

The New Age of Report Distribution

PRODUCT SUMMARY

Automate Document Distribution for Your IBM i and Windows Business Systems

Too many businesses are still manually generating, collating, printing, and sending reports and other business documents. If you're one of those companies, then it's time to rethink your current process and strategy.

How DeliverNow Can Help You

Burst and deliver spool files and PC reports across platforms:

- IBM i
- Windows/Linux

Convert reports to popular PC formats:

- Microsoft Excel, Adobe PDF, Microsoft Word, etc.

Automatically deliver documents and reports through:

- Email
- PC/Server Network Directory/Shared Folder
- Output Queue
- FTP/SFTP
- Printer
- Webdocs Secure Archive

With the rise of companies deploying work-from-home policies, we have seen increased interest from customers in the following areas for plugin modules for DeliverNow to help with some of the following:

- Document Creation Process – Invoices, Statements, Graphical Reports, etc.
- The ability for employees to use a self-service portal to gain secure access to reports and other documents.
- Interactive user downloading

KEY BENEFITS

Web browser administration

Service based architecture

PC and IBM i monitors

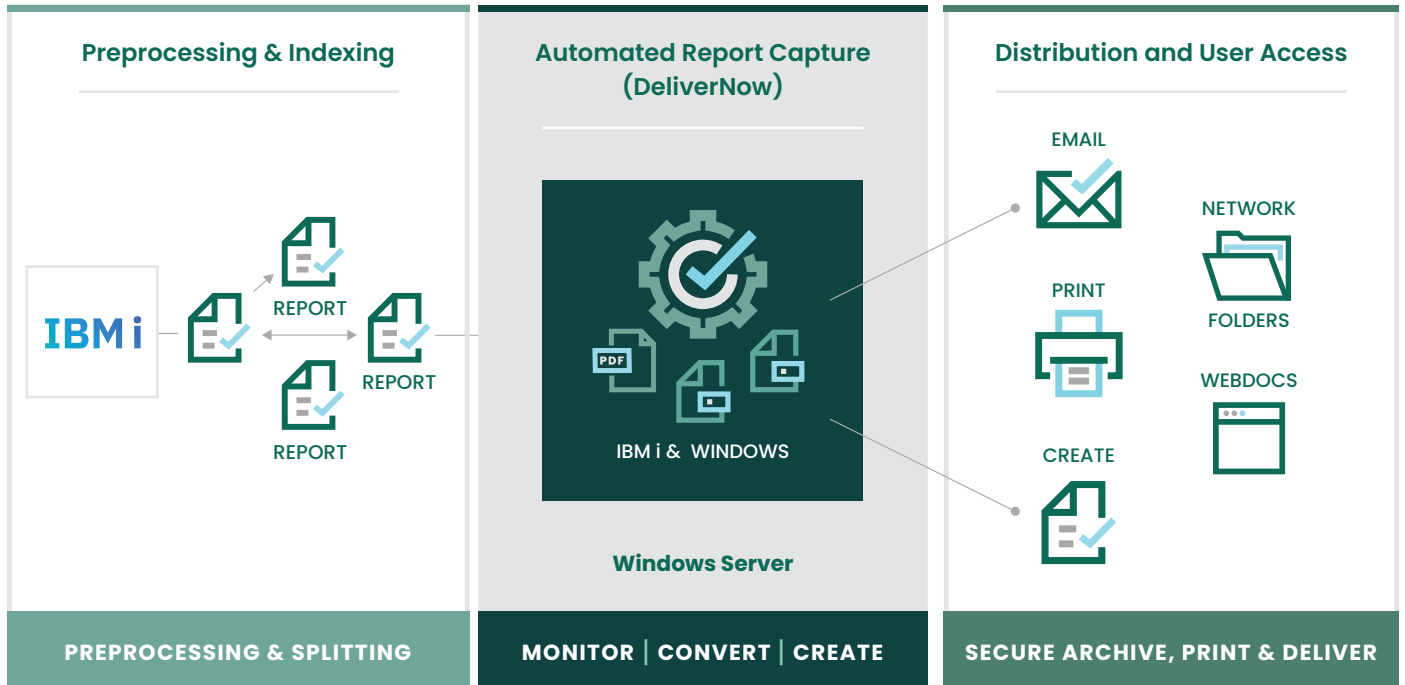

Convert to popular PC formats

- Excel
- PDF
- Text
- HTML
- TIFF
- Word

- Printers
- Webdocs Secure Document Management

Automated Report and Spool File Management Process

Are you a current WinSpool customer? Let us show you the latest in document distribution, including:

Monitoring output queues and directories (batch and email requires separate queues whereas DeliverNow handles this at one pass).

- Distribution to many destinations with one entry
- Better business database – DeliverNow uses SQL Server for easier definition setup, administration, and more flexibility
- Service based architecture
- Proactive error handling and proactive notifications
- Web browser administration interface with secure login
