Compliance Summary

§1194.21 - Software Applications and Operating Systems	Yes	Partially Supported. See section 1194.21 below.
§1194.22 – Web based Intranet and Internet Information and Systems	Not Applicable	Tripwire Configuration Compliance Manager is not considered a web-based internet information and applications product.
§1194.23 - Telecommunications Products	Not Applicable	Tripwire Configuration Compliance Manager is not considered a telecommunications product.
§1194.24 - Video and Multimedia Products	Not Applicable	Tripwire Configuration Compliance Manager does not use multimedia.
§1194.25 - Self-Contained, Closed Products	Not Applicable	Tripwire Configuration Compliance Manager is not a self-contained product.
§1194.26 - Desktop and Portable Computers	Not Applicable	Tripwire Configuration Compliance Manager is software as defined under section 1194.21.
§1194.31 - Functional Performance Criteria	Yes	Partially Supported. See section 1194.31.
§1194.41 - Information, Documentation, Support	Yes	Supported. See section 1194.41.

Support Levels

Fully Supported	Fully supported throughout the entire program with no exceptions.
Supported	Generally supported throughout the entire program with few exceptions.
Partially Supported	Supported in certain sections of the application.
Not Supported	Not supported in the application.

Compliance Detail

§ Section 1194.21 Software Applications and Operating Systems

Criteria	Level of Support & Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported Keyboard-only navigation is possible throughout the Tripwire Configuration Compliance Manager console. Keyboard shortcuts are defined for all menu items	
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported Tripwire Configuration Compliance Manager does not interfere with accessibility features of other products or the underlying operating system.	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Partially Supported	Input focus is highlighted throughout the Tripwire Configuration Compliance Manager Console, but is not programmatically exposed to Assistive Technology.
(d) Sufficient information about a user interface element including the identity, operation and state of the	Not Supported	Semantic information about user interface objects is

element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.		incomplete.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported Tripwire Configuration Compliance Manager makes use of bitmaps, primarily as icons. Each icon is used for a single purpose and is used consistently throughout the user interface.	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported Tripwire Configuration Compliance Manager uses standard functions to send text to the operating system.	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported with Exceptions Tripwire Configuration Compliance Manager does not override Windows contrast or color selections.	Exception: The Tripwire Configuration Compliance Manager console has limited support for changing the typeface of screen fonts.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not applicable Tripwire Configuration Compliance Manager makes no use of animated presentations.	
(i) Color coding shall not be used as the only means of conveying information, indicating an action,	Supported When colors are used to	

prompting a response, or distinguishing a visual element.	convey information, that information is also conveyed in alternative non-color ways.	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable Tripwire Configuration Compliance Manager does not permit users to adjust color and contrast settings.	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported Tripwire Configuration Compliance Manager does not use flashing or blinking interface elements.	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Supported	Interface elements are not available to assistive technology.

§ Section 1194.31 – Functional Performance Criteria

Criteria	Level of Support and Supporting Features	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Not Supported	All modes of operation and information retrieval require user vision. Interface elements do not support Assistive Technology.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than	Not Supported	The Tripwire Configuration Compliance Manager console has limited support for

20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.		changing the typeface of screen fonts.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	Supported Tripwire Configuration Compliance Manager does not require user hearing for access to any application functionality.	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported Tripwire Configuration Compliance Manager does not require user hearing for access to any application functionality.	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supported Tripwire Configuration Compliance Manager does not require speech recognition.	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength must be provided.	Not Applicable	Addressed by Operating System; See 1194.21 (b)

§ Section 1194.41 – Information, Documentation, Support

Criteria	Level of Support and Supporting Features	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supported Documentation is available in multiple electronic formats including Windows Help and PDF.	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported A description of accessibility and compatibility features is available upon request.	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported Support services are available by both telephone and e-mail.
