MS15-124: Cumulative Security Update for Internet Explorer (118670)

N/A / tcp
unknown

High

internal | explicit | OS auth

Missing Microsoft Patch: MS15-124
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.18125

MS14-068: Vulnerability in Kerberos Could Allow Elevation of Privilege (116972)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS14-068
Vulnerable Path: C:\windows\system32\kerberos.dll
File Version: 6.3.9600.17340
Fixed Version: 6.3.9600.17423

MS21-JUL: Microsoft Windows Out-of-Band Security Update (145515)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS21-JUL
Vulnerable Path: C:\windows\system32\spoolsv.exe
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.20046
Remediation KB(s): KB5004954,KB5004958

MS16-146: Security Update for Microsoft Graphics Component (121325)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS16-146
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.18533

MS16-147: Security Update for Microsoft Uniscribe (121324)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS16-147
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.18533

MS20-SEP: Microsoft Internet Explorer Security Update (138218)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS20-SEP
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.19811
Remediation KB(s): KB4577010,KB4577066

MS16-063: Cumulative Security Update for Internet Explorer (119505)

internal | explicit | OS auth

N/A / tcp
unknown

High

Missing Microsoft Patch: MS16-063
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.18349

MS16-040: Security Update for Microsoft XML Core Services (119275) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS16-040
Vulnerable Path: C:\windows\system32\msxml3.dll
File Version: 8.110.9600.17415
Fixed Version: 8.110.9600.18258

MS16-132: Security Update for Microsoft Graphics Component (121130) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS16-132
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.18524

MS18-JUN: Microsoft Windows Security Update (125544) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS18-JUN
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.19000
Remediation KB(s): KB4284878,KB4284815

MS16-009: Cumulative Security Update for Internet Explorer (118985) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS16-009
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.18205

MS18-APR: Microsoft Internet Explorer Security Update (123954) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS18-APR
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.18978
Remediation KB(s): KB4093114,KB4092946

MS20-FEB: Microsoft Windows Security Update (132516) **internal | explicit | OS auth**	N/A / tcp unknown	High

Missing Microsoft Patch: MS20-FEB
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.19630
Remediation KB(s): KB4537821,KB4502496,KB4537803

MS21-AUG: Microsoft Internet Explorer Security Update (146092)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

High

Missing Microsoft Patch: MS21-AUG
Vulnerable Path: C:\windows\system32\mshtml.dll
File Version: 11.0.9600.17416
Fixed Version: 11.0.9600.19404
Remediation KB(s): KB5005036

MS20-SEP: Microsoft Windows Security Update (138219)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

High

Missing Microsoft Patch: MS20-SEP
Vulnerable Path: C:\windows\system32\puiobj.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.19810
Remediation KB(s): KB4577066,KB4577071

MS18-JAN: Microsoft .NET Security Update (123656)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS18-JAN
Vulnerable Path: C:\windows\microsoft.net\framework\v4.0.30319\system.servicemodel.dll
File Version: 4.0.30319.33440
Fixed Version: 4.0.30319.36427
Remediation KB(s): KB4054993,KB4054170

MS16-061: Security Update for Microsoft RPC (119356)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-061
Vulnerable Path: C:\windows\system32\ntdll.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18233

MS16-007: Security Update for Microsoft Windows to Address Remote Code Execution (118683)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-007
Vulnerable Path: C:\windows\system32\advapi32.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18155

MS16-072: Security Update for Group Policy (119500)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-072
Vulnerable Path: C:\windows\system32\gpsvc.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18339

MS15-030: Vulnerability in Remote Desktop Protocol Could Allow Denial of Service (117467)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS15-030
Vulnerable Path: C:\windows\system32\rdpudd.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17667

MS16-134: Security Update for Common Log File System Driver (121128)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-134
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.18524

MS16-080: Security Update for Microsoft Windows PDF (119492)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-080
Vulnerable Path: C:\windows\system32\glcndfilter.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18336

MS16-048: Security Update for CSRSS (119268)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-048
Vulnerable Path: C:\windows\system32\ntdll.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18258

MS16-032: Security Update for Secondary Logon to Address Elevation of Privile (119085)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-032
Vulnerable Path: C:\windows\system32\seclogon.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18230

MS16-090: Security Update for Windows Kernel-Mode Drivers (119627)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-090
Vulnerable Path: C:\windows\system32\win32k.sys
File Version: 6.3.9600.17393
Fixed Version: 6.3.9600.18377

MS16-014: Security Update for Microsoft Windows to Address Remote Code Execution (118982)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-014
Vulnerable Path: C:\windows\system32\ntdll.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18192

MS16-074: Security Update for Microsoft Graphics Component (119498)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-074
Vulnerable Path: C:\windows\system32\gdi32.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18344

MS16-060: Security Update for Windows Kernel (119357)

internal | **explicit** | **OS auth**

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-060
Vulnerable Path: C:\windows\system32\ntdll.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.18233

MS18-MAY: Microsoft .NET Security Update (124370)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS18-MAY
Vulnerable Path: C:\windows\microsoft.net\framework\v4.0.30319\system.security.dll
File Version: 4.0.30319.33440

MS16-065: Security Update for .NET Framework (119353)
internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS16-065
Vulnerable Path: C:\windows\microsoft.net\framework\v4.0.30319\system.dll
File Version: 4.0.30319.34003
Fixed Version: 4.0.30319.34293

MS15-027: Vulnerability in NETLOGON Could Allow Spoofing (117470)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS15-027
Vulnerable Path: C:\windows\system32\netlogon.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17678

MS17-022: Security Update for Microsoft XML Core Services (121894)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS17-022
Vulnerable Path: C:\windows\system32\msxml3.dll
File Version: 8.110.9600.17415
Fixed Version: 8.110.9600.18574

MS15-016: Vulnerability in Microsoft Graphics Component Could Allow Information Disclosure (117374)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS15-016
Vulnerable Path: C:\windows\system32\windowscodecs.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17631

MS15-084: Vulnerabilities in XML Core Services Could Allow Information Disclosure (118129)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS15-084
Vulnerable Path: C:\windows\system32\msxml3.dll
File Version: 8.110.9600.17415
Fixed Version: 8.110.9600.17931

MS15-029: Vulnerability in Windows Photo Decoder Component Could Allow Information Disclosure (117468)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS15-029
Vulnerable Path: C:\windows\system32\wmphoto.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17668

MS15-071: Vulnerability in Netlogon Could Allow Elevation of Privilege (118044)

N/A / tcp
unknown

Medium

internal | **explicit** | **OS auth**

Missing Microsoft Patch: MS15-071
Vulnerable Path: C:\windows\system32\netlogon.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17901

MS15-014: Vulnerability in Group Policy Could Allow Security Feature Bypass (117376)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS15-014
Vulnerable Path: C:\windows\system32\scesrv.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17552

MS17-021: Security Update for Windows DirectShow (121895)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS17-021
Vulnerable Path: C:\windows\system32\quartz.dll
File Version: 6.6.9600.17415
Fixed Version: 6.6.9600.18569

MS15-041: Vulnerability in .NET Framework Could Allow Information Disclosure (117579)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS15-041
Vulnerable Path: C:\windows\microsoft.net\framework\v4.0.30319\system.web.dll
File Version: 4.0.30319.34009
Fixed Version: 4.0.30319.34248

MS15-028: Vulnerability in Windows Task Scheduler Could Allow Security Feature Bypass (117469)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS15-028
Vulnerable Path: C:\windows\system32\ubpm.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17671

MS15-006: Vulnerability in Windows Error Reporting Could Allow Security Feature Bypass (117222)

internal | explicit | OS auth

N/A / tcp
unknown

Medium

Missing Microsoft Patch: MS15-006
Vulnerable Path: C:\windows\system32\wer.dll
File Version: 6.3.9600.17415
Fixed Version: 6.3.9600.17550

Authenticated Scan Status	OS	DB	CIS	Threatscan
	N/A	N/A	N/A	N/A

Vulnerability Title	Service(s)	Severity
MS15-034: Microsoft IIS HTTP.sys Remote Code Execution (Network Check) (117590) **internal** | **explicit** | **unauth**	80 / tcp http	High
[Large data section omitted]		
MS16-047: Windows SAM and LSAD Downgrade Vulnerability - Badlock (Network Check) (121756) **internal** | **explicit** | **unauth**	135 / tcp msrpc	Medium
This asset permits binding to samr pipe using auth level Connect. Response from asset: 02 . 22 00 00 c0 "... Responding port: 49153		
SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343) **internal** | **explicit** | **unauth**	3389 / tcp msrdp	Low

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Connection: Sweet32 Vulnerability (121110)

3389 / tcp
msrdp

Trivial

internal | explicit | unauth

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.2:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

3389 / tcp
msrdp

Trivial

internal | explicit | unauth

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

3389 / tcp
msrdp

Trivial

internal | explicit | unauth

Weak Signature Algorithm: SHA-1

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

3389 / tcp
msrdp

Trivial

internal | explicit | unauth

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: ECDHE-RSA-AES256-SHA

	N/A	N/A	N/A	N/A

Vulnerability Title	Service(s)	Severity
Microsoft Windows 7 End of Life (131864) **internal | explicit | unauth**	N/A / tcp unknown	High

Support has ended for Windows 7. This host should be immediately upgraded.

SMB Native LanMan Version (100092) **internal | recon | unauth**	139 / tcp unknown	Trivial

LAN Manager: 6.1.7600.0
Domain: MBP-MAC
OS: Windows 7 Build 7600

WIN-30QQRC10MGG D

IP: 192.168.69.104

Asset name: WIN-30QQRC10MGG
Operating system: Windows Server 2012 R2
Asset type: Server

Protocol	Service
http	80 / tcp
msrpc	135 / tcp

msrdp	3389 / tcp
winrm	5985 / tcp
http	47001 / tcp
unknown	N/A / tcp
unknown	N/A / icmp

Authenticated Scan Status	OS	DB	CIS	Threatscan
	N/A	N/A	N/A	N/A

Vulnerability Title	Service(s)	Severity
MS15-034: Microsoft IIS HTTP.sys Remote Code Execution (Network Check) (117590) **internal** | **explicit** | **unauth**	80 / tcp http	High
[Large data section omitted]		
MS16-047: Windows SAM and LSAD Downgrade Vulnerability - Badlock (Network Check) (121756) **internal** | **explicit** | **unauth**	135 / tcp msrpc	Medium

This asset permits binding to samr pipe using auth level Connect.
Response from asset:
02 .

22 00 00 c0 "...

Responding port: 49153

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343)

3389 / tcp
msrdp

Low

internal | **explicit** | **unauth**

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Connection: Sweet32 Vulnerability (121110)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.2:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

Weak Signature Algorithm: SHA-1

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: ECDHE-RSA-AES256-SHA

Compliance: Ensure 'Enable screen saver' is set to 'Enabled' (120816) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

User Configuration\Administrative Templates\Control Panel\Personalization\Enable screen saver
Result: PASS

Compliance: Ensure 'Set client connection encryption level' is set to 'Enabled: High Level' (120784) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

Expected: 3
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Network security: LDAP client signing requirements' is set to 'Negotiate signing' or higher (120612) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

Expected: >= 1
Collected: 1
Result: PASS

Compliance: Ensure 'User Account Control: Switch to the secure desktop when prompting for elevation' is set to 'Enabled' (120625) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

Expected: 1
Collected: 0
Result: FAIL

Compliance: Ensure 'Disallow Digest authentication' is set to 'Enabled' (120808) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

Expected: 0
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'MSS: (NoNameReleaseOnDemand) Allow the computer to ignore NetBIOS name release requests except from WINS servers' is set to 'Enabled' (120694) N/A / tcp Trivial
unknown
internal | **compliance** | **CIS auth**

Expected: 1
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Windows Firewall: Private: Settings: Display a notification' is set to 'No' (120640) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

Expected: 1
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'User Account Control: Behavior of the elevation prompt for standard users' is set to 'Automatically deny elevation requests' (120621) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

Expected: 0
Collected: 3
Result: FAIL

Compliance: Ensure 'Force specific screen saver: Screen saver executable name' is set to 'Enabled: scrnsave.scr' (120817) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

User Configuration\Administrative Templates\Control Panel\Personalization\Force specific screen saver: Screen saver executable name
Result: PASS

Compliance: Ensure 'Prevent enabling lock screen slide show' is set to 'Enabled' (120682) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

Expected: 1
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Hardened UNC Paths' is set to 'Enabled, with "Require Mutual Authentication" and "Require Integrity" set for all NETLOGON and SYSVOL shares' (120706) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

Computer Configuration\Policies\Administrative Templates\Network\Network Provider\Hardened UNC Paths
Result: FAIL

Compliance: Ensure 'Network security: Minimum session security for NTLM SSP based (including secure RPC) clients' is set to 'Require NTLMv2 session security, Require 128-bit encryption' (120613) N/A / tcp unknown Trivial

internal | **compliance** | **CIS auth**

Expected: 537395200
Collected: 536870912
Result: FAIL

Compliance: Ensure 'Microsoft network server: Server SPN target name validation level' is set to 'Accept if provided by client' or higher (120594)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: >= 1
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'MSS: (AutoAdminLogon) Enable Automatic Logon (not recommended)' is set to 'Disabled' (120689)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: 0
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Enumerate local users on domain-joined computers' is set to 'Disabled' (120736)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: 0
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Change the system time' is set to 'Administrators, LOCAL SERVICE' (120530)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: Administrators,LOCAL SERVICE
Collected: LOCAL SERVICE,ADMINISTRATORS
Result: PASS

Compliance: Ensure 'Enable Local Admin Password Management' is set to 'Enabled' (MS only) (120685)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: 1
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Turn off Autoplay' is set to 'Enabled: All drives' (120752)

N/A / tcp
unknown

Trivial

internal | compliance | CIS auth

Expected: 255
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Back up files and directories' is set to 'Administrators' (120529)
internal | **compliance** | **CIS auth**

N/A / tcp
unknown

Trivial

Expected: Administrators
Collected: ADMINISTRATORS,BACKUP OPERATORS
Result: FAIL

Compliance: Ensure 'Application: Specify the maximum log file size (KB)' is set to 'Enabled: 32,768 or greater' (120764)
internal | **compliance** | **CIS auth**

N/A / tcp
unknown

Trivial

Expected: >= 32768
Collected: Not Defined
Result: FAIL

Compliance: Ensure 'Replace a process level token' is set to 'LOCAL SERVICE, NETWORK SERVICE' (120554)
internal | **compliance** | **CIS auth**

```

SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343)

3389 / tcp
msrdp

Low

internal | **explicit** | **unauth**

```
Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2
```

SSL Connection: Sweet32 Vulnerability (121110)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

```
SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.2:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA
```

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

```
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2
```

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

```
Weak Signature Algorithm: SHA-1
```

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

3389 / tcp
msrdp

Trivial

internal | **explicit** | **unauth**

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: ECDHE-RSA-AES256-SHA

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | **explicit** | **unauth**

MS16-047: Windows SAM and LSAD Downgrade Vulnerability - Badlock (Network Check) (121756) **internal** | **explicit** | **unauth**	135 / tcp msrpc	Medium

```
This asset permits binding to samr pipe using auth level Connect.
Response from asset:
02 .

22 00 00 c0 "...

