

DATASHEET (TITUS)

Fortra's Titus for CUI

Your Ready-to-Go Solution for NARA CUI Compliance

How does Titus help with CUI?

The Titus software solution was designed to help U.S. Federal agencies comply with the National Archives and Records Administration's (NARA) Controlled Unclassified Information (CUI) program. With Titus, you can ensure emails and documents are properly marked and identified, and sensitive CUI data is protected.

The Titus software is easy to use, with a simple interface that intuitively helps staff properly label and protect sensitive data. The software integrates seamlessly with your existing systems, so you can continue to work with the tools you're already using. Titus provides real-time feedback and alerts, ensuring that sensitive information is properly marked and protected.

How does it work?

Titus helps U.S. federal agencies get started with CUI, evolve, and grow. We can help ensure CUI success through:

- **Compliance**

Titus helps you comply with NARA's requirement for multiple data fields, visual CUI markings, and portion markings.

- **Training**

Titus policies ensure CUI markings are applied consistently. Automated prompts reduce end-user friction, increase accuracy, and reinforce training.

- **Adaption**

Flexible architecture makes it easy to modernize and adapt CUI program changes and agency-specific requirements over time. Titus also supports all existing classification and unclassified marking requirements outside of the CUI scope, as well as support for classified co-mingled environments.

- **Protection**

Titus can prevent unauthorized disclosure of sensitive data in email via secure sharing. DLP/CASB integration offers further support for use cases requiring traditional DLP, ensuring "internal data" does not leave the organization. Downstream reporting and security controls can also be enhanced with CUI markings and metadata.

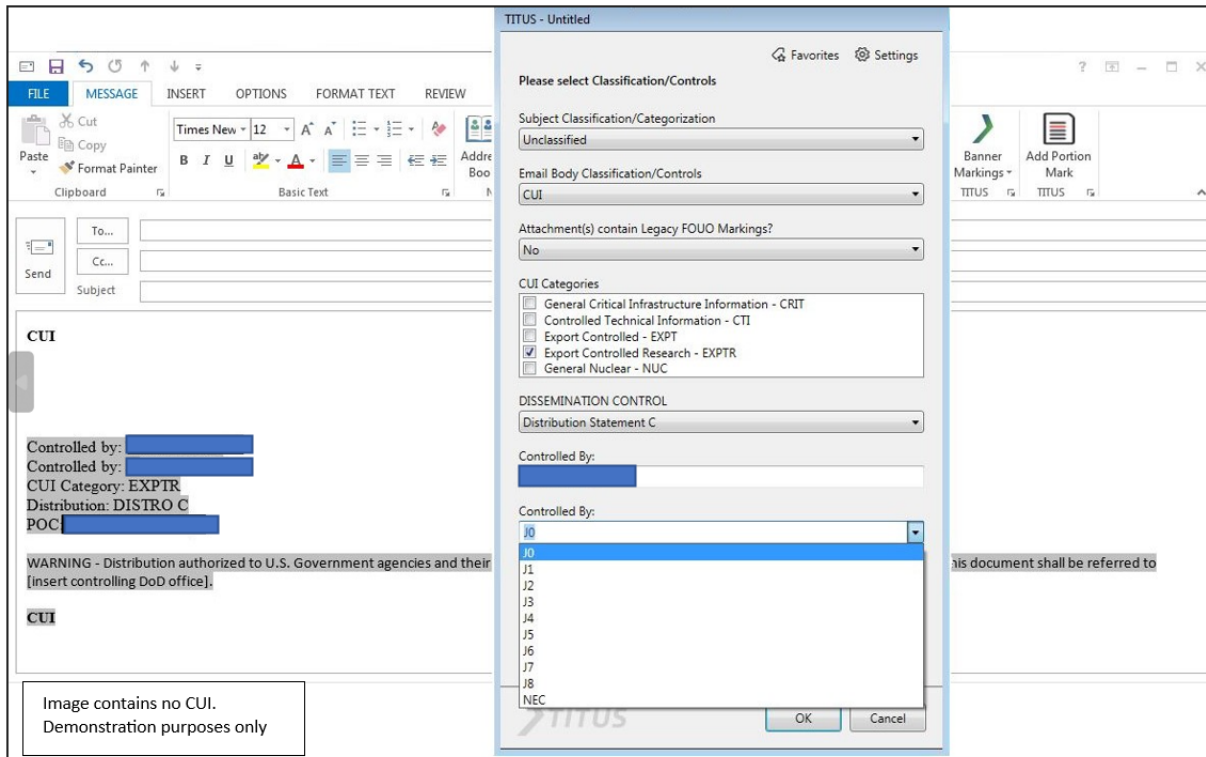

AT-A-GLANCE

Benefits of the Titus CUI Starter Program

- Become CUI-ready
- Use pre-built CUI configurations
- Leverage an experienced CUI deployment team
- Understand key criteria of a successful CUI deployment

What the Titus CUI Pilot Program includes:

- **Titus CUI Software Suite** including a 6-month subscription for 100 users
- **Sample Titus CUI Configuration** for use within Microsoft Outlook and Office
- **Professional Services** to assist with configuration and deployment

How do I get started?

We are currently offering a six-month trial program for a limited time. During this trial, you'll have full access to the Titus software and can see for yourself just how much it can help with NARA CUI compliance. To begin, contact our Titus CUI team at garrett.wiesner@fortra.com or george.hibler@fortra.com.

What will happen next:

1. We'll set up an introductory call to review the program and answer any questions you have.
2. Once you're all set up, we'll schedule a pilot kickoff session and begin the process of installing and configuring your Titus CUI software.
3. We'll have regular pilot checkpoint calls through the duration of the program.
4. At the successful completion of the pilot, we may request your feedback.

There is no obligation to purchase a paid subscription of the Titus software. Should you wish to discuss options to continue with Titus, please speak with your Fortra sales representative.

With Titus, you can be confident that your emails and documents containing sensitive CUI data are properly marked and protected. We look forward to helping you get started.
