

# **Fortra's Tripwire License Restrictions and Limitations**

## **OEM Products:**

OEM Products are provided pursuant to underlying agreements with our partners. Due to the nature of such relationships, Tripwire may need to, and reserves the right to, substitute a quoted product with a SKU that delivers the same functionality and quality, but with different branding.

## **For Tripwire State Analyzer and all Tripwire Apps:**

For Tripwire State Analyzer and all Tripwire Apps, a license includes use on up to two licensed non-production consoles for the purpose of test and disaster recovery.

## **Asset Discovery Products:**

Tripwire Asset Discovery Products are for use for port scanning (full or partial port ranges) for the limited purpose of asset discovery, including the use of Tripwire State Analyzer for reporting on listening ports.

## **Non-Production License Restrictions:**

Software licenses identified as "Non-Production" on an order are designated as available for use in a non-production environment only ("Non-Production Licenses"), and any pricing included on the applicable order reflects this license restriction. Use of these Non-Production Licenses in a capacity other than in the customer's development, test or staging environments is prohibited. Non-Production Licenses can only be run on a Tripwire Enterprise Console that is also licensed under Non-Production License.

## **Disaster Recovery License Restrictions:**

Software licenses identified as "Disaster Recovery" on an order are designated as available for use in test and disaster recovery environments only, and the pricing included on the applicable order reflects this license restriction.

## **Stores License Restrictions:**

All Tripwire Stores licenses are licensed for use per physical retail store location up to the quantity per node type based on the size identified on the order. Any pricing included on the applicable order reflects this license restriction. Use of these licenses in a capacity other than in a single physical retail store location is prohibited.

## **Academic Institution License Restrictions:**

All Tripwire Academic Institution Licenses are licensed for use per accredited academic institution based the enrollment tier for the number of total enrolled students at the academic institution at the time of purchase. Any pricing included on the applicable order reflects this license restriction. If student enrollment increases beyond the enrollment tier for the license purchased, the license must be upgraded to the applicable enrollment tier.

## **Dynamic Software Reconciliation Express:**

Use of the Dynamic Software Reconciliation Express license is limited to Tripwire Enterprise instances of up to 100 file system nodes.

## **Tripwire Enterprise Express Console:**

Use of the Tripwire Enterprise Express Console is limited to up to 40 file system nodes (File Systems, Desktops, VMware ESX, POS Servers and POS End Point Systems).

## **CCM Limited Management Server:**

Use of the CCM Limited Management Server license is limited to up to 1,000 devices.