Responding port: 49154
```

Vulnerability Title	Service(s)	Severity
SSL Connection: Server Vulnerable to Bar Mitzvah Attack (119343) **internal** | **explicit** | **unauth**	3389 / tcp msrdp	Low

Vulnerable to Bar Mitzvah attack.
SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SMB Security Signatures Not Required (104188)

internal | **explicit** | **unauth**

139 / tcp
netbios

Low

SMBv1 NTLM signatures are not required
SMBv2 NTLM signatures are not required

SSL Connection: Sweet32 Vulnerability (121110)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack:
TLSv1.2:
DES-CBC3-SHA

TLSv1.1:
DES-CBC3-SHA

TLSv1:
DES-CBC3-SHA

SSL Certificate: Weak Signature Algorithm SHA-1 (121119)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

Weak Signature Algorithm: SHA-1

SSL Connection: SSL/TLS Supports RC4 Ciphers (113293)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSL/TLS RC4 ciphers:
RC4-MD5 - TLSv1
RC4-SHA - TLSv1
RC4-MD5 - TLSv1.1
RC4-SHA - TLSv1.1
RC4-MD5 - TLSv1.2
RC4-SHA - TLSv1.2

SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276)

internal | **explicit** | **unauth**

3389 / tcp
msrdp

Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: server ignores client order but prefers CBC mode ciphers
Cipher used: ECDHE-RSA-AES256-SHA

Compliance: Ensure 'User Account Control: Only elevate UIAccess applications that are installed in secure locations' is set to 'Enabled' (120623)

Server supports TLS version 1.1

192.168.1.1 B

IP: 192.168.1.1
Asset name: 192.168.1.1

Operating system: unknown
Asset type: Server

Protocol	Service
ssh	22 / tcp
http	80 / tcp
http (ssl)	443 / tcp
http	8000 / tcp
http	8080 / tcp
unknown	N/A / tcp
unknown	N/A / icmp

Authenticated Scan Status	OS	DB	CIS	Threatscan
	N/A	N/A	N/A	N/A

Vulnerability Title	Service(s)	Severity
SSL Certificate: Weak Signature Algorithm SHA-1 (121119) **internal** | **explicit** | **unauth**	443 / tcp http (ssl)	Trivial
Weak Signature Algorithm: SHA-1		
TLS Connection: TLS Version 1.1 Enabled (145426) **internal** | **explicit** | **unauth**	443 / tcp http (ssl)	Trivial
Server supports TLS version 1.1		

192.168.1.33 B

IP: 192.168.1.33
Asset name: 192.168.1.33
Operating system: unknown
Asset type: Device

Protocol	Service
http	80 / tcp
unknown (ssl)	443 / tcp

unknown	N/A / tcp
unknown	N/A / icmp

Authenticated Scan Status	OS	DB	CIS	Threatscan
	N/A	N/A	N/A	N/A

Vulnerability Title	Service(s)	Severity
SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276) **internal** | **explicit** | **unauth**	443 / tcp unknown (ssl)	Trivial
SSL connection supports the following SSLv3/TLSv1 CBC mode cipher: AES128-SHA - TLSv1 AES256-SHA - TLSv1 BEAST not mitigated: all supported ciphers are CBC mode ciphers		
SSL Certificate: Expired Certificate Date (103615) **internal** | **explicit** | **unauth**	443 / tcp unknown (ssl)	Trivial
Date Appears Invalid: Jun 23 15:19:13 2017 GMT to Jun 24 15:19:13 2020 GMT		
TLS Connection: TLS Version 1.0 Enabled (125641) **internal** | **explicit** | **unauth**	443 / tcp unknown (ssl)	Trivial
Server supports TLS version 1.0		
TLS Connection: TLS Version 1.1 Enabled (145426) **internal** | **explicit** | **unauth**	443 / tcp unknown (ssl)	Trivial
Server supports TLS version 1.1		

DESKTOP-FV6DPRC — B

Apache Server Header Information Disclosure (123916)

internal | recon | unauth

83 / tcp
http (ssl)

Trivial

This instance of Apache discloses version information via the HTTP Server header:
Server: Apache/2.4.6 (ClearOS) OpenSSL/1.0.2k-fips

TLS Connection: TLS Version 1.1 Enabled (145426) internal | explicit | unauth	83 / tcp http (ssl)	Trivial
Server supports TLS version 1.1		
Web Server Default Error Page Detected (128223) internal | explicit | unauth	82 / tcp http	Trivial
[Large data section omitted]		
Apache Server Header Information Disclosure (123916) internal | recon | unauth	82 / tcp http	Trivial
This instance of Apache discloses version information via the HTTP Server header: Server: Apache/2.4.6 (ClearOS) OpenSSL/1.0.2k-fips

Vulnerability Title	Service(s)	Severity
SSL Connection: Sweet32 Vulnerability (121110) **internal | explicit | unauth**	8009 / tcp unknown (ssl)	Trivial
SSL Connection Vulnerable To Sweet32 Block Cipher Collision Attack: TLSv1: DES-CBC3-SHA TLSv1.1: DES-CBC3-SHA TLSv1.2: DES-CBC3-SHA		
SSL Connection: SSLv3/TLSv1 Supports CBC Mode Ciphers (112276) **internal | explicit | unauth**	8009 / tcp unknown (ssl)	Trivial

SSL connection supports the following SSLv3/TLSv1 CBC mode cipher:
AES128-SHA - TLSv1
AES256-SHA - TLSv1
DES-CBC3-SHA - TLSv1
ECDHE-RSA-AES128-SHA - TLSv1
ECDHE-RSA-AES256-SHA - TLSv1

BEAST not mitigated: all supported ciphers are CBC mode ciphers

TLS Connection: TLS Version 1.0 Enabled (125641) **internal | explicit | unauth**	8009 / tcp unknown (ssl)	Trivial

Server supports TLS version 1.0

TLS Connection: TLS Version 1.1 Enabled (145426) **internal | explicit | unauth**	8009 / tcp unknown (ssl)	Trivial

Server supports TLS version 1.1

7 Recommendations for Improving Security

Security is an ongoing process. Implementing some relatively simple practices can improve Demo Account’s security in the long run, and reduce risks in the face of continually changing threats and dynamic network environments. Based on the vulnerabilities outlined in this report, Fortra's Digital Defense recommends that Demo Account implement the following security practices where necessary.

7.1 General Recommendations

The recommendations in this section are general practices that are an essential part of any ongoing security program. Iterating over these items on a regular basis will improve the overall security posture of any network.

7.1.1 Apply Security Patches

Software vendors produce security patches and software updates as new vulnerabilities are discovered, and normally make them available on web sites. Some vendors provide notifications when security patches are made available. Network administrators should apply these security patches as soon as they are made available to ensure their systems are as secure as possible. The administrators should also subscribe to security mailing lists and watch for new vulnerabilities of the operating systems and applications for which they are responsible.

7.1.2 Disable Unnecessary Services

Most operating systems come with a robust collection of network services installed and enabled out of the box. However, most users rely on less than a handful of these services to conduct their day-to-day business. Unused and unnecessary network services can provide an attacker with valuable information about the systems, and possibly a way around your carefully designed security architecture. If a service is not being used, disable it or limit access to it with a firewall or other software, such as TCP-wrappers. Fortra's Digital Defense can assist in deciding which services are necessary and which can be safely disabled.

7.1.3 Improve System Configuration

Many operating systems and applications can be made more secure by preforming a few simple configuration changes. These changes range from disabling default accounts or changing their passwords to disabling vulnerable features and replacing them with more secure ones. The Detailed Report has a vulnerability solution section for the discovered vulnerabilities that provides detailed instructions for necessary configuration changes. Fortra's Digital Defense can assist with these changes if you so desire.

7.1.4 Third Party Security Solutions

The security posture could be enhanced by the use of third part security solutions, such as firewalls, intrusion detection systems, strong authentication, virtual private networks, or configuration management software.

Appendix A

A.1 Report Options and Filters

The following options and filter sets were applied to the original dataset selected by this report. Filters allow the report scope to be narrowed to a selected set of assets and/or vulnerabilities to provide for more actionable data. Only those assets and vulnerabilities selected by the filter set are considered for the information presented in this report.

A.1.1 General Options

Name	Value
Show TOC Page	Yes
Show Purpose Page	Yes
Show Notes	Yes
Show Services On Asset Details	Yes
Show Sitemaps On Web App Details	No

A.1.2 Custom Filters

Name	Operator	Value

No filters applied.

Appendix B

B.1 Evaluation Process

The following paragraphs describe Frontline's vulnerability and security posture rating system.

B.1.1 Vulnerability Severity Definitions

Vulnerabilities are known or unknown defects that can be found in an asset's hardware, software, or configuration. Attackers exploit vulnerabilities to gain access or acquire information from target assets. There is a severity level associated with each vulnerability, which is based on the impact and attack would have on an asset's confidentiality, integrity, and availability.

B.1.1.1 Frontline Severity Levels

Critical	If exploited, an attacker will gain complete control of the asset. Critical-level vulnerabilities are known to have publicly accessible exploits which require little to no expert knowledge to use. In some cases, the presence of critical-level vulnerabilities indicate that the asset has already been compromised. Immediate action must be taken to resolve these vulnerabilities.
High	If exploited, an attacker could gain user or administrative access to the asset and be able to run commands, access or delete files, and launch attacks against other assets. High-level vulnerabilities often require some expert knowledge to exploit and publicly accessible exploits may not be available. These vulnerabilities should be resolved as soon as possible.
Medium	If exploited, an attacker would gain valuable information about the asset, which would aid in gaining access. In many cases, medium-level vulnerabilities are a result of improperly configured services, weak or absent security configurations, or unprotected limited access accounts. These vulnerabilities should be dealt with reasonably quickly.
Low	If exploited, an attacker could gain information about the asset but it would not necessarily lead to access. Low-level vulnerabilities can usually be addressed by applying security hardening practices or disabling services.
Trivial	If exploited, an attacker could gain information about the asset but it should not lead to access. In many cases trivial-level vulnerabilities have no possible solution due to operating system limitations, and pose a minimal risk to the asset's security.
Info	Information provided by an asset or a service that is not considered a vulnerability.

B.1.2 Asset Ratings

Each asset is assigned an asset rating based on the severity of the vulnerabilities it exhibits. These ratings are calculated by identifying the highest severity vulnerabilities on the asset, and then choosing the corresponding asset rating.

B.1.2.1 FVM Rating Levels

F	The asset has one or more critical-level vulnerabilities.
D	The asset has one or more high-level vulnerabilities.
C	The asset has one or more medium-level vulnerabilities.
B	The asset has one or more low-level vulnerabilities.
A	The asset has zero or more trivial-level vulnerabilities.

B.2 Overall Rating Definitions

The overall rating is based on the average rating values of each asset in the report.

B.2.1 Frontline's Security GPA

F	The weighted average asset Security GPA is 0.00 - 0.33.
D-	The weighted average asset Security GPA is 0.34 - 0.67.
D	The weighted average asset Security GPA is 0.68 - 1.00.
D+	The weighted average asset Security GPA is 1.01 - 1.33.
C-	The weighted average asset Security GPA is 1.34 - 1.67.
C	The weighted average asset Security GPA is 1.68 - 2.00.
C+	The weighted average asset Security GPA is 2.01 - 2.33.
B-	The weighted average asset Security GPA is 2.34 - 2.67.
B	The weighted average asset Security GPA is 2.68 - 3.00.
B+	The weighted average asset Security GPA is 3.01 - 3.33.

A-	The weighted average asset Security GPA is 3.34 - 3.67.
A	The weighted average asset Security GPA is 3.68 - 4.00.

Appendix C

C.1 Vulnerability Dictionary

The following paragraphs describe the reports vulnerabilities in detail.

Easily Guessable SSH Credentials — Critical

Solution Details

It is advised that the password of the account(s) listed in the data section be changed to something secure and complex.

Vulnerability Details

The SSH Server on the remote host has accounts configured with default or weak passwords. Attackers can easily leverage this condition to gain complete access to this host.

False Positive Notes

This item is not likely to be a false positive. However, it's possible that the credentials are valid but yield no usable shell access. The scanner is looking at the response from the SSH service that indicates the credentials are valid, it does not validate that a usable shell is available. This is done because the check needs to work on a wide variety of devices that run many different shells with no consistent functionality to use to validate access.

If it is determined that no usable functionality is accessible using the detected credentials, and it's not possible to change them or disable the service, this can be marked as a false positive.

CVSS Base Score: 7.5

Emerson Avocent Default SSH Credentials — Critical

Solution Details

Change the default password for the "admin" account to something complex, preferably alphanumeric with special characters.

Vulnerability Details

This asset appears to be an Emerson Avocent device that is using the default credentials of admin/avocent.
Impact:
An attacker would be able to remotely administer this device utilizing the default credentials.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

Type	Reference
There are no references for this vulnerability.	

HTTP Easily Guessable Credentials — Critical

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

It is advised that the password of the account(s) listed in the data section be changed to something secure and complex.

Vulnerability Details

The web application on this host has accounts configured with default or weak passwords. Attackers can easily leverage this condition to gain complete access to the web application.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

Type	Reference
There are no references for this vulnerability.	

MS08-067 Microsoft Windows Server Service Stack Overflow (Network Check) — Critical

Solution Details

Hosts connected to the Internet should have a minimal number of ports exposed. Microsoft has released a security bulletin to address this issue. Please obtain and apply the appropriate upgrade as described in the MS08-067 Security Bulletin linked in the References List of the vulnerability details.

Workarounds include;
Disabling the Computer Browser and Server service, but services dependent on the Computer Browser service may log an error message in the system event log. If the Server service is disabled, files or printers cannot be shared from this host, but file shares and printer resources on other hosts will still be available.
Hosts running Windows Vista and Windows Server 2008 can be configured to selectively filter RPC Universally Unique Identifiers (UUID).
Blocking TCP ports 139 and 445 at the firewall will help protect hosts located behind the firewall. It is recommended that all unsolicited inbound communication from the Internet be blocked.

Vulnerability Details

This host is running a version of Windows vulnerable to a code execution flaw within the Microsoft Windows Server Service. The netapi32.dll 'NetrpPathCanonicalize' function contains a stack overflow flaw. Remote attackers can leverage this flaw using a crafted RPC request through Windows SMB/DCERPC to trigger a buffer overflow and execute arbitrary code with SYSTEM privileges, or cause a denial of service. This vulnerability is being actively exploited in the wild (including trojan Gimmiv and NAVI worm).

Note: On some operating systems Windows Update will report MS12-054 as the preferred patch for this vector. Installing that patch will remediate this issue as well.

False Positive Notes

This item is not a false positive. Appropriate remediation is required.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

MS09-050 Microsoft Windows SMB2 Command Execution Vulnerabilities (Network Check)

Critical

Solution Details

Microsoft has released updates to address this issue. If automatic updating is not enabled, please obtain the appropriate update from the Microsoft Update service, linked in the References List of the vulnerability details. Alternatively, several workarounds are available: either restrict access to TCP ports 139 and 445, or disable SMB v2.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

This host is running Microsoft Windows. The SMB2 protocol implementation in the srv2.sys kernel driver contains an array indexing error. Additionally, a flaw exists in the processing of SMBv2 packets and SMB command values. An attacker can leverage a specifically crafted SMB or SMBv2 packet to dereference out-of-bounds memory or trigger in an infinite loop, both resulting in an arbitrary code execution. Failed exploits will result in a DoS condition.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

MS17-010: SMB Remote Code Execution Vulnerability (Network Check) — Critical

Solution Details

Microsoft originally released a fix for these flaws in their March 2017 Quality Update. If this asset is running a supported operating system, please download and install the most recent month's rollup update from the Microsoft Update Catalog or run Windows Update on the affected asset.

If this asset is running Windows XP, Windows Server 2003 or Windows 8, which are no longer supported by Microsoft, Microsoft released patches for these operating systems in the wake of the "WannaCrypt" ransomware attack. The patches for these versions of Windows can be downloaded from the links included in Microsoft's blog post about the "WannaCrypt" ransomware attack, which is linked in the external references section of this vulnerability description. Alternatively, they can be downloaded from the Microsoft Update Catalog link, which is also in the external references section of this vulnerability description.
Workarounds:
If applying the update is not feasible, the risk can be mitigated by disabling the affected service.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

This asset is missing the MS17-010 patch, which addresses multiple security vulnerabilities, including remotely exploitable SMB vulnerabilities. Additionally, this patch fixes the vulnerabilities used by the "EternalBlue", "EternalChampion", "EternalRomance", and "EternalSynergy" exploits that were leaked by the Shadow Brokers.
Impact:
A remote, unauthenticated attacker could leverage these vulnerabilities to gain privileged access to this asset. Exploits for these vulnerabilities are publicly available.

CVSS Base Score: 9.3

MS19-MAY: Microsoft RDP 'BlueKeep' Unauthenticated Remote Code Execution (Network Check) — Critical

Solution Details

Microsoft has released an update to address this vulnerability.

Depending on your operating system, this update may need to be obtained and installed manually from the vendors website.

Note:
It's been observed that in some cases the Microsoft patch doesn't appear to fully apply to remediate the vulnerability. Please verify your version of \windows\system32\drivers\termdd.sys against the version in the File Information section of the appropriate Microsoft KB article that matches your version of Windows.

List of relevant KBs can be found via the External References section from microsoft.com.
Workarounds:
This vulnerability can be mitigated, to a degree, by enabling Network Level Authentication (NLA), however, the affected asset would still be vulnerable to attackers who possess valid credentials.

Disabling RDP completely mitigates this vulnerability.

Vulnerability Details

A vulnerability affecting multiple versions of Windows exists in Microsoft Remote Desktop Services (Terminal Services), which would allow a remote, unauthenticated attacker to leverage a heap corruption, by sending specially crafted packets, to execute arbitrary code, or create a Denial of Service (DoS) condition.
Impact:
A remote, unauthenticated attacker could leverage this vulnerability to execute arbitrary code in kernel address space, effectively gaining SYSTEM level privileges, or cause a Denial of Service condition.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 9.8

Samba IsKnownPipename Remote Code Execution — Critical

Solution Details

Update to the latest version of Samba, or apply patches provided by the vendor.
Caveats:
Disabling NT pipe support in Samba can result in degraded functionality for Windows clients.
Workarounds:
If updating and patching are not feasible, the following workaround can be used to mitigate this vulnerability:

Add the following line to the [global] section of the smb.conf Samba configuration file

nt pipe support = no

Vulnerability Details

Samba versions 3.5.0 through 4.6.4/4.5.10/4.4.14, excluding versions in between the last three, are vulnerable to a remote code execution vulnerability resulting from the loading of untrusted libraries during a named pipe connection.
Impact:
A remote, authenticated attacker, or an unauthenticated attacker in cases where an anonymous share contains a writeable directory, can leverage this vulnerability by uploading a payload packaged as an elf so library to a writeable share, and establishing a named pipe connection to the path of the payload, causing Samba to execute the library. Successful exploitation of this vulnerability would result in a complete compromise of the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 10

SSL Connection: Server Vulnerable to Heartbleed Attack — Critical

Solution Details

OpenSSL has been patched to remediate this vulnerability. Contact the vendor of the affected service, or visit the OpenSSL website, as referenced in this vulnerability, for more information on applying the patch.

The following briefly describes how to identify the vulnerable service by the port Heartbleed triggered on:

On Windows (requires Administrator privileges):
1) From a Command Prompt run: netstat -nao
2) Open the Task Manager and go to the Processes tab. Ensure the PID column is displayed, if not, go to View, Select Columns, check the box next to PID, click OK.
3) Identify the port Heartbleed triggered on in the “netstat” output and match the PID to the PID in the Task Manager.
4) The vulnerable service will be under the “Image Name” column.

-OR-

1) Download the Windows Sysinternals tool TCPView. There is a link to this tool in the External References section of this vulnerability.
2) Run it. Find the port Heartbleed triggered on and the vulnerable software will be listed under the “Process” column.

Note: On Windows, the vulnerable service will be software that was bundled with a vulnerable version of the OpenSSL library.

On Linux/Unix (requires root):
1) Run the following command: netstat -nap
2) Note the PID associated with the port that Heartbleed triggered on.
3) Run the following command, where “PID” is replaced by the PID identified in step 2: lsof | grep PID
4) Match the PID from the “netstat” output to the PID from the “lsof” output, PID is in the second column. The vulnerable service will be in the first column.

Note: On Linux/Unix it's probable that the version of OpenSSL installed on the host needs to be updated, it is also possible that a vulnerable version of OpenSSL was bundled with the identified software. Run the following to identify the version of openssl installed on the host: openssl version

Vulnerability Details

This host is vulnerable to the OpenSSL Heartbleed vulnerability. The version of the OpenSSL library on this host does not properly handle requests using the Heartbeat Extension, allowing remote attackers to harvest sensitive data from process memory. A remote unauthenticated attacker can send specially crafted Heartbeat packets to trigger a buffer over-read. OpenSSL version 1.0.1 through 1.0.1f (inclusive) is vulnerable to Heartbleed.
Impact:
An attacker can use this flaw to compromise the secret keys used to encrypt the data and communication of the affected service. Also an attacker can compromise the credentials used in the services protected by OpenSSL. With respect to the sensitivity of the data being protected, this flaw can result in a full host compromise as well as the loss of integrity of other hosts and services on the network.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 5

Threat Detected: Trojan Variant **Critical**

Solution Details

The most thorough method of cleaning up a malware infection is to wipe the hard disk of the affected machine and then perform a fresh installation of the operating system. Alternately if your antivirus vendor confirms support for cleaning of the particular variant listed in the data section, you may install an updated version of this software on the affected system and allow it to attempt to clean up the infection.

Some malicious software is able to interfere with or resist the cleanup process and in the event this happens, the best course of action is to wipe the system and perform a fresh installation.

