FORTRA®

Executive Threat Protection

Executives are high-value targets for cyber threat actors due to their public-facing roles, online presence, and influence. Their unique popularity and leadership styles make them increasingly vulnerable to a wide range of attacks, including account takeovers, spear-phishing, impersonation, protests, physical threats, and extortion. As their online profiles grow, so does the probability of compromise.

Comprehensive Threat Monitoring

Security teams must ensure their monitoring systems are capturing critical data from diverse sources to detect and prevent attacks before damage occurs.

Fortra monitors executive threats across a wide array of platforms, including the surface web, deep web, dark web, and social media. This broad coverage identifies a wide-ranging array of attack vectors, including whaling, Business Email Compromise (BEC), social impersonation, and dark web chatter threatening physical harm to executives.

Accurate Threat Detection

Fortra combines AI, machine learning, and expert human analysis to differentiate real threats from the noise. This provides actionable intelligence with high-context analysis to help security teams quickly identify and respond to genuine threats.

Complete Visibility

Organizations have real-time visibility into an executive's digital presence to track and identify threats quickly and effectively. An executive's digital presence can include social media profiles, email, as well as personal identifiable information (PII).

Expert Mitigation Services

To minimize the impact of executive-targeted cyberattacks, Fortra provides rapid and effective threat mitigation. This efficiency is driven by Fortra's years of industry experience and deep expertise in takedown policies, along with its strong network of relationships.

PRODUCT SUMMARY

KEY FEATURES

Fortra provides businesses with a strong ROI with an end-to-end solution that delivers complete visibility, expert curation of data, and industry-proven mitigation to protect executives and their reputations.

Key Features:

Fortra offers comprehensive solutions to monitor, identify, and mitigate threats against executives, ensuring their safety and the protection of corporate reputations. These solutions include:

- Social Media Protection
- Domain Monitoring
- Open Web Monitoring
- Dark Web Monitoring

Benefits

Minimize Exposure
Protect executives from high-risk cyberattacks such as phishing, account takeovers, and extortion.

Expert-Led Threat Mitigation: Ensure that when threats are identified, they are swiftly addressed through expert-led mitigation.

Streamlined Response
Leverage a fast, reliable solution to track, mitigate, and remove malicious content targeting executives.

Enhanced Security Operations
Fortra helps optimize security team's operations and reduces the time spent on analyzing and addressing potential threats.

Peace of Mind
With Fortra, security teams can confidently manage and reduce the risk to executives, helping to protect both personal and organizational reputations.

Use Cases

Executives and VIPs
Protection against phishing, impersonation, and physical harm threats targeting high-profile individuals.

Corporate Security Teams
Comprehensive visibility and proactive defense against a broad range of cyber threats.

Reputation Management
Secure the personal and professional online presence of executives from malicious threats.
