

Tripwire Accessibility Conformance Report

Revised Section 508 Edition

(Based on VPAT® Version 2.4)

Name of Product/Version: Tripwire Enterprise 9.1

Report Date: 10-31-2023

Product Description: Tripwire Enterprise Console

Contact Information: David Whitlock (david.whitlock@fortra.com)

Evaluation Methods Used: Tripwire Enterprise web-based software was tested for routine user workflows covered by the product's User Guide with all the supported web browsers in a Microsoft Windows environment.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standards/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (Yes)
Revised Section 508 standards published January 18, 2017, and corrected January 22, 2018	(Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The product's functionality has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

WCAG 2.0 Report

Tables 1 and 2 also document conformance with Revised Section 508:

- Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing
- Chapter 6 – 602.3 Electronic Support Documentation

Note: When reporting on conformance with the WCAG 2.0 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported technology use as documented in the [WCAG 2.0 Conformance Requirements](#).

However, some browser/settings combinations do not offer contextual highlighting of UI elements, and some screens do not allow simple switching between context panes making keyboard-only navigation impractical. The supported Operating Systems that installation is supported on do, however, have built-in accessibility controls for keyboard-based mouse emulation. This allows full access to the entire UI without using a mouse.

Criteria	Conformance Level	Remarks and Explanations
1.2.6 Sign Language (Prerecorded) (Level AAA) Revised Section 508 – Does not apply	Web: Not Applicable	
1.2.7 Extended Audio Description (Prerecorded) (Level AAA) Revised Section 508 – Does not apply	Web: Not Applicable	
1.2.8 Media Alternative (Prerecorded) (Level AAA) Revised Section 508 – Does not apply	Web: Not Applicable	
1.2.9 Audio-only (Live) (Level AAA) Revised Section 508 – Does not apply	Web: Not Applicable	
1.4.6 Contrast (Enhanced) (Level AAA) Revised Section 508 – Does not apply	Web: Partially Supports	The vast majority of the UI components have a contrast ratio exceeding this threshold. As stated in Table 1.4.3, there are a limited number of UI components with a lower ratio. Still, these are limited in number and almost exclusively contained within the Asset View screens.
1.4.7 Low or No Background Audio (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
1.4.8 Visual Presentation (Level AAA)	Web: Does Not Support	

Criteria	Conformance Level	Remarks and Explanations
Revised Section 508 – Does not apply		
1.4.9 Images of Text (No Exception) (Level AAA) Revised Section 508 – Does not apply	Web: Supports	Some report visualizations contain text legends for the information displayed in the visualization. These visualizations are optional, as the report contains the same information in the body, and the text legend is necessary to understand the context of the visualization.
2.1.3 Keyboard (No Exception) (Level AAA) Revised Section 508 – Does not apply	Web: Does Not Support	No specific timing is required, and most UI navigation within a context pane can be accomplished using a keyboard or OS keyboard-based mouse emulation. It isn't easy to use only a keyboard and switch between the UI's left/right/top panes without other assistive technologies or the OS keyboard-based mouse emulation. This keyboard-mouse emulation is available on all supported OSes.
2.2.3 No Timing (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
2.2.4 Interruptions (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
2.2.5 Re-authenticating (Level AAA) Revised Section 508 – Does not apply	Web: Partially Supports	<p>If a user were typing text into an input field when the user session expired, this information would be lost. The specific screen and workflow the user was engaged in would be saved, and no other information would be lost. Most workflows in the UI do not require text input, so this is a low-risk issue that can be mitigated by the user settings for web session timeout—a user-configurable setting.</p> <p>Considering the user-configurable timeout settings and the small number and infrequent nature of required user inputs, most organizations would likely interpret this as "Supports." We are listing "Partially Supports" to be transparent about the exact definition of this criteria, though, for security reasons, non-saved user inputs are not persisted between sessions.</p>

Criteria	Conformance Level	Remarks and Explanations
2.3.2 Three Flashes (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
2.4.8 Location (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
2.4.9 Link Purpose (Link Only) (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
2.4.10 Section Headings (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
3.1.3 Unusual Words (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
3.1.4 Abbreviations (Level AAA) Revised Section 508 – Does not apply	Web: Supports	Aside from well-established industry-specific terminology, the web UI does not employ abbreviations or acronyms by default. The user can input their own abbreviated terms into input fields which may later be displayed in other UI components without the ability to expand. Still, this limited scenario can be prevented by users inputting full words only when input fields are presented.
3.1.5 Reading Level (Level AAA) Revised Section 508 – Does not apply	Web: Supports	This web-based software is designed for usage in IT Security environments by users who have commonly completed post-secondary education programs. These environments routinely involve technical language and jargon that exceeds this requirement, and by extension, so does this product version. The UI meets this standard except for these common industry terms that any user would be familiar with.
3.1.6 Pronunciation (Level AAA) Revised Section 508 – Does not apply	Web: Does Not Support	Excluding the IT Security industry-specific terminology and jargon, there are no identifiable instances where context-based pronunciation is required to aid in understanding. Regardless, the product offers no pronunciation capabilities, so this is being marked as “Does Not Support” to remain transparent.
3.2.5 Change on Request (Level AAA) Revised Section 508 – Does not apply	Web: Supports	
3.3.5 Help (Level AAA)	Web: Supports	

Criteria	Conformance Level	Remarks and Explanations
Revised Section 508 – Does not apply		
3.3.6 Error Prevention (All) (Level AAA)	Web: Supports