Incident Response Checklist

1. Disconnect the computer from the network but do not turn it off. This will prevent the malicious software from propagating within your network while at the same time leaving logs and other evidence

untouched.
2. Enact your incident response program to ensure that all of the appropriate parties are aware of the incident.
3. Keep a detailed log of activities marking the date and time that any action is taken on the infected host(s).
4. Backup all files on the computer (documents, spreadsheets, etc.).
5. Determine if you will be conducting any type of forensics activity with the host.
a. If yes, engage your internal security team or external security partner so that they may conduct an investigation on the computer.
b. If no, attempt to clean in the infection with anti-virus or anti-malware software.
6. If a forensics engagement is put in place, ensure that the chain of custody of the host is maintained as to ensure that findings can be entered as evidence should the perpetrator be apprehended and court proceedings enacted.
7. To ensure that no other systems are impacted a corporate wide sweep with anti-virus and/or anti-malware should be started.
8. If any other hosts are found to be impacted use the same process as with the first infected host.
9. It should be noted that any files on the impacted system should be considered suspect and as such should be used with extreme caution.
10. If the impacted host cannot be cleaned, and there is no planned forensics analysis, the host should be wiped and reformatted. Once this done, it can be placed back into service.

Disclaimer: The steps above are general best practices and should not take the place of your formal incident response program if one is in place.

Vulnerability Details

This system appears to show evidence of having a malicious trojan horse variant installed.

Trojan horse software is any malicious computer program which misleads users of its true intent. Trojans are generally spread by some form of social engineering, for example where a user is duped into executing an e-mail attachment disguised to be unsuspicious, (e.g., a routine form to be filled in), or by clicking on some fake advertisement on social media or anywhere else

Please see the data section for specifics on the evidence for this finding and links on additional information for this variant.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 10

Unix Server Common Password — Critical

Vulnerability Details

This host has one or more common username and password combinations that were detected.
Impact:
An attacker with knowledge of these common accounts could abuse them to log in to the host remotely and gain access to potentially sensitive information. Furthermore, it may be possible to take complete control of this host and make system changes that were not intended.

Solution Details

Please configure a strong, unique password for each account listed in the data section of this vulnerability. If possible, switch from TELNET to the Secure Shell (SSH) protocol for remotely accessing this host.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 4.6

CVSS Vector: AV:L/AC:L/Au:N/C:P/I:P/A:P

Apache Chunked Encoding Buffer Overflow — High

Solution Details

Upgrade to the latest version of Apache available from vendor's website provided in the References section of this vulnerability. All versions up to and including 1.3.24 and 2.0.36 are vulnerable, for the 1.x and 2.x series, respectively. If it is not feasible to manually upgrade Apache due to the fact that the Apache web server was installed with another software package, then it is strongly advised that the vendor of the software package be contacted in order to obtain specific remediation instructions.

Vulnerability Details

This host is running Apache web server. Apache 1.3 through 1.3.24 and Apache 2.0 through 2.0.36 contain a remote buffer overflow flaw. An attacker can leverage this flaw by sending an invalid 'Chunked' encoded request to execute arbitrary commands or cause a DoS condition.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 7.5

Apache httpd '2.2.32 2.4.24' Remote Segmentation Fault Vulnerability

High

Solution Details

Please refer to the External References section for links to supplemental vulnerability information and remediation details.

Vulnerability Details

The HTTP strict parsing changes added in Apache httpd 2.2.32 and 2.4.24 introduced a bug in token list parsing, which allows ap_find_token() to search past the end of its input string. By maliciously crafting a sequence of request headers, an attacker may be able to cause a segmentation fault, or to force ap_find_token() to return an incorrect value.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Apache httpd '2.2.x before 2.2.33 and 2.4.x before 2.4.26' 'mod_mime' subcomponent Remote Read Vulnerability

High

Solution Details

Please refer to the External References section for links to supplemental vulnerability information and remediation details.

Vulnerability Details

In Apache httpd 2.2.x before 2.2.33 and 2.4.x before 2.4.26, mod_mime can read one byte past the end of a buffer when sending a malicious Content-Type response header.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Apache httpd '2.2.x before 2.2.33' and '2.4.x before 2.4.26' 'mod_ssl' subcomponent NULL pointer Vulnerability

High

Vulnerability Details

In Apache httpd 2.2.x before 2.2.33 and 2.4.x before 2.4.26, mod_ssl may dereference a NULL pointer when third-party modules call ap_hook_process_connection() during an HTTP request to an HTTPS port.

Apache HTTP Server 2.4.53 Security Release — High

Solution Details

Refer to the External References for a link to upgrade to the most recent stable version of Apache HTTP Server.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Affected versions of Apache HTTP Server allow a carefully crafted request body to read to a random memory area causing system crash, close inbound connections, and integer overflow causing out of bounds write. The affected versions are 2.4.52 and earlier.

CVSS Base Score: 7.5

Apache HTTP Server Internal Data Buffering Denial of Service Vulnerability — High

Solution Details

Refer to the External References for a link to upgrade to the most recent stable version of Apache HTTP Server.

Vulnerability Details

A malicious client could perform a DoS attack by flooding a connection with requests and basically never reading responses on the TCP connection. Depending on h2 worker dimensioning, it was possible to block those with relatively few connections.
Impact:
An attacker can exploit this vulnerability to cause a denial-of-service condition, denying service to legitimate users.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 7.8

CVSS Vector: AV:N/AC:L/Au:N/C:N/I:N/A:C

Apache HTTP Server 'mod_proxy_ftp' Uninitialized Memory Usage Vulnerability — High

Vulnerability Details

Module 'mod_proxy_ftp' may use uninitialized memory when proxying to a malicious FTP server.
Impact:

An attacker could leverage this vulnerability to obtain sensitive information in the context of the affected asset.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Refer to the External References for a link to upgrade to the most recent stable version of Apache HTTP Server.

CVSS Base Score: 5

Apache HTTP Server 'Module Scripts' Privilege Escalation Vulnerability

High

Solution Details

Refer to the External References for a link to upgrade to the most recent stable version of Apache HTTP Server.

Vulnerability Details

In Apache HTTP Server 2.4 releases 2.4.17 to 2.4.38, with MPM event, worker or prefork, code executing in less-privileged child processes or threads (including scripts executed by an in-process scripting interpreter) could execute arbitrary code with the privileges of the parent process (usually root) by manipulating the scoreboard. Non-Unix systems are not affected.
Impact:
Attackers can exploit this issue to elevate their privilege level and execute arbitrary code in the context of the affected asset, possibly leading to a complete compromise of the asset.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Apache HTTP Server Security Update 2.4.48 High

Solution Details

Refer to the External References for a link to upgrade to the most recent stable version of Apache HTTP Server.

Vulnerability Details

Apache HTTP Server's mod_proxy_wstunnel, mod_proxy_http, and mod_auth_digest have vulnerabilities that can range from Denial-of-Service to Stack/heap overflows.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Apache HTTP Server Security Update 2.4.51 High

Solution Details

Please upgrade to the latest version.

Vulnerability Details

A crafted URI sent to httpd configured as a forward proxy (ProxyRequests on) can cause a crash (NULL pointer dereference) or, for configurations mixing forward and reverse proxy declarations, can allow for requests to be directed to a declared Unix Domain Socket endpoint (Server Side Request Forgery). Also, A carefully crafted request body can cause a buffer overflow in the mod_lua multipart parser (r:parsebody() called from Lua scripts).

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Apache Tomcat "Ghostcat" AJP Local File Inclusion and RCE — High

Solution Details

Apache Tomcat developers have released Tomcat versions 7.0.100, 8.5.51, and 9.0.31, which include changes to the default server.xml configuration file which disable the AJP connector by default. It should be noted that reenabling the connector without ensuring other configuration changes are made may result in the asset becoming vulnerable again.

If the AJP connector is not required, ensure it is disabled.

If the AJP connector is required, and is not run on a trusted network, ensure that the secretRequired directive is set in its definition in the server.xml file.

Vulnerability Details

The Apache Tomcat AJP connector may permit remote, unauthenticated attackers to obtain arbitrary files from the web directory of an affected Tomcat instance. Additionally, JSP files will be executed, which if combined with the ability to upload a file to the server, may result in remote code execution.

The AJP connector is enabled by default and listens on all interfaces on Apache Tomcat versions 7.0.0-7.0.99, 8.5.0-8.5.50, and 9.0.0-9.0.30.
Impact:
A remote, unauthenticated attacker may be able to leverage this vulnerability to retrieve arbitrary files from the affected Tomcat instance's web directory, including configuration files.

If the attacker also possesses the ability to upload files to the affected Tomcat instance, and the files are stored within the web directory, it may be possible for a remote, unauthenticated attacker to execute arbitrary code with the privileges of the affected Tomcat instance.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 7.5

CVSS Vector: AV:N/AC:L/Au:N/C:P/I:P/A:P

Apache Win32 Directory Traversal High

Vulnerability Details

This host is running Apache. Apache 2.0 - 2.0.39 on Windows, OS2, and Netware contains a directory traversal flaw. Remote attackers can leverage a URI containing "..\" or "../" character sequences to access host files and execute arbitrary commands.

False Positive Notes

This item may be a false positive under certain conditions or if a backported solution has been applied. Please validate and document remediation efforts through Active View.

Solution Details

Please update to the most recent version of Apache from the vendor linked in the References List of the vulnerability details.

CVSS Base Score: 7.5

CVSS Vector: AV:N/AC:L/Au:N/C:P/I:P/A:P

Easily Guessable MySQL Credentials High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Please reconfigure this host to use a unique username and a secure password for each authorized user. Passwords should be of sufficient length and complexity as specified in the organization's password policy.

Vulnerability Details

This host is running a MySQL instance configured to use an easily guessable username and password combination. An attacker can leverage this configuration to gain access to this host.

Impact:
An attacker can leverage this vulnerability to harvest sensitive data from the database. An attacker can also potentially execute arbitrary commands, which would yield a full compromise of the host.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

Type	Reference
URL	http://dev.mysql.com/doc/refman/5.0/en/set-password.html

Easily Guessable Telnet Credentials — High

Solution Details

Ensure that all accounts are using complex and hard to guess passwords.

Vulnerability Details

This host is running a telnet server that contains user accounts with easily guessable credentials.
Impact:
An attacker can leverage this flaw to remotely manage this host and possibly gain sensitive information. The scope of a compromise by an attacker depends heavily on the user account permissions. Limited access user accounts will have less ability to gain access to restricted files and should have less control over the remote host. If the user account is an administrative account, an attacker could take complete control of this host and its content.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 10

CVSS Vector: AV:N/AC:L/Au:N/C:C/I:C/A:C

Fileinfo 'file_check_mem' Arbitrary Code Execution — High

Solution Details

Please refer to the External References section for links to supplemental vulnerability information and remediation details.

Vulnerability Details

The file_check_mem function in funcs.c in file before 5.23, as used in the Fileinfo component in PHP before 5.5.34, 5.6.x before 5.6.20, and 7.x before 7.0.5, mishandles continuation-level jumps, which allows context-dependent attackers to cause a denial of service (buffer overflow and application crash) or possibly execute arbitrary code via a crafted magic file.

False Positive Notes

This item is a heuristic check and may be a false positive. Please validate and document remediation efforts through Active View.

Microsoft Edge (Chromium): Multiple Vulnerabilities in Versions Less Than 100.0.1185.29 — High

Solution Details

To manually update Microsoft Edge (Chromium) to the latest version do the following:

a) Click the menu button (looks like three horizontal dots) on the right-hand corner of the Edge browser window.
b) Scroll down to 'Help & Feedback'.
c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 100.0.1185.29. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the

100.0.1185.29 update to correct these issues.

Please see the CVE's linked in the references list for more information.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 101.0.1210.32. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the 101.0.1210.32 update to correct these issues.

Please see the CVE's linked in the references list for more information.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Microsoft Edge (Chromium): Multiple Vulnerabilities in Versions Less Than 101.0.1210.47

High

Solution Details

To manually update Microsoft Edge (Chromium) to the latest version do the following:

a) Click the menu button (looks like three horizontal dots) on the right-hand corner of the Edge browser window.
b) Scroll down to 'Help & Feedback'.
c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 101.0.1210.47. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the 101.0.1210.47 update to correct these issues.

To manually update Microsoft Edge (Chromium) to the latest version do the following:

a) Click the menu button (looks like three horizontal dots) on the right-hand corner of the Edge browser window.
b) Scroll down to 'Help & Feedback'.
c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 94.0.992.38. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the 94.0.992.38 update to correct these issues.

Please see the CVE's linked in the references list for more information.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Microsoft Edge (Chromium): Multiple Vulnerabilities in Versions Less Than 95.0.1020.40 High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

To manually update Microsoft Edge (Chromium) to the latest version do the following:

a) Click the menu button (looks like three horizontal dots) on the right-hand corner of the Edge browser window.
b) Scroll down to 'Help & Feedback'.
c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 95.0.1020.40. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the 95.0.1020.40 update to correct these issues.

Please see the CVE's linked in the references list for more information.

To manually update Microsoft Edge (Chromium) to the latest version do the following:

a) Click the menu button (looks like three horizontal dots) on the right-hand corner of the Edge browser window.
b) Scroll down to 'Help & Feedback'.
c) Click on 'About Microsoft Edge'.

Vulnerability Details

Microsoft Edge (Chromium) is affected by multiple vulnerabilities in versions less than 98.0.1108.50. These flaws include both denial of service, and memory corruption flaws that could allow a remote attacker to run arbitrary code within the context of the browser. Microsoft has released the 98.0.1108.50 update to correct these issues.

Please see the CVE's linked in the references list for more information.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Microsoft Windows XP End of Life — High

Solution Details

If this host is required for production, please upgrade the operating system and ensure it is fully patched.

Vulnerability Details

This host is running a version of Microsoft Windows which is no longer supported by Microsoft. Vulnerabilities associated with this version of Windows cannot be guaranteed to be patched by Microsoft. This outdated operating system could be leveraged to compromise the host or to assist in other attacks.

Impact:
Unsupported versions of Microsoft Windows will no longer get updates from Microsoft. As such, this OS can be susceptible to vulnerabilities identified in other versions of Windows without any chance of being remediated.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS12-020 Remote Desktop Protocol Use-After-Free Vulnerability (Network Check) — High

Solution Details

Microsoft has released patch MS12-020 to address the issue. MS12-020 covers two separate issues related to the Remote Desktop Protocol (RDP) service. This vulnerability description pertains to the issue covered by KB2621440.

Due to the fact that the affected code resides in a kernel driver of the Microsoft Windows operating system, application of the patch requires a reboot of the affected system.

Note: On June 12, 2012, KB2621440 was replaced by KB2685939 (MS12-036). Microsoft Automatic Updates and Microsoft Baseline Security Analyzer will show that the vulnerable system is missing security update MS12-036 instead of MS12-020.
Workarounds:
Microsoft has suggested that Network Level Authentication is a sufficient workaround for mitigating the flaw described in CVE-2012-0002. This does not prevent an attacker from exploiting the issue, but provides a higher barrier to entry in that the attacker must provide some level of authentication prior to exploiting the vulnerability. The Network Level Authentication feature of the Remote Desktop Services implementation is available on Microsoft Windows Vista and later.

The secondary issue, which is described by CVE-2012-0152, will not be mitigated by enabling Network Level Authentication.

If the Remote Desktop Services is not necessary, disabling the service is a valid workaround.

Vulnerability Details

The Remote Desktop Services installation on the remote host contains a use-after-free vulnerability which can allow a remote unauthenticated attacker to execute arbitrary code under the context of the kernel driver. Failed exploit attempts will cause a denial of service condition on the affected host.

The use-after-free vulnerability occurs when the 'maxChannelIds' field of the T.125 ConnectMCSPDU packet has a value which is exceeded by the number of channels that are requested in the subsequent GCC Conference Create packet. Requesting a number of channels which exceeds the value in the maxChannelIds field will cause the processing code to abort the connection and will trigger a code sequence which attempts to execute data based on a pointer which has previously been freed.

While exploiting this issue to execute controlled code is difficult, triggering the denial of service condition is trivial.
Impact:
An attacker who successfully exploits the use-after-free vulnerability will gain arbitrary code execution on the remote host under the context of the kernel driver. Failed attempts will result in a denial of service condition which will likely be exhibited by a blue screen.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS13-098: Vulnerability in Windows Could Allow Remote Code Execution - Registry Entry Not Set

High

Solution Details

Confirm that the following registry keys are set to 1 (one):
For 32-bit versions of Microsoft Windows:
HKEY_LOCAL_MACHINE\Software\Microsoft\Cryptography\Wintrust\Config
EnableCertPaddingCheck = 1 (DWORD)

For 64-bit versions of Microsoft Windows:
HKEY_LOCAL_MACHINE\Software\Microsoft\Cryptography\Wintrust\Config
EnableCertPaddingCheck = 1 (DWORD)

HKEY_LOCAL_MACHINE\Software\Wow6432Node\Microsoft\Cryptography\Wintrust\Config
EnableCertPaddingCheck = 1 (DWORD)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

This security update resolves a privately reported vulnerability in Microsoft Windows. The vulnerability could allow remote code execution if user or application runs or installs a specially crafted, signed portable executable (PE) file on an affected system.

The Microsoft patch for this vulnerability has been installed, but registry values have not been set that are required to fully remediate the vulnerability.
Impact:

An attacker who successfully exploited this vulnerability could run arbitrary code with SYSTEM privileges. An attacker could then install programs; view, change, or delete data; or create new accounts with full user rights.

MS14-068: Vulnerability in Kerberos Could Allow Elevation of Privilege

High

Solution Details

Microsoft has released a fix for this flaw in their 'MS14-068' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine. This patch does not require a reboot.

Vulnerability Details

This security update resolves a privately reported vulnerability in Microsoft Windows Kerberos KDC that could allow an attacker to elevate unprivileged domain user account privileges to those of the domain administrator account. An attacker could use these elevated privileges to compromise any computer in the domain, including domain controllers. An attacker must have valid domain credentials to exploit this vulnerability. The affected component is available remotely to users who have standard user accounts with domain credentials; this is not the case for users with local account credentials only. When this security bulletin was issued, Microsoft was aware of limited, targeted attacks that attempt to exploit this vulnerability.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS14-068'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7
- Windows 8
- Windows 8.1
- Windows Server 2008
- Windows Server 2008 R2

- Windows Server 2012
- Windows Server 2012 (Server Core installation)
- Windows Server 2012 R2
- Windows Server 2012 R2 (server core installation)
- Windows Vista
- Windows Vista x64 Edition

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS15-009: Security Update for Internet Explorer — High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker with unprivileged access to the affected component to leverage input validation flaws to upgrade their privileges to that of a privileged user

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-009'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2

- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-009' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine. This patch does not require a reboot.

MS15-010: Vulnerabilities in Windows Kernel-Mode Driver Could Allow Remote Code Execution

High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow a remote attacker to leverage malformed input to the affected component to execute arbitrary code with the privileges of the running process.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-010'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 (Server Core installation)
- Windows Server 2012 R2
- Windows Server 2012 R2 (server core installation)
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-010' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine. This patch does not require a reboot.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS15-018: Cumulative Security Update for Internet Explorer High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker with unprivileged access to the affected component to leverage input validation flaws to upgrade their privileges to that of a privileged user

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-018'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-018' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine. This patch does not require a reboot.

