FORTRA™

Fortra's Data Classification Suite for CUI
Your Ready-to-Go Solution for NARA CUI Compliance

How does Fortra's Data Classification Suite help with CUI?

The Titus software solution was designed to help U.S. Federal agencies comply with the National Archives and Records Administration's (NARA) Controlled Unclassified Information (CUI) program. With DCS, you can ensure emails and documents are properly marked and identified, and sensitive CUI data is protected.

DCS is easy to use, with a simple interface that intuitively helps staff properly label and protect sensitive data. The software integrates seamlessly with your existing systems, so you can continue to work with the tools you're already using. DCS provides real-time feedback and alerts, ensuring that sensitive information is properly marked and protected.

How does it work?

DCS helps U.S. federal agencies get started with CUI, evolve, and grow. We can help ensure CUI success through:

- **Compliance**
  DCS helps you comply with NARA's requirement for multiple data fields, visual CUI markings, and portion markings.

- **Training**
  DCS policies ensure CUI markings are applied consistently. Automated prompts reduce end-user friction, increase accuracy, and reinforce training.

- **Adaption**
  Flexible architecture makes it easy to modernize and adapt CUI program changes and agency-specific requirements over time. DCS also supports all existing classification and unclassified marking requirements outside of the CUI scope, as well as support for classified co-mingled environments.

- **Protection**
  DCS can prevent unauthorized disclosure of sensitive data in email via secure sharing. DLP/CASB integration offers further support for use cases requiring traditional DLP, ensuring "internal data" does not leave the organization. Downstream reporting and security controls can also be enhanced with CUI markings and metadata.
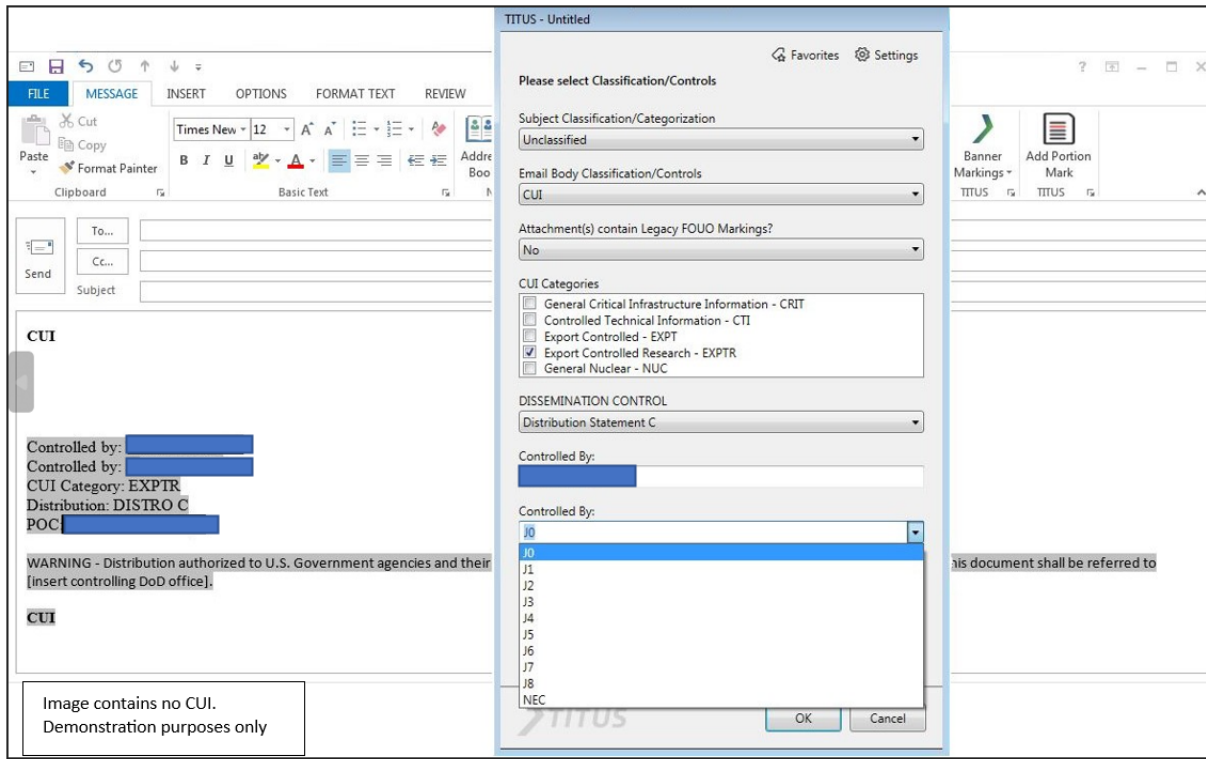

AT-A-GLANCE

Benefits of our DCS for CUI Starter Program
- Become CUI-ready
- Use pre-built CUI configurations
- Leverage an experienced CUI deployment team
- Understand key criteria of a successful CUI deployment

What the DCS for CUI Pilot Program includes:
- **DCS for CUI** including a 6-month subscription for 100 users
- **Sample DCS for CUI Configuration** for use within Microsoft Outlook and Office
- **Professional Services** to assist with configuration and deployment

How do I get started?

We are currently offering a six-month trial program for a limited time. During this trial, you'll have full access to DCS and can see for yourself just how much it can help with NARA CUI compliance. To begin, contact Fortra's CUI team at garrett.wiesner@fortra.com or george.hibler@fortra.com.

What will happen next:

1. We'll set up an introductory call to review the program and answer any questions you have.

2. Once you're all set up, we'll schedule a pilot kickoff session and begin the process of installing and configuring your DCS for CUI software.

3. We'll have regular pilot checkpoint calls through the duration of the program.

4. At the successful completion of the pilot, we may request your feedback.

There is no obligation to purchase a paid subscription of our solution. Should you wish to discuss options to continue with DCS, please speak with your Fortra sales representative.

With DCS, you can be confident that your emails and documents containing sensitive CUI data are properly marked and protected. We look forward to helping you get started.
