

## Fortra's Data Classification Suite (DCS) for UK Government

### Comply with Government Security Classifications Policy

The UK Government Security Classifications (GSC) policy requires that all UK government organisations classify their information assets into one of three types: OFFICIAL, SECRET and TOP SECRET. This simplified classification scheme replaces the previous Government Protective Marking Scheme (GPMS), making it easier for government staff, contractors and service providers to safeguard government information.

DCS helps UK government organisations comply with the new GSC policy by providing users with an easy way to classify their information assets. In as little as one click, users can apply GSC-compliant classifications and protective markings to email and documents to clearly identify information sensitivity.

As a proven solution that has been deployed to more than 40 UK councils and police forces, DCS provides:

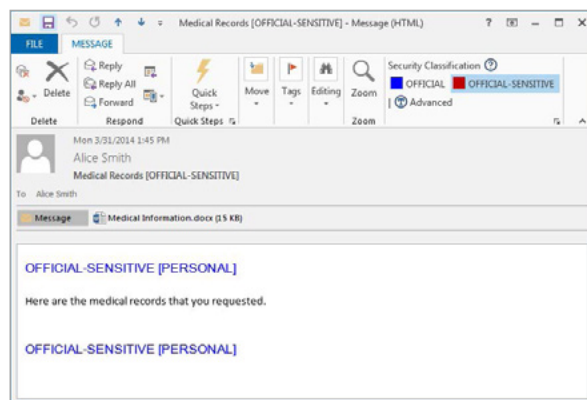

- Full "out-of-the-box" support for the new Government Security Classifications policy
- The ability to customise classifications and markings including special handling instructions
- Recommended product configurations to help ensure legal and regulatory compliance
- Policy enforcement to educate users, reduce the risk of loss, and prevent inappropriate access

### DATA CLASSIFICATION SUITE (DCS)

DCS for Outlook  
DCS for Microsoft Office  
DCS for Desktop  
Fortra's Mail for iOS

*"Our organisation has been using DCS for Outlook and DCS for Microsoft Office for a number of years to help us comply with GPMS requirements. When it came time to shift our classification scheme in order to comply with GSC, DCS helped us to make these changes quickly and seamlessly."*

**Marc Compton,**  
Information Security Officer

Easily apply Government Security Classifications with DCS

**DCS for Outlook**

Classification and policy enforcement for Microsoft Outlook®, Outlook Web App®, Lotus Notes® and mobile devices

**DCS for Desktop**

Classification and policy enforcement for any file type, including CAD, PDF, JPEG, MP3, TXT and any other file in a Microsoft Windows® environment

**DCS for Microsoft Office**

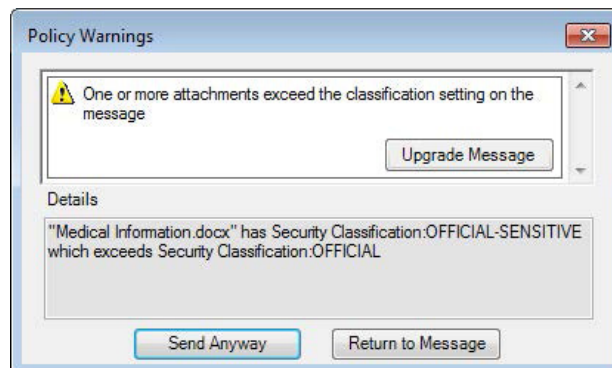

Classification and policy enforcement for Microsoft Office®, including Word®, PowerPoint® and Excel®

**Fortra's Classifier Suite for SharePoint**

Metadata-based data governance and access control solutions for Microsoft SharePoint®

**Fortra's Mail for iOS**

Mobile data security for corporate email, documents and files

Safeguard information and prevent email data breaches with DCS