MS15-043: Cumulative Security Update for Internet Explorer High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-043' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker sending malformed input to the affected service to knock it offline, denying service to legitimate users.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-043'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7

MS15-056: Cumulative Security Update for Internet Explorer — High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker sending malformed input to the affected service to force it to disclose sensitive information not normally available.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-056'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-056' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

False Positive Notes

MS15-065: Security Update for Internet Explorer — High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker with unprivileged access to the affected component to leverage input validation flaws to upgrade their privileges to that of a privileged user

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-065'.

Affected Products Are:
- Microsoft Windows Server 2003
- Microsoft Windows Server 2003 x64 Edition

- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-065' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS15-080: Vulnerabilities in Microsoft Graphics Component Could Allow Remote Code Execution

High

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-080' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow a remote attacker to leverage malformed input to the affected component to execute arbitrary code with the privileges of the running process.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-080'.

Affected Products Are:
- Microsoft Live Meeting 2007 Console
- Microsoft Lync 2010 (32-bit)
- Microsoft Lync 2010 (64-bit)
- Microsoft Lync 2010 Attendee (admin level install)
- Microsoft Lync 2010 Attendee (user level install)
- Microsoft Lync 2013
- Microsoft Lync Basic 2013
- Microsoft Office 2007
- Microsoft Office 2010
- Microsoft Silverlight 5 Developer Runtime when installed on Apple Mac OS (Intel-based)
- Microsoft Silverlight 5 Developer Runtime when installed on Microsoft Windows (32-bit)
- Microsoft Silverlight 5 Developer Runtime when installed on Microsoft Windows (x64-based)
- Microsoft Silverlight 5 when installed on Apple Mac OS (Intel-based)
- Microsoft Silverlight 5 when installed on Microsoft Windows (32-bit)

MS15-124: Cumulative Security Update for Internet Explorer — High

Solution Details

Microsoft has released a fix for this flaw in their 'MS15-124' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker sending malformed input to the affected service to force it to disclose sensitive information not normally available.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS15-124'.

Affected Products Are:
- Windows 10
- Windows 10 Version 1511
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS16-001: Cumulative Security Update for Internet Explorer High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker with unprivileged access to the affected component to leverage input validation flaws to upgrade their privileges to that of a privileged user

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS16-001'.

Affected Products Are:
- Windows 10
- Windows 10 Version 1511
- Windows 7
- Windows 8
- Windows 8.1
- Windows RT
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their 'MS16-001' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS16-063: Cumulative Security Update for Internet Explorer — High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their 'MS16-063' update. Please download and install the patch from Microsoft Technet or run Windows Update on the affected machine.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow an attacker with unprivileged access to the affected component to leverage input validation flaws to upgrade their privileges to that of a privileged user

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS16-063'.

Affected Products Are:
- Windows 10
- Windows 10 Version 1511
- Windows 7
- Windows 8.1
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Vista
- Windows Vista x64 Edition

MS16-087: Security Update for Windows Print Spooler Components — High

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow a remote attacker to leverage malformed input to the affected component to execute arbitrary code with the privileges of the running process.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS16-087'.

Affected Products Are:
- Windows 10
- Windows 10 Version 1511
- Windows 7
- Windows 8.1
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2

MS16-146: Security Update for Microsoft Graphics Component High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

The remote Windows host is affected by a 'Remote Code Execution' flaw which could compromise its security posture.

The vulnerability in question could allow a remote attacker to leverage malformed input to the affected component to execute arbitrary code with the privileges of the running process.

Microsoft has rated this flaw 'Critical' and released a fix for this in Microsoft Security Bulletin 'MS16-146'.

Affected Products Are:
- Windows 10
- Windows 10 Version 1511
- Windows 10 Version 1607
- Windows 7
- Windows 8.1
- Windows RT 8.1
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 (Server Core installation)
- Windows Server 2012 R2

- Windows Server 2012 R2 (server core installation)
- Windows Server 2016
- Windows Vista
- Windows Vista x64 Edition

Solution Details

Microsoft has released a fix for this flaw in their December 2016 Quality Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

CVSS Base Score: 8.8

MS17-APR: Microsoft Internet Explorer Security Update | High

Solution Details

Microsoft has released a fix for this flaw in their April 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-0210 - Internet Explorer Elevation of Privilege Vulnerability
CVE-2017-0202 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-0201 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows Server 2016 (Server Core installation)
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Vista x64 Edition Service Pack 2
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 9 on Windows Vista Service Pack 2
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

MS17-APR: Microsoft .NET Security Update — High

Solution Details

Microsoft has released a fix for this flaw in their April 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released a security update for Microsoft .NET Framework which includes fixes for the following vulnerabilities:

CVE-2017-0160 - .NET Remote Code Execution Vulnerability

Affected Products:
Microsoft .NET Framework 4.5.2 on Windows Vista x64 Edition Service Pack 2
Microsoft .NET Framework 2.0 Service Pack 2 on Windows Vista Service Pack 2
Microsoft .NET Framework 4.5.2 on Windows 8.1 for 32-bit systems
Microsoft .NET Framework 4.5.2 on Windows RT 8.1
Microsoft .NET Framework 4.6.2 on Windows 10 Version 1607 for 32-bit Systems
Microsoft .NET Framework 4.6.2 on Windows Server 2012 (Server Core installation)
Microsoft .NET Framework 4.6.2 on Windows 7 for x64-based Systems Service Pack 1
Microsoft .NET Framework 4.5.2 on Windows Server 2012 R2 (Server Core installation)
Microsoft .NET Framework 4.6/4.6.1 on Windows 7 for 32-bit Systems Service Pack 1
Microsoft .NET Framework 4.6 on Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft .NET Framework 4.6.1 on Windows 10 Version 1511 for 32-bit Systems
Microsoft .NET Framework 4.5.2 on Windows Server 2008 for 32-bit Systems Service Pack 2
Microsoft .NET Framework 4.6.2 on Windows 10 Version 1607 for x64-based Systems
Microsoft .NET Framework 4.6.2 on Windows 8.1 for x64-based systems
Microsoft .NET Framework 4.6 on Windows Vista Service Pack 2
Microsoft .NET Framework 3.5.1 on Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Microsoft .NET Framework 4.5.2 on Windows 8.1 for x64-based systems
Microsoft .NET Framework 4.6 on Windows 10 for 32-bit Systems

MS17-APR: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-0185 - Hyper-V Denial of Service Vulnerability
CVE-2017-0192 - ATMFD.dll Information Disclosure Vulnerability
CVE-2017-0211 - Windows OLE Elevation of Privilege Vulnerability
CVE-2017-0169 - Hyper-V Information Disclosure Vulnerability
CVE-2017-0058 - Win32k Information Disclosure Vulnerability
CVE-2017-0191 - Windows Denial of Service Vulnerability
CVE-2017-0165 - Windows Elevation of Privilege Vulnerability
CVE-2017-0163 - Hyper-V Remote Code Execution Vulnerability
CVE-2017-0159 - ADFS Security Feature Bypass Vulnerability
CVE-2017-0167 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0183 - Hyper-V Denial of Service Vulnerability
CVE-2017-0180 - Hyper-V Remote Code Execution Vulnerability
CVE-2017-0158 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-0164 - Active Directory Denial of Service Vulnerability
CVE-2017-0184 - Hyper-V Denial of Service Vulnerability

CVE-2017-0181 - Hyper-V Remote Code Execution Vulnerability
CVE-2017-0162 - Hyper-V Remote Code Execution Vulnerability
CVE-2017-0182 - Hyper-V Denial of Service Vulnerability
CVE-2017-0188 - Win32k Information Disclosure Vulnerability
CVE-2017-0168 - Hyper-V Information Disclosure Vulnerability
CVE-2017-0179 - Hyper-V Denial of Service Vulnerability
CVE-2017-0155 - Windows Graphics Elevation of Privilege Vulnerability
CVE-2017-0189 - Win32k Elevation of Privilege Vulnerability
CVE-2017-0166 - LDAP Elevation of Privilege Vulnerability
CVE-2017-0178 - Hyper-V Denial of Service Vulnerability
CVE-2017-0156 - Windows Graphics Component Elevation of Privilege Vulnerability
CVE-2017-0186 - Hyper-V Denial of Service Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1511 for x64-based Systems
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2016 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for x64-based Systems
Windows Vista Service Pack 2
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Windows Server 2016
Windows Vista x64 Edition Service Pack 2
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

Solution Details

Microsoft has released a fix for this flaw in their April 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS17-AUG: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-8591 - Windows IME Remote Code Execution Vulnerability
CVE-2017-8593 - Win32k Elevation of Privilege Vulnerability

CVE-2017-8654 - Microsoft Office SharePoint XSS Vulnerability
CVE-2017-0174 - Windows NetBIOS Denial of Service Vulnerability
CVE-2017-0250 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2017-0293 - Windows PDF Remote Code Execution Vulnerability
CVE-2017-8620 - Windows Search Remote Code Execution Vulnerability
CVE-2017-8622 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2017-8623 - Windows Hyper-V Denial of Service Vulnerability
CVE-2017-8624 - Windows CLFS Elevation of Privilege Vulnerability
CVE-2017-8627 - Windows Subsystem for Linux Denial of Service Vulnerability
CVE-2017-8633 - Windows Error Reporting Elevation of Privilege Vulnerability
CVE-2017-8664 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2017-8666 - Win32k Information Disclosure Vulnerability
CVE-2017-8668 - Volume Manager Extension Driver Information Disclosure Vulnerability
CVE-2017-8673 - Windows Remote Desktop Protocol (RDP) Denial of Service Vulnerability
CVE-2017-8691 - Express Compressed Fonts Remote Code Execution Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1511 for x64-based Systems
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Microsoft SharePoint Server 2010 Service Pack 2
Windows Server 2016
Windows 8.1 for 32-bit systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

Solution Details

Microsoft has released a fix for this flaw in their August 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS17-DEC: Microsoft Internet Explorer Security Update High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-11890 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11901 - Scripting Engine Memory Corruption Vulnerability

CVE-2017-11903 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11906 - Scripting Engine Information Disclosure Vulnerability
CVE-2017-11913 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11930 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11886 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11887 - Scripting Engine Information Disclosure Vulnerability
CVE-2017-11907 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
ChakraCore
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

Solution Details

Microsoft has released a fix for this flaw in their December 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS17-DEC: Microsoft Windows Security Update High

Solution Details

Microsoft has released a fix for this flaw in their December 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-11885 - Windows RRAS Service Remote Code Execution Vulnerability
CVE-2017-11899 - Microsoft Windows Security Feature Bypass Vulnerability
CVE-2017-11927 - Microsoft Windows Information Disclosure Vulnerability
CVE-2017-11932 - Microsoft Exchange Spoofing Vulnerability
CVE-2017-11937 - Microsoft Malware Protection Engine Remote Code Execution Vulnerability
ADV170023 - Microsoft Exchange Defense in Depth Update
CVE-2017-11916 - Scripting Engine Memory Corruption Vulnerability

CVE-2017-11936 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2017-11940 - Microsoft Malware Protection Engine Remote Code Execution Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Exchange Server 2013 Cumulative Update 18
Microsoft Forefront Endpoint Protection 2010
Microsoft Exchange Server 2016 Cumulative Update 7
Windows 10 for 32-bit Systems
Windows Defender on Windows 8.1 for 32-bit systems
Microsoft Exchange Server 2016
Microsoft SharePoint Enterprise Server 2016
Microsoft Exchange Server 2013
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Defender on Windows 10 Version 1511 for x64-based Systems
Windows Server 2012 (Server Core installation)
Windows Defender on Windows 10 Version 1703 for x64-based Systems
Windows Server 2012
Windows Defender on Windows Server 2016 (Server Core installation)
Windows 7 for x64-based Systems Service Pack 1
Windows Defender on Windows 10 Version 1607 for 32-bit Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows Defender on Windows 10 Version 1709 for x64-based Systems
Windows Defender on Windows Server 2016
Windows Intune Endpoint Protection
Windows 8.1 for x64-based systems
Windows Defender on Windows 7 for 32-bit Systems Service Pack 1
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Windows Defender on Windows 10 Version 1607 for x64-based Systems
Windows Defender on Windows 10 Version 1709 for 32-bit Systems
Microsoft Exchange Server 2016 Cumulative Update 6
Windows Defender on Windows 8.1 for x64-based systems
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Microsoft Exchange Server 2013 Cumulative Update 17
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Defender on Windows RT 8.1
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows RT 8.1

Windows 7 for 32-bit Systems Service Pack 1
Microsoft Security Essentials
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Microsoft System Center Endpoint Protection
Windows Defender on Windows 10 Version 1511 for 32-bit Systems
Windows Defender on Windows 10 for 32-bit Systems
Windows Defender on Windows 10 for x64-based Systems
Windows Server 2016
Windows Defender on Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Defender on Windows 7 for x64-based Systems Service Pack 1
Windows Defender on Windows Server, version 1709 (Server Core Installation)
Windows Server, version 1709 (Server Core Installation)

MS17-JUL: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-8594 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-8618 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows Server 2012 R2

Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

Solution Details

Microsoft has released a fix for this flaw in their July 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS17-JUL: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-8569 - SharePoint Server XSS Vulnerability
CVE-2017-8573 - Microsoft Graphics Component Elevation of Privilege Vulnerability
CVE-2017-8574 - Microsoft Graphics Component Elevation of Privilege Vulnerability
CVE-2017-8577 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8578 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8580 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8581 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8582 - Https.sys Information Disclosure Vulnerability
CVE-2017-8584 - HoloLens Remote Code Execution Vulnerability
CVE-2017-8587 - Windows Explorer Denial of Service Vulnerability
CVE-2017-8588 - WordPad Remote Code Execution Vulnerability
CVE-2017-8589 - Windows Search Remote Code Execution Vulnerability
CVE-2017-8590 - Windows CLFS Elevation of Privilege Vulnerability
CVE-2017-8621 - Microsoft Exchange Open Redirect Vulnerability
CVE-2017-0170 - Windows Performance Monitor Information Disclosure Vulnerability
CVE-2017-8463 - Windows Explorer Remote Code Execution Vulnerability
CVE-2017-8467 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8486 - Win32k Information Disclosure Vulnerability
CVE-2017-8495 - Kerberos SNAME Security Feature Bypass Vulnerability
CVE-2017-8556 - Microsoft Graphics Component Elevation of Privilege Vulnerability
CVE-2017-8557 - Windows System Information Console Information Disclosure Vulnerability
CVE-2017-8560 - Microsoft Exchange Cross-Site Scripting Vulnerability
CVE-2017-8559 - Microsoft Exchange Cross-Site Scripting Vulnerability
CVE-2017-8561 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2017-8562 - Windows ALPC Elevation of Privilege Vulnerability
CVE-2017-8563 - Windows Elevation of Privilege Vulnerability
CVE-2017-8564 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8565 - Windows PowerShell Remote Code Execution Vulnerability
CVE-2017-8566 - Windows IME Elevation of Privilege Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)

MS17-JUN: Microsoft Windows Security Update High

Solution Details

Microsoft has released a fix for this flaw in their June 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-0193 - Hypervisor Code Integrity Elevation of Privilege Vulnerability
CVE-2017-8514 - Microsoft SharePoint Reflective XSS Vulnerability
CVE-2017-8551 - Microsoft SharePoint XSS vulnerability
CVE-2017-0173 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2017-0215 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2017-0216 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2017-0218 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2017-0219 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2017-0291 - Windows PDF Remote Code Execution Vulnerability
CVE-2017-0294 - Windows Remote Code Execution Vulnerability
CVE-2017-0295 - Windows Default Folder Tampering Vulnerability
CVE-2017-0296 - Windows TDX Elevation of Privilege Vulnerability
CVE-2017-0297 - Windows Kernel Elevation of Privilege Vulnerability

CVE-2017-0298 - Windows COM Session Elevation of Privilege Vulnerability
CVE-2017-0299 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0300 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8460 - Windows PDF Information Disclosure Vulnerability
CVE-2017-8462 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8464 - LNK Remote Code Execution Vulnerability
CVE-2017-8465 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8466 - Windows Cursor Elevation of Privilege Vulnerability
CVE-2017-8468 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8469 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8470 - Win32k Information Disclosure Vulnerability
CVE-2017-8471 - Win32k Information Disclosure Vulnerability
CVE-2017-8472 - Win32k Information Disclosure Vulnerability
CVE-2017-8473 - Win32k Information Disclosure Vulnerability
CVE-2017-8474 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8475 - Win32k Information Disclosure Vulnerability
CVE-2017-8476 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8477 - Win32k Information Disclosure Vulnerability
CVE-2017-8478 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8479 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8480 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8481 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8482 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8483 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8484 - Win32k Information Disclosure Vulnerability
CVE-2017-8485 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8488 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8489 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8490 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8491 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8492 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8493 - Windows Security Feature Bypass Vulnerability
CVE-2017-8494 - Windows Elevation of Privilege Vulnerability
CVE-2017-8515 - Windows VAD Cloning Denial of Service Vulnerability
CVE-2017-8544 - Windows Search Information Disclosure Vulnerability
CVE-2017-8543 - Windows Search Remote Code Execution Vulnerability
ADV170008 - Defense-in-depth Update for Microsoft SharePoint
CVE-2017-8553 - GDI Information Disclosure Vulnerablity

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2
Microsoft SharePoint Enterprise Server 2016
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Microsoft SharePoint Enterprise Server 2013 Service Pack 1

Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Microsoft Project Server 2013 Service Pack 1
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

MS17-MAY: Microsoft Internet Explorer Security Update — High

Solution Details

Microsoft has released a fix for this flaw in their May 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-0064 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2017-0222 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-0226 - Microsoft Internet Explorer Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

CVSS Base Score: 7.5

MS17-MAY: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-0190 - Windows GDI Information Disclosure Vulnerability
CVE-2017-0077 - Dxgkrnl.sys Elevation of Privilege Vulnerability
CVE-2017-0242 - Microsoft ActiveX Information Disclosure Vulnerability
CVE-2017-0244 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2017-0245 - Win32k Information Disclosure Vulnerability
CVE-2017-0246 - Win32k Elevation of Privilege Vulnerability
CVE-2017-0255 - Microsoft SharePoint XSS Vulnerability
CVE-2017-0258 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0259 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0263 - Win32k Elevation of Privilege Vulnerability
CVE-2017-0290 - Microsoft Malware Protection Engine Remote Code Execution Vulnerability
CVE-2017-0171 - Windows DNS Server Denial of Service Vulnerability
CVE-2017-0175 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0212 - Windows Hyper-V vSMB Elevation of Privilege Vulnerability
CVE-2017-0213 - Windows COM Elevation of Privilege Vulnerability
CVE-2017-0214 - Windows COM Elevation of Privilege Vulnerability
CVE-2017-0220 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-0267 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0268 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0269 - Windows SMB Denial of Service Vulnerability
CVE-2017-0270 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0271 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0272 - Windows SMB Remote Code Execution Vulnerability
CVE-2017-0273 - Windows SMB Denial of Service Vulnerability
CVE-2017-0274 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0275 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0276 - Windows SMB Information Disclosure Vulnerability
CVE-2017-0277 - Windows SMB Remote Code Execution Vulnerability
CVE-2017-0278 - Windows SMB Remote Code Execution Vulnerability
CVE-2017-0279 - Windows SMB Remote Code Execution Vulnerability
CVE-2017-0280 - Windows SMB Denial of Service Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Forefront Security for SharePoint Service Pack 3
Microsoft Forefront Endpoint Protection 2010
Windows 10 for 32-bit Systems
Windows Defender on Windows 8.1 for 32-bit systems
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Defender on Windows 10 Version 1511 for x64-based Systems
Windows Server 2012 (Server Core installation)
Windows Defender on Windows 10 Version 1703 for x64-based Systems
Windows Server 2012
Windows Defender on Windows Server 2016 (Server Core installation)
Windows 7 for x64-based Systems Service Pack 1
Windows Defender on Windows 10 Version 1607 for 32-bit Systems
Windows 10 Version 1703 for x64-based Systems

Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2012 R2 (Server Core installation)
Windows Defender on Windows Server 2016
Windows Intune Endpoint Protection
Windows 8.1 for x64-based systems
Windows Defender on Windows 7 for 32-bit Systems Service Pack 1
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Windows Defender on Windows 10 Version 1607 for x64-based Systems
