

DATASHEET (DIGITAL GUARDIAN)

## Digital Guardian Managed Security Program

### The Security Talent Shortage is Here to Stay

As the gap between the global cybersecurity workforce and the need for talent persists, organizations continue to struggle to find qualified security professionals to protect their sensitive data. Even for businesses that may have a mature security team in place, deploying new solutions can often take too long to produce meaningful results.

Digital Guardian's Managed Security Program (MSP) can act as a remote extension of your team and help deliver instant expertise and best practices, all customized to your data protection environment, so you can focus on running your business.

**4 MILLION**

professionals are urgently needed to plug the talent gap in the global cybersecurity industry.\*

### Our Managed Solutions

#### Managed Security Program for Endpoint DLP

Our team takes care of hosting, setup, ongoing monitoring, analyzing, tuning, and maintenance of your endpoint DLP program.

#### Managed Security Program for Detection & Response

Our team of experts use the latest defense strategies and intelligence to hunt, detect, and respond to attacks.

#### DP Select

Leverage our experience creating effective data protection programs for organizations with mission-critical data but limited in-house security expertise.

## What You Get

As part of your MSP subscription, you will get access to a team of experienced Managed Security Administrators and Managed Security Analysts that will work with your team to customize reports, dashboards and workspaces to meet the requirements of various data owners and stakeholders.

### Get DLP that works

Focus on your core business and leave data protection to our security experts.

### Improve your security posture

Our MSP customers repeatedly tell us they were able to improve their security risk posture faster than they could have done by themselves.

### Take advantage of our best practices

Gain the benefit of our insights, experiences, and processes protecting the most critical information of our diverse customer base.

### Instant scalability

On-demand scale handles spikes and provides storage and compute power to drive world-class data protection.

### Fill your security talent gap

Leverage our experience implementing mission-critical data security, incident response, and compliance programs.

### Immediate time to value

No hardware, additional software, or configuration required. Fortra hosts and manages a big data security architecture for you.

### Instant access to experts

Our 24/7 administrators and analysts have 10+ years experience protecting data belonging to Global 2000 companies and government agencies.

### Free up your resources

With our MSP team managing your DLP infrastructure and administration, your team will have more time to focus on governance and proactive compliance and security.