Windows Defender on Windows 8.1 for x64-based systems
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows Defender on Windows RT 8.1
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Microsoft Security Essentials
Microsoft SharePoint Foundation 2013 Service Pack 1
Windows Defender on Windows 10 Version 1511 for 32-bit Systems
Windows Defender on Windows 10 for 32-bit Systems
Windows Defender on Windows 10 for x64-based Systems
Windows Server 2016
Windows Defender on Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Defender on Windows 7 for x64-based Systems Service Pack 1

MS17-NOV: Microsoft Internet Explorer Security Update — High

Solution Details

Microsoft has released a fix for this flaw in their November 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-11856 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-11834 - Scripting Engine Information Disclosure Vulnerability
CVE-2017-11848 - Internet Explorer Information Disclosure Vulnerability

CVE-2017-11855 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-11869 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1709 for 64-based Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows Server, version 1709 (Server Core Installation)
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 7.5

MS17-OCT: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-11822 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-11790 - Internet Explorer Information Disclosure Vulnerability
CVE-2017-11793 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11810 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11813 - Internet Explorer Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

Solution Details

Microsoft has released a fix for this flaw in their October 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS17-OCT: Microsoft Windows Security Update

High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-8689 - Win32k Elevation of Privilege Vulnerability
ADV170012 - Vulnerability in TPM could allow Security Feature Bypass
ADV170014 - Optional Windows NTLM SSO authentication changes
CVE-2017-11823 - Microsoft Windows Security Feature Bypass
CVE-2017-11786 - Skype for Business Elevation of Privilege Vulnerability
ADV170016 - Windows Server 2008 Defense in Depth
CVE-2017-8693 - Microsoft Graphics Information Disclosure Vulnerability
CVE-2017-8694 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8703 - Windows Subsystem for Linux Denial of Service Vulnerability
CVE-2017-8715 - Windows Security Feature Bypass Vulnerability
CVE-2017-8717 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2017-8718 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2017-8727 - Windows Shell Memory Corruption Vulnerability
CVE-2017-11762 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2017-11763 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2017-11765 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-11769 - TRIE Remote Code Execution Vulnerability
CVE-2017-11771 - Windows Search Remote Code Execution Vulnerability
CVE-2017-11772 - Microsoft Search Information Disclosure Vulnerability
CVE-2017-11775 - Microsoft Office SharePoint XSS Vulnerability
CVE-2017-11777 - Microsoft Office SharePoint XSS Vulnerability
CVE-2017-11779 - Windows DNSAPI Remote Code Execution Vulnerability
CVE-2017-11780 - Windows SMB Remote Code Execution Vulnerability
CVE-2017-11781 - Windows SMB Denial of Service Vulnerability
CVE-2017-11782 - Windows SMB Elevation of Privilege Vulnerability
CVE-2017-11783 - Windows Elevation of Privilege Vulnerability
CVE-2017-11784 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-11785 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-11797 - Scripting Engine Information Disclosure Vulnerability
CVE-2017-11801 - Scripting Engine Memory Corruption Vulnerability
CVE-2017-11814 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-11815 - Windows SMB Information Disclosure Vulnerability
CVE-2017-11816 - Windows GDI Information Disclosure Vulnerability
CVE-2017-11817 - Windows Information Disclosure Vulnerability
CVE-2017-11818 - Windows Storage Security Feature Bypass Vulnerability
CVE-2017-11819 - Windows Shell Remote Code Execution Vulnerability
CVE-2017-11820 - Microsoft Office SharePoint XSS Vulnerability
CVE-2017-11824 - Windows Graphics Component Elevation of Privilege Vulnerability
CVE-2017-11829 - Windows Update Delivery Optimization Elevation of Privilege Vulnerability
CVE-2017-13080 - Windows Wireless WPA2/KRACK Group Key Reinstallation Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Skype for Business 2016 (64-bit)
Microsoft Lync 2013 Service Pack 1 (32-bit)
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1511 for 32-bit Systems

MS17-SEP: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-8733 - Internet Explorer Spoofing Vulnerability
CVE-2017-8747 - Internet Explorer Memory Corruption Vulnerability
CVE-2017-8749 - Internet Explorer Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems

Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

Solution Details

Microsoft has released a fix for this flaw in their September 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 7.5

MS17-SEP: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2017-8629 - Microsoft SharePoint XSS Vulnerability
CVE-2017-8675 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8677 - Win32k Information Disclosure Vulnerability
CVE-2017-8678 - Win32k Information Disclosure Vulnerability
CVE-2017-8679 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8680 - Win32k Information Disclosure Vulnerability
CVE-2017-8681 - Win32k Information Disclosure Vulnerability
CVE-2017-8683 - Win32k Graphics Information Disclosure Vulnerability
CVE-2017-8684 - Windows GDI+ Information Disclosure Vulnerability
CVE-2017-8685 - Windows GDI+ Information Disclosure Vulnerability
CVE-2017-8686 - Windows DHCP Server Remote Code Execution Vulnerability
CVE-2017-8687 - Win32k Information Disclosure Vulnerability
CVE-2017-8688 - Windows GDI+ Information Disclosure Vulnerability
CVE-2017-9417 - Broadcom BCM43xx Remote Code Execution Vulnerability
CVE-2017-8745 - Microsoft SharePoint Cross Site Scripting Vulnerability
CVE-2017-8758 - Microsoft Exchange Cross-Site Scripting Vulnerability
CVE-2017-0161 - NetBIOS Remote Code Execution Vulnerability
CVE-2017-8628 - Microsoft Bluetooth Driver Spoofing Vulnerability
CVE-2017-8692 - Uniscribe Remote Code Execution Vulnerability
CVE-2017-8699 - Windows Shell Remote Code Execution Vulnerability
CVE-2017-8702 - Windows Elevation of Privilege Vulnerability
CVE-2017-8704 - Hyper-V Denial of Service Vulnerability
CVE-2017-8706 - Hyper-V Information Disclosure Vulnerability
CVE-2017-8707 - Hyper-V Information Disclosure Vulnerability
CVE-2017-8708 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8709 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8710 - Windows Information Disclosure Vulnerability

CVE-2017-8711 - Hyper-V Information Disclosure Vulnerability
CVE-2017-8712 - Hyper-V Information Disclosure Vulnerability
CVE-2017-8713 - Hyper-V Information Disclosure Vulnerability
CVE-2017-8714 - Remote Desktop Virtual Host Remote Code Execution Vulnerability
CVE-2017-8716 - Windows Security Feature Bypass Vulnerability
CVE-2017-8719 - Windows Kernel Information Disclosure Vulnerability
CVE-2017-8720 - Win32k Elevation of Privilege Vulnerability
CVE-2017-8725 - Microsoft Office Publisher Remote Code Execution
CVE-2017-8746 - Device Guard Security Feature Bypass Vulnerability
CVE-2017-11761 - Microsoft Exchange Information Disclosure Vulnerability

Affected Products:
Microsoft Publisher 2010 Service Pack 2 (32-bit editions)
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft Publisher 2010 Service Pack 2 (64-bit editions)
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Microsoft Publisher 2007 Service Pack 3
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Microsoft Exchange Server 2016 Cumulative Update 6
Microsoft Exchange Server 2013 Service Pack 1
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Microsoft Exchange Server 2013 Cumulative Update 16
Microsoft Exchange Server 2013 Cumulative Update 17
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Microsoft Exchange Server 2016 Cumulative Update 5
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft SharePoint Foundation 2013 Service Pack 1
Microsoft SharePoint Server 2013 Service Pack 1
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their September 2017 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS18-APR: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their April 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-0987 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-0988 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0989 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-0991 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-0996 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0997 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-1000 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-1001 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-1004 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2018-0870 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-0981 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-1018 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-1020 - Internet Explorer Memory Corruption Vulnerability

Affected Products:
Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows Server 2012 (Server Core installation)
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1

Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1511 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Internet Explorer 11 on Windows RT 8.1
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows 10 Version 1511 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-APR: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-0887 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0890 - Active Directory Security Feature Bypass Vulnerability
CVE-2018-0956 - HTTP.sys Denial of Service Vulnerability
CVE-2018-0957 - Hyper-V Information Disclosure Vulnerability
CVE-2018-0960 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0963 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0964 - Hyper-V Information Disclosure Vulnerability
CVE-2018-0966 - Device Guard Security Feature Bypass Vulnerability
CVE-2018-0967 - Windows SNMP Service Denial of Service Vulnerability
CVE-2018-0968 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0969 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0976 - Windows Remote Desktop Protocol (RDP) Denial of Service Vulnerability
CVE-2018-0970 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0971 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0972 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0973 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0974 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0975 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-1003 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2018-1008 - OpenType Font Driver Elevation of Privilege Vulnerability
CVE-2018-1009 - Microsoft DirectX Graphics Kernel Subsystem Elevation of Privilege Vulnerability
CVE-2018-1010 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2018-1012 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2018-1013 - Microsoft Graphics Remote Code Execution Vulnerability

CVE-2018-1015 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2018-1016 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2018-1032 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-1037 - Microsoft Visual Studio Information Disclosure Vulnerability
CVE-2018-8116 - Microsoft Graphics Component Denial of Service Vulnerability
CVE-2018-0986 - Microsoft Malware Protection Engine Remote Code Execution Vulnerability
CVE-2018-1005 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-1014 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-1034 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8117 - Microsoft Wireless Keyboard 850 Security Feature Bypass Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows Defender on Windows Server 2012
Windows 10 for 32-bit Systems
Windows Defender on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Defender on Windows Server 2016 (Server Core installation)
Microsoft Visual Studio 2017 Version 15.7 Preview
Microsoft System Center 2012 R2 Endpoint Protection
Windows Defender on Windows Server 2012 R2 (Server Core installation)
Microsoft Visual Studio 2017 Version 15.6.6
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows 10 Version 1703 for x64-based Systems

MS18-AUG: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-8316 - Internet Explorer Remote Code Execution Vulnerability
CVE-2018-8371 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8372 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8373 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8385 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8389 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8403 - Microsoft Browser Memory Corruption Vulnerability
CVE-2018-8351 - Microsoft Browser Information Disclosure Vulnerability
CVE-2018-8353 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8355 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8357 - Microsoft Browser Elevation of Privilege Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1

Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their August 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-AUG: Microsoft Windows Security Update High

Solution Details

Microsoft has released a fix for this flaw in their August 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8204 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability

CVE-2018-8253 - Microsoft Cortana Elevation of Privilege Vulnerability
ADV180018 - Microsoft Guidance to mitigate L1TF variant
CVE-2018-8384 - Chakra Scripting Engine Memory Corruption Vulnerability
CVE-2018-8394 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8396 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8397 - GDI+ Remote Code Execution Vulnerability
CVE-2018-8398 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8399 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8400 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8401 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8404 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8405 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8406 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-0952 - Diagnostic Hub Standard Collector Elevation Of Privilege Vulnerability
CVE-2018-8200 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8302 - Microsoft Exchange Memory Corruption Vulnerability
CVE-2018-8339 - Windows Installer Elevation of Privilege Vulnerability
CVE-2018-8340 - AD FS Security Feature Bypass Vulnerability
CVE-2018-8341 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8342 - Windows NDIS Elevation of Privilege Vulnerability
CVE-2018-8343 - Windows NDIS Elevation of Privilege Vulnerability
CVE-2018-8344 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2018-8345 - LNK Remote Code Execution Vulnerability
CVE-2018-8346 - LNK Remote Code Execution Vulnerability
CVE-2018-8347 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8348 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8349 - Microsoft COM for Windows Remote Code Execution Vulnerability
CVE-2018-8350 - Windows PDF Remote Code Execution Vulnerability
CVE-2018-8359 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8374 - Microsoft Exchange Server Tampering Vulnerability
CVE-2018-8414 - Windows Shell Remote Code Execution Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems

Microsoft Exchange Server 2013 Cumulative Update 21
Microsoft Exchange Server 2010 Service Pack 3 Update Rollup 23
Microsoft Visual Studio 2017
Microsoft Exchange Server 2013 Cumulative Update 20
Microsoft Exchange Server 2016 Cumulative Update 10
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server, version 1803 (Server Core Installation)
Microsoft Visual Studio 2015 Update 3
Microsoft Visual Studio 2017 Version 15.8
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Microsoft Exchange Server 2016 Cumulative Update 9
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-DEC: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their December 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-8619 - Internet Explorer Remote Code Execution Vulnerability
CVE-2018-8625 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2018-8631 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8643 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8653 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems

Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

MS18-DEC: Microsoft Windows Security Update

High

Solution Details

Microsoft has released a fix for this flaw in their December 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8477 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8514 - Remote Procedure Call runtime Information Disclosure Vulnerability
CVE-2018-8595 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8596 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8604 - Microsoft Exchange Server Tampering Vulnerability
CVE-2018-8580 - Microsoft SharePoint Information Disclosure Vulnerability
CVE-2018-8599 - Diagnostics Hub Standard Collector Service Elevation of Privilege Vulnerability
CVE-2018-8611 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8612 - Connected User Experiences and Telemetry Service Denial of Service Vulnerability
CVE-2018-8621 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8622 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8626 - Windows DNS Server Heap Overflow Vulnerability
CVE-2018-8634 - Microsoft Text-To-Speech Remote Code Execution Vulnerability
CVE-2018-8635 - Microsoft SharePoint Server Elevation of Privilege Vulnerability
CVE-2018-8637 - Win32k Information Disclosure Vulnerability
CVE-2018-8638 - DirectX Information Disclosure Vulnerability
CVE-2018-8639 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8641 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8649 - Windows Denial of Service Vulnerability
CVE-2018-8651 - Microsoft Dynamics NAV Cross Site Scripting Vulnerability
CVE-2018-8652 - Windows Azure Pack Cross Site Scripting Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Microsoft Exchange Server 2016 Cumulative Update 11
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1

Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Microsoft Visual Studio 2017 version 15.9
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Microsoft SharePoint Server 2010 Service Pack 2
Windows 8.1 for 32-bit systems
Windows Azure Pack Rollup 13.1
Microsoft Visual Studio 2017
Microsoft Exchange Server 2016 Cumulative Update 10
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Microsoft Dynamics NAV 2016
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1809 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows 10 Version 1709 for ARM64-based Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Microsoft Dynamics NAV 2017
Windows Server, version 1803 (Server Core Installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Microsoft Visual Studio 2015 Update 3
Microsoft SharePoint Foundation 2010 Service Pack 2
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Windows 10 Version 1803 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

MS18-FEB: Microsoft Internet Explorer Security Update

High

Solution Details

Microsoft has released a fix for this flaw in their February 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

PLEASE NOTE: If this patch is not being offered by Windows Update please verify that the following registry key exists and your antivirus software is up to date. Otherwise Windows Update will return no available patches while the system remains vulnerable.

Key="HKEY_LOCAL_MACHINE"Subkey="SOFTWARE\Microsoft\Windows\CurrentVersion\QualityCompa

Value Name="cadca5fe-87d3-4b96-b7fb-a231484277cc"
Type="REG_DWORD”
Data="0x00000000”

Microsoft has issued this guidance to all antivirus vendors, that they must set this registry key to signal to Windows Update that they are compatible with the latest 2018 updates.

If this registry key does not exist, the system is still vulnerable but Windows Update may not offer to the patch to the affected system. Please contact your antivirus vendor, or install Windows Defender on the affected system to resolve this condition and allow the system to continue receiving normal updates.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-0840 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0866 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems

Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft Edge on Windows 10 Version 1511 for x64-based Systems

MS18-FEB: Microsoft Windows Security Update High

Solution Details

Microsoft has released a fix for this flaw in their February 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

PLEASE NOTE: If this patch is not being offered by Windows Update please verify that the following registry key exists and your antivirus software is up to date. Otherwise Windows Update will return no available patches while the system remains vulnerable.

Key="HKEY_LOCAL_MACHINE"Subkey="SOFTWARE\Microsoft\Windows\CurrentVersion\QualityCompa

Value Name="cadca5fe-87d3-4b96-b7fb-a231484277cc"
Type="REG_DWORD”
Data="0x00000000”

Microsoft has issued this guidance to all antivirus vendors, that they must set this registry key to signal to Windows Update that they are compatible with the latest 2018 updates. Please contact your antivirus vendor, or install Windows Defender on the affected system to resolve this condition and allow the system to continue receiving normal updates.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-0810 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0827 - Windows Security Feature Bypass Vulnerability
CVE-2018-0828 - Windows Elevation of Privilege Vulnerability
CVE-2018-0829 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0830 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0831 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0832 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0833 - Windows Denial of Service Vulnerability
CVE-2018-0842 - Windows Remote Code Execution Vulnerability
CVE-2018-0843 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0847 - Windows Scripting Engine Memory Corruption Vulnerability
CVE-2018-0855 - Windows EOT Font Engine Information Disclosure Vulnerability
CVE-2018-0858 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0869 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0742 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0755 - Windows EOT Font Engine Information Disclosure Vulnerability
CVE-2018-0756 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0809 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0820 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-0821 - Windows AppContainer Elevation Of Privilege Vulnerability
CVE-2018-0822 - Windows NTFS Global Reparse Point Elevation of Privilege Vulnerability
CVE-2018-0823 - Named Pipe File System Elevation of Privilege Vulnerability
CVE-2018-0825 - StructuredQuery Remote Code Execution Vulnerability
CVE-2018-0826 - Windows Storage Services Elevation of Privilege Vulnerability
CVE-2018-0844 - Windows Common Log File System Driver Elevation of Privilege Vulnerability
CVE-2018-0846 - Windows Common Log File System Driver Elevation of Privilege Vulnerability
CVE-2018-0864 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0757 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0760 - Windows EOT Font Engine Information Disclosure Vulnerability
CVE-2018-0761 - Windows EOT Font Engine Information Disclosure Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore

Windows 8.1 for 32-bit systems
Microsoft Project Server 2013 Service Pack 1
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1511 for 32-bit Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

MS18-JAN: Microsoft Internet Explorer Security Update (MELTDOWN) High

Solution Details

Microsoft has released a fix for this flaw in their January 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

PLEASE NOTE: If this patch is not being offered by Windows Update please verify that the following registry key exists and your antivirus software is up to date. Otherwise Windows Update will return no available patches while the system remains vulnerable.

Key="HKEY_LOCAL_MACHINE"Subkey="SOFTWARE\Microsoft\Windows\CurrentVersion\QualityCompa

Value Name="cadca5fe-87d3-4b96-b7fb-a231484277cc"
Type="REG_DWORD”
Data="0x00000000”

Microsoft has issued this guidance to all antivirus vendors, that they must set this registry key to signal to Windows Update that they are compatible with the latest 2018 updates. Please contact your antivirus vendor, or install Windows Defender on the affected system to resolve this condition and allow the system to continue receiving normal updates.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2017-5754 - Meltdown CPU Flaw
CVE-2018-0762 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0772 - Scripting Engine Memory Corruption Vulnerability

Meltdown (CVE-2017-5754) can be leveraged by a malicious program running on the local system to read memory from other processes, including the operating system. Additionally, it may be possible for a malicious program running inside a virtual machine to read memory from the host operating system. This can result in the disclosure of sensitive information which may lead to further compromise.

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems

Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-JUL: Microsoft Internet Explorer Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-0949 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2018-8242 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8287 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8288 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8291 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8296 - Scripting Engine Memory Corruption Vulnerability

Affected Products:

Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their July 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS18-JUL: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8172 - Visual Studio Remote Code Execution Vulnerability
CVE-2018-8206 - Windows FTP Server Denial of Service Vulnerability
CVE-2018-8222 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8232 - Microsoft Macro Assembler Tampering Vulnerability
CVE-2018-8282 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8283 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8298 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8313 - Windows Elevation of Privilege Vulnerability
CVE-2018-8319 - MSR JavaScript Cryptography Library Security Feature Bypass Vulnerability
CVE-2018-8323 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8326 - Open Source Customization for Active Directory Federation Services XSS Vulnerability
CVE-2018-8327 - PowerShell Editor Services Remote Code Execution Vulnerability
CVE-2018-8238 - Skype for Business and Lync Security Feature Bypass Vulnerability
CVE-2018-8299 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8300 - Microsoft SharePoint Remote Code Execution Vulnerability
CVE-2018-8304 - Windows DNSAPI Denial of Service Vulnerability
CVE-2018-8305 - Windows Mail Client Information Disclosure Vulnerability
CVE-2018-8306 - Microsoft Wireless Display Adapter Command Injection Vulnerability
CVE-2018-8307 - WordPad Security Feature Bypass Vulnerability
CVE-2018-8308 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8309 - Windows Denial of Service Vulnerability
CVE-2018-8311 - Remote Code Execution Vulnerability in Skype For Business and Lync
CVE-2018-8314 - Windows Elevation of Privilege Vulnerability

Affected Products:

Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Visual Studio 2017 Version 15.7.5
Windows 10 for 32-bit Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Microsoft Visual Studio 2013 Update 5
Windows 7 for x64-based Systems Service Pack 1
Skype for Business 2016 (64-bit)
Microsoft Lync 2013 Service Pack 1 (32-bit)
Windows 10 Version 1803 for x64-based Systems
Mail, Calendar, and People in Windows 8.1 App Store
Microsoft Wireless Display Adapter V2 Software Version 2.0.8350
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Microsoft Visual Studio 2017 Version 15.8 Preview
Microsoft Lync 2013 Service Pack 1 (64-bit)
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Web Customizations for Active Directory Federation Services
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Microsoft Visual Studio 2012 Update 5
Microsoft Visual Studio 2017
Microsoft Wireless Display Adapter V2 Software Version 2.0.8365
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows Server, version 1803 (Server Core Installation)
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Microsoft Visual Studio 2010 Service Pack 1
Microsoft Visual Studio 2015 Update 3
Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Microsoft SharePoint Foundation 2013 Service Pack 1
Skype for Business 2016 (32-bit)
Expression Blend 4 Service Pack 3
PowerShell Extension for Visual Studio Code

Windows Server 2016
Microsoft Research JavaScript Cryptography Library
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
PowerShell Editor Services
Microsoft Wireless Display Adapter V2 Software Version 2.0.8372
Windows Server, version 1709 (Server Core Installation)

MS18-JUN: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their June 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-0978 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8113 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2018-8249 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8267 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-JUN: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8175 - WEBDAV Denial of Service Vulnerability
CVE-2018-8140 - Cortana Elevation of Privilege Vulnerability
CVE-2018-8201 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8205 - Windows Denial of Service Vulnerability
CVE-2018-8207 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8208 - Windows Desktop Bridge Elevation of Privilege Vulnerability
CVE-2018-8209 - Windows Wireless Network Profile Information Disclosure Vulnerability
CVE-2018-8210 - Windows Remote Code Execution Vulnerability
CVE-2018-8211 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8212 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8213 - Windows Remote Code Execution Vulnerability
CVE-2018-8214 - Windows Desktop Bridge Elevation of Privilege Vulnerability
CVE-2018-8215 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8216 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8217 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8218 - Windows Hyper-V Denial of Service Vulnerability
CVE-2018-8219 - Hypervisor Code Integrity Elevation of Privilege Vulnerability
CVE-2018-8221 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8224 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8225 - Windows DNSAPI Remote Code Execution Vulnerability
CVE-2018-8226 - HTTP.sys Denial of Service Vulnerability
CVE-2018-8231 - HTTP Protocol Stack Remote Code Execution Vulnerability
CVE-2018-8233 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8239 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8243 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8245 - Microsoft Office Elevation of Privilege Vulnerability
CVE-2018-8252 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8254 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0982 - Windows Elevation of Privilege Vulnerability
CVE-2018-1036 - NTFS Elevation of Privilege Vulnerability

CVE-2018-1040 - Windows Code Integrity Module Denial of Service Vulnerability
CVE-2018-8121 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8169 - HIDParser Elevation of Privilege Vulnerability
CVE-2018-8251 - Media Foundation Memory Corruption Vulnerability

Affected Products:
Microsoft Publisher 2010 Service Pack 2 (32-bit editions)
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft Publisher 2010 Service Pack 2 (64-bit editions)
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server, version 1803 (Server Core Installation)
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Microsoft SharePoint Foundation 2013 Service Pack 1
Microsoft Project Server 2010 Service Pack 2
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their June 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS18-MAR: Microsoft Internet Explorer Security Update

High

Solution Details

Microsoft has released a fix for this flaw in their March 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-0889 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0891 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-0927 - Microsoft Browser Information Disclosure Vulnerability
CVE-2018-0929 - Internet Explorer Information Disclosure Vulnerability
CVE-2018-0932 - Microsoft Browser Information Disclosure Vulnerability
CVE-2018-0935 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0942 - Internet Explorer Elevation of Privilege Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012

Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1511 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1511 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft Edge on Windows 10 Version 1511 for x64-based Systems

MS18-MAR: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-0811 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0816 - Windows GDI Elevation of Privilege Vulnerability
CVE-2018-0817 - Windows GDI Elevation of Privilege Vulnerability
CVE-2018-0868 - Windows Installer Elevation of Privilege Vulnerability
CVE-2018-0884 - Windows Security Feature Bypass Vulnerability
CVE-2018-0885 - Windows Hyper-V Denial of Service Vulnerability
CVE-2018-0886 - CredSSP Remote Code Execution Vulnerability
CVE-2018-0888 - Hyper-V Information Disclosure Vulnerability
CVE-2018-0894 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0895 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0896 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0897 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0898 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0899 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0900 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0901 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0902 - CNG Security Feature Bypass Vulnerability
CVE-2018-0924 - Microsoft Exchange Information Disclosure Vulnerability
CVE-2018-0926 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0940 - Microsoft Exchange Elevation of Privilege Vulnerability
CVE-2018-0941 - Microsoft Exchange Information Disclosure Vulnerability
CVE-2018-0947 - Microsoft Sharepoint Elevation of Privilege Vulnerability
CVE-2018-0977 - Win32k Elevation of Privilege Vulnerability
CVE-2018-0983 - Windows Storage Services Elevation of Privilege Vulnerability
CVE-2018-0813 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0814 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0815 - Windows GDI Elevation of Privilege Vulnerability
CVE-2018-0877 - Windows Desktop Bridge VFS Elevation of Privilege Vulnerability
CVE-2018-0878 - Windows Remote Assistance Information Disclosure Vulnerability
CVE-2018-0880 - Windows Desktop Bridge Elevation of Privilege Vulnerability
CVE-2018-0881 - Microsoft Video Control Elevation of Privilege Vulnerability
CVE-2018-0882 - Windows Desktop Bridge Elevation of Privilege Vulnerability
CVE-2018-0883 - Windows Shell Remote Code Execution Vulnerability
CVE-2018-0904 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-0909 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0910 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0911 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0912 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0913 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0914 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0915 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0916 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0917 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0921 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-0923 - Microsoft SharePoint Elevation of Privilege Vulnerability

CVE-2018-0925 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0944 - Microsoft SharePoint Elevation of Privilege Vulnerability

Affected Products:
Microsoft Exchange Server 2010 Service Pack 3 Update Rollup 20
Microsoft Exchange Server 2013 Cumulative Update 19
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Exchange Server 2013 Cumulative Update 18
Microsoft Exchange Server 2016 Cumulative Update 7
Windows 10 for 32-bit Systems
Microsoft Exchange Server 2016 Cumulative Update 8
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Microsoft Project Server 2013 Service Pack 1
Microsoft Exchange Server 2013 Service Pack 1
Windows 10 Version 1511 for x64-based Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1511 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft SharePoint Foundation 2013 Service Pack 1
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

Solution Details

Microsoft has released a fix for this flaw in their March 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-MAY: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-8122 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8126 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2018-8145 - Chakra Scripting Engine Memory Corruption Vulnerability
CVE-2018-0954 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-0955 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-1022 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-1025 - Microsoft Browser Information Disclosure Vulnerability
CVE-2018-8114 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8178 - Microsoft Browser Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems

Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their May 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-MAY: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-0854 - Windows Security Feature Bypass Vulnerability
CVE-2018-0958 - Windows Security Feature Bypass Vulnerability
CVE-2018-0959 - Hyper-V Remote Code Execution Vulnerability
CVE-2018-0961 - Hyper-V vSMB Remote Code Execution Vulnerability
CVE-2018-8119 - Azure IoT SDK Spoofing Vulnerability
CVE-2018-8124 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8127 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8129 - Windows Security Feature Bypass Vulnerability
CVE-2018-8132 - Windows Security Feature Bypass Vulnerability
CVE-2018-8134 - Windows Elevation of Privilege Vulnerability
CVE-2018-8136 - Windows Remote Code Execution Vulnerability
CVE-2018-8897 - Windows Kernel Elevation of Privilege Vulnerability

CVE-2018-8151 - Microsoft Exchange Memory Corruption Vulnerability
CVE-2018-8152 - Microsoft Exchange Server Elevation of Privilege Vulnerability
CVE-2018-8154 - Microsoft Exchange Memory Corruption Vulnerability
CVE-2018-8155 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8156 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8164 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8165 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8166 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8167 - Windows Common Log File System Driver Elevation of Privilege Vulnerability
CVE-2018-8168 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8173 - Microsoft InfoPath Remote Code Execution Vulnerability
CVE-2018-8177 - Chakra Scripting Engine Memory Corruption Vulnerability
CVE-2018-0824 - Microsoft COM for Windows Remote Code Execution Vulnerability
CVE-2018-8115 - Windows Host Compute Service Shim Remote Code Execution Vulnerability
CVE-2018-8120 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8141 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8149 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8153 - Microsoft Exchange Spoofing Vulnerability
CVE-2018-8159 - Microsoft Exchange Elevation of Privilege Vulnerability
CVE-2018-8170 - Windows Image Elevation of Privilege Vulnerability
CVE-2018-8174 - Windows VBScript Engine Remote Code Execution Vulnerability

Affected Products:
Microsoft Exchange Server 2013 Cumulative Update 19
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows Host Compute Service Shim
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft Exchange Server 2010 Service Pack 3 Update Rollup 21
Microsoft Exchange Server 2016 Cumulative Update 8
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Microsoft Infopath 2013 Service Pack 1 (32-bit edition)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Microsoft Infopath 2013 Service Pack 1 (64-bit edition)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Microsoft SharePoint Server 2010 Service Pack 2
Windows 8.1 for 32-bit systems
Microsoft Project Server 2013 Service Pack 1

C# SDK for Azure IoT
Microsoft Exchange Server 2013 Service Pack 1
Microsoft Exchange Server 2013 Cumulative Update 20
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Java SDK for Azure IoT
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server, version 1803 (Server Core Installation)
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1703 for 32-bit Systems
Microsoft SharePoint Foundation 2013 Service Pack 1
Microsoft Project Server 2010 Service Pack 2
Microsoft Exchange Server 2016 Cumulative Update 9
C SDK for Azure IoT
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

Solution Details

Microsoft has released a fix for this flaw in their May 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 8.6

CVSS Vector: AV:L/AC:L/PR:N/UI:R/S:C/C:H/I:H/A:H

MS18-NOV: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8256 - Microsoft PowerShell Remote Code Execution Vulnerability
CVE-2018-8407 - MSRPC Information Disclosure Vulnerability
CVE-2018-8415 - Microsoft PowerShell Tampering Vulnerability
CVE-2018-8417 - Microsoft JScript Security Feature Bypass Vulnerability
CVE-2018-8454 - Windows Audio Service Information Disclosure Vulnerability
CVE-2018-8471 - Microsoft RemoteFX Virtual GPU miniport driver Elevation of Privilege Vulnerability
CVE-2018-8476 - Windows Deployment Services TFTP Server Remote Code Execution Vulnerability
CVE-2018-8485 - DirectX Elevation of Privilege Vulnerability

CVE-2018-8553 - Microsoft Graphics Components Remote Code Execution Vulnerability
CVE-2018-8554 - DirectX Elevation of Privilege Vulnerability
CVE-2018-8561 - DirectX Elevation of Privilege Vulnerability
CVE-2018-8562 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8563 - DirectX Information Disclosure Vulnerability
CVE-2018-8565 - Win32k Information Disclosure Vulnerability
CVE-2018-8566 - BitLocker Security Feature Bypass Vulnerability
CVE-2018-8572 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8581 - Microsoft Exchange Server Elevation of Privilege Vulnerability
CVE-2018-8600 - Azure App Service Cross-site Scripting Vulnerability
CVE-2018-8589 - Windows Win32k Elevation of Privilege Vulnerability
CVE-2018-8592 - Windows Elevation Of Privilege Vulnerability
CVE-2018-8605 - Microsoft Dynamics 365 (on-premises) version 8 Cross Site Scripting Vulnerability
CVE-2018-8606 - Microsoft Dynamics 365 (on-premises) version 8 Cross Site Scripting Vulnerability
CVE-2018-8607 - Microsoft Dynamics 365 (on-premises) version 8 Cross Site Scripting Vulnerability
CVE-2018-8608 - Microsoft Dynamics 365 (on-premises) version 8 Cross Site Scripting Vulnerability
CVE-2018-8609 - Microsoft Dynamics 365 (on-premises) version 8 Remote Code Execution Vulnerability
CVE-2018-8408 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8450 - Windows Search Remote Code Execution Vulnerability
CVE-2018-8544 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2018-8547 - Active Directory Federation Services XSS Vulnerability
CVE-2018-8549 - Windows Security Feature Bypass Vulnerability
CVE-2018-8550 - Windows COM Elevation of Privilege Vulnerability
CVE-2018-8568 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8578 - Microsoft SharePoint Information Disclosure Vulnerability
CVE-2018-8584 - Windows ALPC Elevation of Privilege Vulnerability
ADV180028 - Guidance for configuring BitLocker to enforce software encryption
CVE-2018-8602 - Team Foundation Server Cross-site Scripting Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Microsoft Dynamics 365 (on-premises) version 8
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems

MS18-OCT: Microsoft Internet Explorer Security Update — High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their October 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-8460 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8491 - Internet Explorer Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems

MS18-OCT: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-8320 - Windows DNS Security Feature Bypass Vulnerability
CVE-2018-8329 - Linux On Windows Elevation Of Privilege Vulnerability
CVE-2018-8330 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8333 - Microsoft Filter Manager Elevation Of Privilege Vulnerability
CVE-2018-8411 - NTFS Elevation of Privilege Vulnerability
CVE-2018-8413 - Windows Theme API Remote Code Execution Vulnerability
CVE-2018-8453 - Win32k Elevation of Privilege Vulnerability
CVE-2018-8480 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8481 - Windows Media Player Information Disclosure Vulnerability
CVE-2018-8482 - Windows Media Player Information Disclosure Vulnerability
CVE-2018-8484 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8486 - DirectX Information Disclosure Vulnerability
CVE-2018-8488 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8506 - Microsoft Windows Codecs Library Information Disclosure Vulnerability
CVE-2018-8518 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8423 - Microsoft JET Database Engine Remote Code Execution Vulnerability

CVE-2018-8265 - Microsoft Exchange Remote Code Execution Vulnerability
CVE-2018-8448 - Microsoft Exchange Server Elevation of Privilege Vulnerability
CVE-2018-8472 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8489 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2018-8490 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2018-8492 - Device Guard Code Integrity Policy Security Feature Bypass Vulnerability
CVE-2018-8493 - Windows TCP/IP Information Disclosure Vulnerability
CVE-2018-8494 - MS XML Remote Code Execution Vulnerability
CVE-2018-8495 - Windows Shell Remote Code Execution Vulnerability
CVE-2018-8497 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8498 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8500 - Scripting Engine Memory Corruption Vulnerability
CVE-2010-3190 - MFC Insecure Library Loading Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft Exchange Server 2016
Microsoft Exchange Server 2013
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Windows 8.1 for 32-bit systems
Microsoft Exchange Server 2013 Cumulative Update 21
Microsoft Exchange Server 2016 Cumulative Update 10
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1809 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Microsoft Exchange Server 2010 Service Pack 3
Windows Server, version 1803 (Server Core Installation)
Windows 7 for 32-bit Systems Service Pack 1

Windows RT 8.1
Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

MS18-SEP: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their September 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2018-8315 - Microsoft Scripting Engine Information Disclosure Vulnerability
CVE-2018-8461 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8447 - Internet Explorer Memory Corruption Vulnerability
CVE-2018-8452 - Scripting Engine Information Disclosure Vulnerability
CVE-2018-8457 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8470 - Internet Explorer Security Feature Bypass Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems

Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS18-SEP: Microsoft Windows Security Update — High

Solution Details

Microsoft has released a fix for this flaw in their September 2018 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2018-0965 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2018-8269 - OData Denial of Service Vulnerability
CVE-2018-8271 - Windows Information Disclosure Vulnerability
CVE-2018-8335 - Windows SMB Denial of Service Vulnerability

CVE-2018-8336 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8410 - Windows Registry Elevation of Privilege Vulnerability
CVE-2018-8419 - Windows Kernel Information Disclosure Vulnerability
ADV180022 - Windows Denial of Service Vulnerability
CVE-2018-8420 - MS XML Remote Code Execution Vulnerability
CVE-2018-8422 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8424 - Windows GDI Information Disclosure Vulnerability
CVE-2018-8433 - Microsoft Graphics Component Information Disclosure Vulnerability
CVE-2018-8462 - DirectX Graphics Kernel Elevation of Privilege Vulnerability
CVE-2018-8475 - Windows Remote Code Execution Vulnerability
CVE-2018-8337 - Windows Subsystem for Linux Security Feature Bypass Vulnerability
CVE-2018-8391 - Scripting Engine Memory Corruption Vulnerability
CVE-2018-8392 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2018-8393 - Microsoft JET Database Engine Remote Code Execution Vulnerability
CVE-2018-8426 - Microsoft Office SharePoint XSS Vulnerability
CVE-2018-8428 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8431 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2018-8434 - Windows Hyper-V Information Disclosure Vulnerability
CVE-2018-8435 - Windows Hyper-V Security Feature Bypass Vulnerability
CVE-2018-8436 - Windows Hyper-V Denial of Service Vulnerability
CVE-2018-8437 - Windows Hyper-V Denial of Service Vulnerability
CVE-2018-8438 - Windows Hyper-V Denial of Service Vulnerability
CVE-2018-8439 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2018-8440 - Windows ALPC Elevation of Privilege Vulnerability
CVE-2018-8441 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2018-8442 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8443 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8444 - Windows SMB Information Disclosure Vulnerability
CVE-2018-8445 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8446 - Windows Kernel Information Disclosure Vulnerability
CVE-2018-8449 - Device Guard Security Feature Bypass Vulnerability
CVE-2018-8455 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2018-8468 - Windows Elevation of Privilege Vulnerability
CVE-2018-8474 - Lync for Mac 2011 Security Feature Bypass Vulnerability
CVE-2018-8479 - Azure IoT SDK Spoofing Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Microsoft.Data.OData
Windows 10 Version 1803 for x64-based Systems
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1

Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows 8.1 for x64-based systems
Windows Server 2012 R2
ChakraCore
Microsoft SharePoint Server 2010 Service Pack 2
Windows 8.1 for 32-bit systems
Microsoft Lync for Mac 2011
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server, version 1803 (Server Core Installation)
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
C SDK for Azure IoT
Windows Server 2016
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Server, version 1709 (Server Core Installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS19-APR: Microsoft Internet Explorer Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-0764 - Microsoft Browsers Tampering Vulnerability
CVE-2019-0752 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0753 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0835 - Microsoft Scripting Engine Information Disclosure Vulnerability
CVE-2019-0862 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems

Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their April 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS19-APR: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0790 - MS XML Remote Code Execution Vulnerability
CVE-2019-0791 - MS XML Remote Code Execution Vulnerability
CVE-2019-0792 - MS XML Remote Code Execution Vulnerability
CVE-2019-0793 - MS XML Remote Code Execution Vulnerability
CVE-2019-0794 - OLE Automation Remote Code Execution Vulnerability
CVE-2019-0795 - MS XML Remote Code Execution Vulnerability
CVE-2019-0802 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0803 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0805 - Windows Elevation of Privilege Vulnerability
CVE-2019-0815 - ASP.NET Core Denial of Service Vulnerability
CVE-2019-0830 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0831 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0838 - Windows Information Disclosure Vulnerability
CVE-2019-0839 - Windows Information Disclosure Vulnerability
CVE-2019-0840 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0841 - Windows Elevation of Privilege Vulnerability
CVE-2019-0842 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-0844 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0845 - Windows IOleCvt Interface Remote Code Execution Vulnerability
CVE-2019-0846 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0847 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0848 - Win32k Information Disclosure Vulnerability
CVE-2019-0849 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0851 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0853 - GDI+ Remote Code Execution Vulnerability
CVE-2019-0877 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0879 - Jet Database Engine Remote Code Execution Vulnerability
ADV990001 - Latest Servicing Stack Updates

CVE-2019-0685 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0688 - Windows TCP/IP Information Disclosure Vulnerability
CVE-2019-0730 - Windows Elevation of Privilege Vulnerability
CVE-2019-0731 - Windows Elevation of Privilege Vulnerability
CVE-2019-0732 - Windows Security Feature Bypass Vulnerability
CVE-2019-0735 - Windows CSRSS Elevation of Privilege Vulnerability
CVE-2019-0786 - SMB Server Elevation of Privilege Vulnerability
CVE-2019-0796 - Windows Elevation of Privilege Vulnerability
CVE-2019-0813 - Windows Admin Center Elevation of Privilege Vulnerability
CVE-2019-0814 - Win32k Information Disclosure Vulnerability
CVE-2019-0836 - Windows Elevation of Privilege Vulnerability
CVE-2019-0837 - DirectX Information Disclosure Vulnerability
CVE-2019-0856 - Windows Remote Code Execution Vulnerability
CVE-2019-0857 - Azure DevOps Server Spoofing Vulnerability
CVE-2019-0859 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0866 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0867 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0868 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0869 - Azure DevOps Server HTML Injection Vulnerability
CVE-2019-0870 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0871 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0874 - Azure DevOps Server Cross-site Scripting Vulnerability
CVE-2019-0875 - Azure DevOps Server Elevation of Privilege Vulnerability
CVE-2019-0876 - Open Enclave SDK Information Disclosure Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Windows Admin Center
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Open Enclave SDK
ASP.NET Core 2.2
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Microsoft SharePoint Server 2010 Service Pack 2
Windows 8.1 for 32-bit systems

Team Foundation Server 2018 Updated 1.2
Team Foundation Server 2017 Update 3.1
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Team Foundation Server 2018 Update 3.2
Windows 10 Version 1803 for 32-bit Systems
Azure DevOps Server 2019
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows 7 for 32-bit Systems Service Pack 1
Windows RT 8.1
Windows Server, version 1803 (Server Core Installation)
Microsoft SharePoint Foundation 2010 Service Pack 2
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Microsoft SharePoint Foundation 2013 Service Pack 1
Windows 10 Version 1803 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Team Foundation Server 2015 Update 4.2
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Microsoft SharePoint Server 2019
Windows Server, version 1709 (Server Core Installation)

MS19-AUG: Microsoft Internet Explorer Security Update — High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-1133 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1192 - Microsoft Browsers Security Feature Bypass Vulnerability
CVE-2019-1193 - Microsoft Browser Memory Corruption Vulnerability
CVE-2019-1194 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems

Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems

Internet Explorer 11 on Windows Server 2012
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their August 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

CVSS Base Score: 7.5

MS19-AUG: Microsoft Windows Security Update

High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0965 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-1057 - MS XML Remote Code Execution Vulnerability
CVE-2019-9506 - Encryption Key Negotiation of Bluetooth Vulnerability
CVE-2019-1171 - SymCrypt Information Disclosure Vulnerability
CVE-2019-1172 - Windows Information Disclosure Vulnerability
CVE-2019-1173 - Windows Elevation of Privilege Vulnerability
CVE-2019-1174 - Windows Elevation of Privilege Vulnerability
CVE-2019-1175 - Windows Elevation of Privilege Vulnerability
CVE-2019-1178 - Windows Elevation of Privilege Vulnerability
CVE-2019-1179 - Windows Elevation of Privilege Vulnerability
CVE-2019-1180 - Windows Elevation of Privilege Vulnerability
CVE-2019-1181 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-1182 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-1183 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-1206 - Windows DHCP Server Denial of Service Vulnerability
CVE-2019-0714 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0715 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0716 - Windows Denial of Service Vulnerability
CVE-2019-0717 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0718 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0720 - Hyper-V Remote Code Execution Vulnerability
CVE-2019-0723 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0736 - Windows DHCP Client Remote Code Execution Vulnerability
CVE-2019-1078 - Microsoft Graphics Component Information Disclosure Vulnerability
CVE-2019-1143 - Windows Graphics Component Information Disclosure Vulnerability
CVE-2019-1144 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2019-1145 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2019-1146 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-1147 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-1150 - Microsoft Graphics Remote Code Execution Vulnerability
CVE-2019-1152 - Microsoft Graphics Remote Code Execution Vulnerability

CVE-2019-1154 - Windows Graphics Component Information Disclosure Vulnerability
CVE-2019-1156 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-1157 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-1158 - Windows Graphics Component Information Disclosure Vulnerability
CVE-2019-1159 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2019-1161 - Microsoft Defender Elevation of Privilege Vulnerability
CVE-2019-1162 - Windows ALPC Elevation of Privilege Vulnerability
CVE-2019-1163 - Windows File Signature Security Feature Bypass Vulnerability
CVE-2019-1164 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2019-1168 - Microsoft Windows p2pimsvc Elevation of Privilege Vulnerability
CVE-2019-1169 - Win32k Elevation of Privilege Vulnerability
CVE-2019-1170 - Windows NTFS Elevation of Privilege Vulnerability
CVE-2019-1176 - DirectX Elevation of Privilege Vulnerability
CVE-2019-1177 - Windows Elevation of Privilege Vulnerability
CVE-2019-1184 - Windows Elevation of Privilege Vulnerability
CVE-2019-1185 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2019-1186 - Windows Elevation of Privilege Vulnerability
CVE-2019-1187 - XmlLite Runtime Denial of Service Vulnerability
CVE-2019-1190 - Windows Image Elevation of Privilege Vulnerability
ADV190023 - Microsoft Guidance for Enabling LDAP Channel Binding and LDAP Signing
CVE-2019-1188 - LNK Remote Code Execution Vulnerability
CVE-2019-1198 - Microsoft Windows Elevation of Privilege Vulnerability
CVE-2019-9511 - HTTP/2 Server Denial of Service Vulnerability
CVE-2019-9512 - HTTP/2 Server Denial of Service Vulnerability
CVE-2019-9513 - HTTP/2 Server Denial of Service Vulnerability
CVE-2019-9514 - HTTP/2 Server Denial of Service Vulnerability
CVE-2019-1211 - Git for Visual Studio Elevation of Privilege Vulnerability
CVE-2019-1212 - Windows DHCP Server Denial of Service Vulnerability
CVE-2019-1213 - Windows DHCP Server Remote Code Execution Vulnerability
CVE-2019-9518 - HTTP/2 Server Denial of Service Vulnerability
CVE-2019-1222 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-1223 - Windows Remote Desktop Protocol (RDP) Denial of Service Vulnerability
CVE-2019-1224 - Remote Desktop Protocol Server Information Disclosure Vulnerability
CVE-2019-1225 - Remote Desktop Protocol Server Information Disclosure Vulnerability
CVE-2019-1226 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-1227 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1228 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1229 - Dynamics On-Premise Elevation of Privilege Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows Defender on Windows Server 2012
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Windows Server, version 1903 (Server Core installation)
Windows Defender on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)

Windows Server 2019
Microsoft Visual Studio 2019 version 16.0
Windows Defender on Windows Server 2016 (Server Core installation)
Microsoft System Center 2012 R2 Endpoint Protection
Windows Defender on Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1803 for x64-based Systems
Windows 10 Version 1703 for x64-based Systems
Microsoft Visual Studio 2017 version 15.9
Windows Defender on Windows Server 2016
Windows 8.1 for x64-based systems
Windows Defender on Windows 7 for 32-bit Systems Service Pack 1
Microsoft Visual Studio 2017
Windows 10 Version 1903 for 32-bit Systems
Microsoft Visual Studio 2019 version 16.2
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1903 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1709 for 32-bit Systems
Windows Defender on Windows RT 8.1
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows Defender on Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Microsoft Security Essentials
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1903 for ARM64-based Systems
Windows Defender on Windows 10 for 32-bit Systems
Windows Defender on Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Defender on Windows 10 for x64-based Systems
Windows 10 Version 1809 for x64-based Systems
Microsoft System Center 2012 Endpoint Protection
Microsoft Forefront Endpoint Protection 2010
Windows Defender on Windows 8.1 for 32-bit systems
Windows Defender on Windows 10 Version 1703 for x64-based Systems
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows Defender on Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Defender on Windows 10 Version 1607 for 32-bit Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Windows Defender on Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Windows Defender on Windows 10 Version 1607 for x64-based Systems
Windows Defender on Windows 10 Version 1709 for 32-bit Systems

Windows Defender on Windows 8.1 for x64-based systems
Windows Defender on Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Defender on Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Microsoft Dynamics 365 (on-premises) version 9.0
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Windows Defender on Windows Server 2012 R2
Windows 10 Version 1803 for ARM64-based Systems
Microsoft System Center Endpoint Protection
Windows Defender on Windows Server 2012 (Server Core installation)
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows Defender on Windows 10 Version 1703 for 32-bit Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Windows Defender on Windows 7 for x64-based Systems Service Pack 1

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their August 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-DEC: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their December 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-1485 - VBScript Remote Code Execution Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems

Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1909 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1909 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1909 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows Server 2012
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

CVSS Base Score: 7.5

MS19-DEC: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-1453 - Windows Remote Desktop Protocol (RDP) Denial of Service Vulnerability
CVE-2019-1470 - Windows Hyper-V Information Disclosure Vulnerability
CVE-2019-1471 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-1472 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1474 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1480 - Windows Media Player Information Disclosure Vulnerability
CVE-2019-1481 - Windows Media Player Information Disclosure Vulnerability
CVE-2019-1483 - Windows Elevation of Privilege Vulnerability
CVE-2019-1484 - Windows OLE Remote Code Execution Vulnerability
CVE-2019-1487 - Microsoft Authentication Library for Android Information Disclosure Vulnerability
CVE-2019-1488 - Microsoft Defender Security Feature Bypass Vulnerability
CVE-2019-1489 - Remote Desktop Protocol Information Disclosure Vulnerability
ADV990001 - Latest Servicing Stack Updates
CVE-2019-1349 - Git for Visual Studio Remote Code Execution Vulnerability
CVE-2019-1350 - Git for Visual Studio Remote Code Execution Vulnerability
CVE-2019-1351 - Git for Visual Studio Tampering Vulnerability
CVE-2019-1352 - Git for Visual Studio Remote Code Execution Vulnerability
CVE-2019-1354 - Git for Visual Studio Remote Code Execution Vulnerability
CVE-2019-1387 - Git for Visual Studio Remote Code Execution Vulnerability
CVE-2019-1458 - Win32k Elevation of Privilege Vulnerability
CVE-2019-1465 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1466 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1467 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1468 - Win32k Graphics Remote Code Execution Vulnerability
CVE-2019-1469 - Win32k Information Disclosure Vulnerability
CVE-2019-1476 - Windows Elevation of Privilege Vulnerability

CVE-2019-1477 - Windows Printer Service Elevation of Privilege Vulnerability
CVE-2019-1478 - Windows COM Server Elevation of Privilege Vulnerability
ADV190026 - Microsoft Guidance for cleaning up orphaned keys generated on vulnerable TPMs and used for Windows Hello for Business
CVE-2019-1486 - Visual Studio Live Share Spoofing Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Visual Studio 2019 version 16.4 (includes 16.0 - 16.3)
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Windows Server, version 1903 (Server Core installation)
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Microsoft Visual Studio 2019 version 16.0
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Microsoft Windows XP Service Pack 3
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Windows Server, version 1909 (Server Core installation)
Windows 10 Version 1909 for x64-based Systems
Microsoft Visual Studio Live Share extension
Windows 10 Version 1903 for 32-bit Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1909 for ARM64-based Systems
Microsoft Visual Studio 2017 version 15.9 (includes 15.1 - 15.8)
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1903 for x64-based Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Microsoft Visual Studio 2017 version 16.0
Windows 10 Version 1909 for 32-bit Systems
Microsoft Authentication Library (MSAL) for Android

Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 for x64-based Systems
Windows 10 Version 1803 for ARM64-based Systems
Windows 10 Version 1903 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Microsoft Visual Studio 2017 version 15.0
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
None Available

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their December 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-FEB: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their February 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-0606 - Internet Explorer Memory Corruption Vulnerability
CVE-2019-0654 - Microsoft Browser Spoofing Vulnerability
CVE-2019-0676 - Internet Explorer Information Disclosure Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows Server 2012 R2

Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Visual Studio Code
Microsoft Exchange Server 2013 Cumulative Update 22
Windows 10 Version 1803 for x64-based Systems
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 8.1 for x64-based systems
Microsoft Exchange Server 2019 Cumulative Update 1
Windows Server 2012 R2
Microsoft SharePoint Server 2010 Service Pack 2
Windows 8.1 for 32-bit systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1

Java SDK for Azure IoT
Team Foundation Server 2018 Update 3.2
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Microsoft Exchange Server 2016 Cumulative Update 12
Windows 10 Version 1809 for 32-bit Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft SharePoint Foundation 2013 Service Pack 1
Windows 10 Version 1803 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Microsoft SharePoint Server 2019
Windows Server, version 1709 (Server Core Installation)

Solution Details

Microsoft has released a fix for this flaw in their February 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-JAN: Microsoft Windows Security Update

High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0538 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0536 - Windows Kernel Information Disclosure Vulnerability
ADV990001 - Latest Servicing Stack Updates
CVE-2019-0537 - Microsoft Visual Studio Information Disclosure Vulnerability
CVE-2019-0546 - Visual Studio Remote Code Execution Vulnerability
CVE-2019-0543 - Microsoft Windows Elevation of Privilege Vulnerability
CVE-2019-0547 - Windows DHCP Client Remote Code Execution Vulnerability
CVE-2019-0549 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0550 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-0551 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-0552 - Windows COM Elevation of Privilege Vulnerability
CVE-2019-0553 - Windows Subsystem for Linux Information Disclosure Vulnerability
CVE-2019-0554 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0555 - Microsoft XmlDocument Elevation of Privilege Vulnerability
CVE-2019-0556 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0557 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0558 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0562 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2019-0569 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0570 - Windows Runtime Elevation of Privilege Vulnerability
CVE-2019-0571 - Windows Data Sharing Service Elevation of Privilege Vulnerability
CVE-2019-0572 - Windows Data Sharing Service Elevation of Privilege Vulnerability
CVE-2019-0573 - Windows Data Sharing Service Elevation of Privilege Vulnerability
CVE-2019-0574 - Windows Data Sharing Service Elevation of Privilege Vulnerability
CVE-2019-0575 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0576 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0577 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0578 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0579 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0580 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0581 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0582 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0583 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0584 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0586 - Microsoft Exchange Memory Corruption Vulnerability
CVE-2019-0588 - Microsoft Exchange Information Disclosure Vulnerability
CVE-2019-0622 - Skype for Android Elevation of Privilege Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems

Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Microsoft Exchange Server 2010 Service Pack 3 Update Rollup 25
Windows Server 2019
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Microsoft Business Productivity Servers 2010 Service Pack 2
Windows 10 Version 1803 for x64-based Systems
Microsoft Exchange Server 2016 Cumulative Update 11
Microsoft SharePoint Enterprise Server 2013 Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Microsoft Visual Studio 2017 version 15.9
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Microsoft Visual Studio 2012 Update 5
Windows 8.1 for 32-bit systems
Microsoft Exchange Server 2013 Cumulative Update 21
Microsoft Exchange Server 2019
Microsoft Exchange Server 2016 Cumulative Update 10
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Microsoft Visual Studio 2010 Service Pack 1
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1803 for ARM64-based Systems
Skype 8.35 when installed on Android Devices
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Microsoft SharePoint Server 2019
Windows Server, version 1709 (Server Core Installation)

Solution Details

Microsoft has released a fix for this flaw in their January 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

CVSS Base Score: 9.8

MS19-JUL: Microsoft Internet Explorer Security Update | High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-1056 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1059 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1063 - Internet Explorer Memory Corruption Vulnerability
CVE-2019-1104 - Microsoft Browser Memory Corruption Vulnerability
CVE-2019-1001 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1004 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1903 for 32-bit Systems
ChakraCore

Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows Server 2012
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their July 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS19-JUL: Microsoft SQL Server Security Update High

Solution Details

Microsoft has released a fix for this flaw in their July 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft SQL Server which include fixes for the following vulnerabilities:

CVE-2019-1068 - Microsoft SQL Server Remote Code Execution Vulnerability

Affected Products:
Microsoft SQL Server 2016 for x64-based Systems Service Pack 2 (GDR)
Microsoft SQL Server 2017 for x64-based Systems (GDR)
Microsoft SQL Server 2014 Service Pack 2 for 32-bit Systems (CU+GDR)
Microsoft SQL Server 2014 Service Pack 2 for x64-based Systems (CU+GDR)
Microsoft SQL Server 2017 for x64-based Systems (CU+GDR)
Microsoft SQL Server 2016 for x64-based Systems Service Pack 2 (CU+GDR)
Microsoft SQL Server 2014 Service Pack 3 for x64-based Systems (CU+GDR)
Microsoft SQL Server 2014 Service Pack 2 for 32-bit Systems (GDR)
Microsoft SQL Server 2014 Service Pack 3 for x64-based Systems (GDR)
Microsoft SQL Server 2016 for x64-based Systems Service Pack 1 (GDR)
Microsoft SQL Server 2016 for x64-based Systems Service Pack 1 (CU+GDR)
Microsoft SQL Server 2014 Service Pack 3 for 32-bit Systems (GDR)
Microsoft SQL Server 2014 Service Pack 3 for 32-bit Systems (CU+GDR)
Microsoft SQL Server 2014 Service Pack 2 for x64-based Systems (GDR)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

MS19-JUL: Microsoft Windows Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0865 - SymCrypt Denial of Service Vulnerability
CVE-2019-0887 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-0966 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0975 - ADFS Security Feature Bypass Vulnerability
CVE-2019-1071 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1072 - Azure DevOps Server and Team Foundation Server Remote Code Execution Vulnerability
CVE-2019-1073 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-1076 - Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-1093 - DirectWrite Information Disclosure Vulnerability
CVE-2019-1094 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1095 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1096 - Win32k Information Disclosure Vulnerability
CVE-2019-1097 - DirectWrite Information Disclosure Vulnerability
CVE-2019-1098 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1099 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1100 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1101 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1102 - GDI+ Remote Code Execution Vulnerability
CVE-2019-1116 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1117 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1118 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1119 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1120 - DirectWrite Remote Code Execution Vulnerability

CVE-2019-1121 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1122 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1123 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1124 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1126 - ADFS Security Feature Bypass Vulnerability
CVE-2019-1127 - DirectWrite Remote Code Execution Vulnerability
CVE-2019-1128 - DirectWrite Remote Code Execution Vulnerability
ADV990001 - Latest Servicing Stack Updates
CVE-2019-0785 - Windows DHCP Server Remote Code Execution Vulnerability
CVE-2019-0811 - Windows DNS Server Denial of Service Vulnerability
CVE-2019-0880 - Microsoft splwow64 Elevation of Privilege Vulnerability
CVE-2019-0962 - Azure Automation Elevation of Privilege Vulnerability
CVE-2019-0999 - DirectX Elevation of Privilege Vulnerability
CVE-2019-1037 - Windows Error Reporting Elevation of Privilege Vulnerability
CVE-2019-1067 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2019-1074 - Microsoft Windows Elevation of Privilege Vulnerability
CVE-2019-1075 - ASP.NET Core Spoofing Vulnerability
CVE-2019-1077 - Visual Studio Elevation of Privilege Vulnerability
CVE-2019-1079 - Visual Studio Information Disclosure Vulnerability
CVE-2019-1082 - Microsoft Windows Elevation of Privilege Vulnerability
CVE-2019-1085 - Windows WLAN Service Elevation of Privilege Vulnerability
CVE-2019-1086 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1087 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1088 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1089 - Windows RPCSS Elevation of Privilege Vulnerability
CVE-2019-1090 - Windows dnsrlvr.dll Elevation of Privilege Vulnerability
CVE-2019-1091 - Microsoft unistore.dll Information Disclosure Vulnerability
CVE-2019-1108 - Remote Desktop Protocol Client Information Disclosure Vulnerability
CVE-2019-1129 - Windows Elevation of Privilege Vulnerability
CVE-2019-1130 - Windows Elevation of Privilege Vulnerability
CVE-2019-1132 - Win32k Elevation of Privilege Vulnerability

Affected Products:
ASP.NET Core 2.1
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Visual Studio 2019 version 16.1
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Windows Server, version 1903 (Server Core installation)
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Azure Automation
Microsoft Visual Studio 2013 Update 5
Windows Server 2012
Windows Server 2019
Microsoft Visual Studio 2019 version 16.0
ASP.NET Core 2.2
Windows 7 for x64-based Systems Service Pack 1

Windows 10 Version 1803 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1703 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Windows 10 Version 1709 for x64-based Systems
Microsoft Visual Studio 2017 version 15.9
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Microsoft Visual Studio 2012 Update 5
Windows 8.1 for 32-bit systems
Team Foundation Server 2012 Update 4
Team Foundation Server 2017 Update 3.1
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Windows 10 Version 1903 for 32-bit Systems
Team Foundation Server 2010 SP1 (x86)
Team Foundation Server 2018 Update 3.2
Windows 10 Version 1803 for 32-bit Systems
Team Foundation Server 2013 Update 5
Windows 10 Version 1607 for x64-based Systems
Windows 10 Version 1903 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1809 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Azure DevOps Server 2019.0.1
Microsoft Visual Studio 2010 Service Pack 1
Microsoft Visual Studio 2015 Update 3
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1703 for 32-bit Systems
Team Foundation Server 2018 Update 1.2
Windows 10 Version 1803 for ARM64-based Systems
Team Foundation Server 2010 SP1 (x64)
Windows 10 Version 1903 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Team Foundation Server 2015 Update 4.2
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)

MS19-JUN: Microsoft Internet Explorer Security Update — High

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-0988 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1055 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0920 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1005 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1038 - Microsoft Browser Memory Corruption Vulnerability
CVE-2019-1080 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1081 - Microsoft Browser Information Disclosure Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems

Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows Server 2012
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their June 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-JUN: Microsoft Windows Security Update High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0888 - ActiveX Data Objects (ADO) Remote Code Execution Vulnerability
CVE-2019-0904 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0905 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0906 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0907 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0908 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0909 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0941 - Microsoft IIS Server Denial of Service Vulnerability
CVE-2019-0943 - Windows ALPC Elevation of Privilege Vulnerability
CVE-2019-0948 - Windows Event Viewer Information Disclosure Vulnerability
CVE-2019-0959 - Windows Common Log File System Driver Elevation of Privilege Vulnerability
CVE-2019-0972 - Local Security Authority Subsystem Service Denial of Service Vulnerability
CVE-2019-0973 - Windows Installer Elevation of Privilege Vulnerability

CVE-2019-0974 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0984 - Windows Common Log File System Driver Elevation of Privilege Vulnerability
CVE-2019-1009 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1010 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1011 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1012 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1013 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1014 - Win32k Elevation of Privilege Vulnerability
CVE-2019-1015 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1016 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1017 - Win32k Elevation of Privilege Vulnerability
CVE-2019-1018 - DirectX Elevation of Privilege Vulnerability
CVE-2019-1029 - Skype for Business and Lync Server Denial of Service Vulnerability
CVE-2019-1046 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1047 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1048 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1049 - Windows GDI Information Disclosure Vulnerability
CVE-2019-1050 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0620 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-0709 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-0710 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0711 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0713 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0722 - Windows Hyper-V Remote Code Execution Vulnerability
CVE-2019-0960 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0968 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0977 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0983 - Windows Storage Service Elevation of Privilege Vulnerability
CVE-2019-0985 - Microsoft Speech API Remote Code Execution Vulnerability
CVE-2019-0986 - Windows User Profile Service Elevation of Privilege Vulnerability
CVE-2019-0996 - Azure DevOps Server Spoofing Vulnerability
CVE-2019-0998 - Windows Storage Service Elevation of Privilege Vulnerability
CVE-2019-1007 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1019 - Microsoft Windows Security Feature Bypass Vulnerability
CVE-2019-1021 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1022 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1025 - Windows Denial of Service Vulnerability
CVE-2019-1026 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1027 - Windows Audio Service Elevation of Privilege Vulnerability
CVE-2019-1028 - Windows Audio Service Elevation of Privilege Vulnerability

Solution Details

Microsoft has released a fix for this flaw in their June 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-MAR: Microsoft Internet Explorer Security Update — High

Solution Details

Microsoft has released a fix for this flaw in their March 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-0609 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0746 - Chakra Scripting Engine Memory Corruption Vulnerability
CVE-2019-0761 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2019-0762 - Microsoft Browsers Security Feature Bypass Vulnerability

CVE-2019-0763 - Internet Explorer Memory Corruption Vulnerability
CVE-2019-0768 - Internet Explorer Security Feature Bypass Vulnerability
CVE-2019-0780 - Microsoft Browser Memory Corruption Vulnerability
CVE-2019-0783 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0665 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-0666 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-0667 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-0680 - Scripting Engine Memory Corruption Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems

Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems
Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

CVSS Base Score: 7.5

MS19-MAR: Microsoft Windows Security Update

High

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0754 - Windows Denial of Service Vulnerability
CVE-2019-0755 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0756 - MS XML Remote Code Execution Vulnerability
CVE-2019-0759 - Windows Print Spooler Information Disclosure Vulnerability
CVE-2019-0765 - Comctl32 Remote Code Execution Vulnerability
CVE-2019-0766 - Microsoft Windows Elevation of Privilege Vulnerability
CVE-2019-0767 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0772 - Windows VBScript Engine Remote Code Execution Vulnerability
CVE-2019-0774 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0775 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0776 - Win32k Information Disclosure Vulnerability
CVE-2019-0777 - Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0778 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0782 - Windows Kernel Information Disclosure Vulnerability
CVE-2019-0784 - Windows ActiveX Remote Code Execution Vulnerability
CVE-2019-0797 - Win32k Elevation of Privilege Vulnerability
ADV190009 - SHA-2 Code Sign Support Advisory
CVE-2019-0798 - Skype for Business and Lync Spoofing Vulnerability
ADV190010 - Best Practices Regarding Sharing of a Single User Account Across Multiple Users
CVE-2019-0808 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0816 - Azure SSH Keypairs Security Feature Bypass Vulnerability
ADV990001 - Latest Servicing Stack Updates
CVE-2019-0603 - Windows Deployment Services TFTP Server Remote Code Execution Vulnerability
CVE-2019-0614 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0617 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0682 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2019-0683 - Active Directory Elevation of Privilege Vulnerability
CVE-2019-0689 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2019-0690 - Windows Hyper-V Denial of Service Vulnerability
CVE-2019-0692 - Windows Subsystem for Linux Elevation of Privilege Vulnerability
CVE-2019-0693 - Windows Subsystem for Linux Elevation of Privilege Vulnerability

CVE-2019-0703 - Windows SMB Information Disclosure Vulnerability
CVE-2019-0704 - Windows SMB Information Disclosure Vulnerability
CVE-2019-0726 - Windows DHCP Client Remote Code Execution Vulnerability
CVE-2019-0809 - Visual Studio Remote Code Execution Vulnerability
CVE-2019-0821 - Windows SMB Information Disclosure Vulnerability

Affected Products:
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Microsoft Lync Server 2013 July 2018 Update
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Microsoft Visual Studio 2017 version 15.9
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Team Foundation Server 2018 Updated 1.2
UbuntuServer:18.04-LTS
Team Foundation Server 2017 Update 3.1
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Team Foundation Server 2018 Update 3.2
Windows 10 Version 1803 for 32-bit Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Skype for Business Server 2015 March 2019 Update
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Windows Server 2008 for x64-based Systems Service Pack 2
Microsoft SharePoint Foundation 2013 Service Pack 1

Windows 10 Version 1803 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Windows Server 2016
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
None Available
Windows Server, version 1709 (Server Core Installation)

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Solution Details

Microsoft has released a fix for this flaw in their March 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-MAY: Microsoft Internet Explorer Security Update High

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-0884 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0911 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0918 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-0921 - Internet Explorer Spoofing Vulnerability
CVE-2019-0929 - Internet Explorer Memory Corruption Vulnerability
CVE-2019-0930 - Internet Explorer Information Disclosure Vulnerability
CVE-2019-0940 - Microsoft Browser Memory Corruption Vulnerability
CVE-2019-0995 - Internet Explorer Security Feature Bypass Vulnerability

Affected Products:
Internet Explorer 11 on Windows 10 Version 1703 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1703 for 32-bit Systems

Microsoft Edge on Windows 10 Version 1803 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1607 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Microsoft Edge on Windows Server 2016
Microsoft Edge on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Microsoft Edge on Windows 10 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for ARM64-based Systems
Microsoft Edge on Windows 10 Version 1903 for 32-bit Systems
ChakraCore
Internet Explorer 11 on Windows Server 2008 R2 for x64-based Systems Service Pack 1
Microsoft Edge on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for 32-bit Systems
Internet Explorer 11 on Windows Server 2016
Internet Explorer 11 on Windows 10 Version 1803 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for x64-based Systems
Microsoft Edge on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows RT 8.1
Microsoft Edge on Windows 10 Version 1809 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Microsoft Edge on Windows 10 Version 1709 for 32-bit Systems
Microsoft Edge on Windows 10 Version 1703 for x64-based Systems
Microsoft Edge on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
Microsoft Edge on Windows 10 Version 1809 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1809 for 32-bit Systems

Internet Explorer 11 on Windows 7 for x64-based Systems Service Pack 1
Internet Explorer 11 on Windows Server 2012
Internet Explorer 9 on Windows Server 2008 for x64-based Systems Service Pack 2

Solution Details

Microsoft has released a fix for this flaw in their May 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

MS19-MAY: Microsoft Windows Security Update (ZombieLoad) High

Solution Details

Microsoft has released a fix for this flaw in their May 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

Vulnerability Details

Microsoft has released cumulative security updates for Microsoft Windows which include fixes for the following vulnerabilities:

CVE-2019-0863 - Windows Error Reporting Elevation of Privilege Vulnerability

CVE-2019-0882 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0886 - Windows Hyper-V Information Disclosure Vulnerability
CVE-2019-0892 - Win32k Elevation of Privilege Vulnerability
CVE-2019-0893 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0894 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0895 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0896 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0897 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0898 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0899 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0900 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0901 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0902 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0903 - GDI+ Remote Code Execution Vulnerability
CVE-2019-0932 - Skype for Android Information Disclosure Vulnerability
CVE-2019-0942 - Unified Write Filter Elevation of Privilege Vulnerability
CVE-2019-0956 - Microsoft SharePoint Server Information Disclosure Vulnerability
CVE-2019-0957 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2019-0958 - Microsoft SharePoint Elevation of Privilege Vulnerability
CVE-2019-0961 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0963 - Microsoft Office SharePoint XSS Vulnerability
CVE-2019-0971 - Azure DevOps Server and Team Foundation Server Information Disclosure Vulnerability
CVE-2019-0982 - ASP.NET Core Denial of Service Vulnerability
ADV990001 - Latest Servicing Stack Updates
CVE-2019-0707 - Windows NDIS Elevation of Privilege Vulnerability
CVE-2019-0708 - Remote Desktop ServicesÂ Remote Code Execution Vulnerability
CVE-2019-0725 - Windows DHCP Server Remote Code Execution Vulnerability
CVE-2019-0727 - Diagnostic Hub Standard Collector, Visual Studio Standard Collector Elevation of Privilege Vulnerability
CVE-2019-0733 - Windows Defender Application Control Security Feature Bypass Vulnerability
CVE-2019-0734 - Windows Elevation of Privilege Vulnerability
CVE-2019-0758 - Windows GDI Information Disclosure Vulnerability
CVE-2019-0872 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-0881 - Windows Kernel Elevation of Privilege Vulnerability
CVE-2019-0885 - Windows OLE Remote Code Execution Vulnerability
CVE-2019-0889 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0890 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0891 - Jet Database Engine Remote Code Execution Vulnerability
CVE-2019-0931 - Windows Storage Service Elevation of Privilege Vulnerability
ADV190013 - Microsoft Guidance to mitigate Microarchitectural Data Sampling vulnerabilities
CVE-2019-0936 - Windows Elevation of Privilege Vulnerability
CVE-2019-0949 - Microsoft SharePoint Spoofing Vulnerability
CVE-2019-0950 - Microsoft SharePoint Spoofing Vulnerability
CVE-2019-0951 - Microsoft SharePoint Spoofing Vulnerability
CVE-2019-0952 - Microsoft SharePoint Server Remote Code Execution Vulnerability
CVE-2019-0976 - NuGet Package Manager Tampering Vulnerability
CVE-2019-0979 - Azure DevOps Server and Team Foundation Server Cross-site Scripting Vulnerability
CVE-2019-1000 - Microsoft Azure AD Connect Elevation of Privilege Vulnerability

CVE-2019-1008 - Microsoft Dynamics On-Premise Security Feature Bypass

Affected Products:
ASP.NET Core 2.1
Windows Server 2008 for x64-based Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1607 for 32-bit Systems
Windows 10 for 32-bit Systems
Windows 10 Version 1809 for ARM64-based Systems
Windows Server, version 1903 (Server Core installation)
Microsoft SharePoint Enterprise Server 2016
Windows Server 2008 for 32-bit Systems Service Pack 2
Windows Server 2012 (Server Core installation)
Windows Server 2019
Windows Server 2012
Microsoft Visual Studio 2019 version 16.0
ASP.NET Core 2.2
Windows 7 for x64-based Systems Service Pack 1
Windows 10 Version 1803 for x64-based Systems
Nuget 5.0.2
Windows 10 Version 1703 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1
Windows 10 Version 1709 for x64-based Systems
Windows Server 2012 R2 (Server Core installation)
Microsoft Visual Studio 2017 version 15.9
Windows 8.1 for x64-based systems
Windows Server 2012 R2
Windows 8.1 for 32-bit systems
Microsoft Dynamics CRM 2015 (on-premises) version 7.0
Team Foundation Server 2017 Update 3.1
Windows 10 Version 1903 for 32-bit Systems
Windows Server 2008 R2 for Itanium-Based Systems Service Pack 1
Microsoft Dynamics 365 (on-premises) version 9.0
Team Foundation Server 2018 Update 3.2
Windows 10 Version 1803 for 32-bit Systems
Microsoft Dynamics 365 (on-premises) version 8.2
Azure DevOps Server 2019
Windows 10 Version 1903 for x64-based Systems
Windows 10 Version 1607 for x64-based Systems
Windows Server 2008 for Itanium-Based Systems Service Pack 2
Windows Server 2016 (Server Core installation)
Windows 10 Version 1809 for 32-bit Systems
Windows 10 Version 1709 for 32-bit Systems
Windows Server 2008 for 32-bit Systems Service Pack 2 (Server Core installation)
Windows 10 Version 1709 for ARM64-based Systems
Windows RT 8.1
Windows 7 for 32-bit Systems Service Pack 1
Windows Server, version 1803 (Server Core Installation)
Microsoft SharePoint Foundation 2010 Service Pack 2
Microsoft Visual Studio 2015 Update 3

Windows Server 2008 for x64-based Systems Service Pack 2
Windows 10 Version 1703 for 32-bit Systems
Windows 10 for x64-based Systems
Team Foundation Server 2018 Update 1.2
Microsoft SharePoint Foundation 2013 Service Pack 1
Windows 10 Version 1803 for ARM64-based Systems
Skype 8.35 when installed on Android Devices
Windows 10 Version 1903 for ARM64-based Systems
Windows Server 2019 (Server Core installation)
Team Foundation Server 2015 Update 4.2
Microsoft Visual Studio 2017 version 15.0
Windows Server 2016
Microsoft Azure Active Directory Connect
Windows 10 Version 1809 for x64-based Systems
Windows Server 2008 R2 for x64-based Systems Service Pack 1 (Server Core installation)
Microsoft SharePoint Server 2019
Windows Server, version 1709 (Server Core Installation)

MS19-NOV: Microsoft Internet Explorer Security Update High

Solution Details

Microsoft has released a fix for this flaw in their November 2019 Security Update. Please download and install the patch from the Microsoft Update Catalog or run Windows Update on the affected asset.

False Positive Notes

This item is not likely to be a false positive. Please validate and document remediation efforts through Active View.

Vulnerability Details

Microsoft has released cumulative security updates for Internet Explorer which include fixes for the following vulnerabilities:

CVE-2019-1429 - Scripting Engine Memory Corruption Vulnerability
CVE-2019-1390 - VBScript Remote Code Execution Vulnerability

Affected Products:
Internet Explorer 10 on Windows Server 2012
Internet Explorer 11 on Windows 7 for 32-bit Systems Service Pack 1
Internet Explorer 11 on Windows 10 Version 1809 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1903 for ARM64-based Systems
Internet Explorer 11 on Windows 8.1 for x64-based systems
Internet Explorer 11 on Windows 10 Version 1709 for 32-bit Systems
Internet Explorer 11 on Windows RT 8.1
Internet Explorer 11 on Windows 10 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1607 for 32-bit Systems
Internet Explorer 11 on Windows 10 Version 1903 for x64-based Systems
Internet Explorer 11 on Windows 10 Version 1709 for ARM64-based Systems
Internet Explorer 11 on Windows 10 Version 1803 for ARM64-based Systems
Internet Explorer 11 on Windows 10 for x64-based Systems
Internet Explorer 11 on Windows 8.1 for 32-bit systems
Internet Explorer 11 on Windows Server 2012 R2
Internet Explorer 9 on Windows Server 2008 for 32-bit Systems Service Pack 2
Internet Explorer 11 on Windows 10 Version 1709 for x64-based Systems
Internet Explorer 11 on Windows Server 2019
Internet Explorer 11 on Windows 10 Version 1803 for x64-based Systems
