

DATASHEET (Infrastructure Protection)

Fortra Vulnerability Management SaaS

Scalable, Risk-based Vulnerability Management

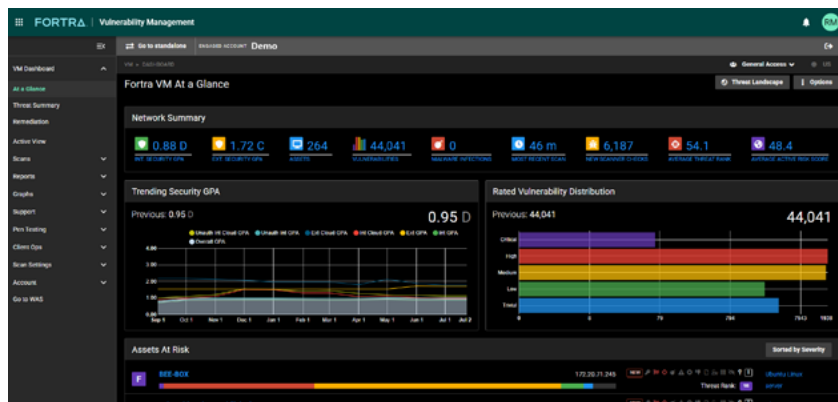

With cyber attacks on the rise and a shrinking cyber security talent pool, IT teams are being asked to do more with less.

Fortunately, [Fortra Vulnerability Management \(Fortra VM\)](#) is designed to streamline the identification and prioritization of system weaknesses, so you can maximize existing IT resources and mitigate risks swiftly and effectively.

Provided via our SaaS platform, Fortra VM is lightweight yet powerful and capable of scaling up or down to meet your changing business needs.

Fortra VM combines patented scanning technology with an easy-to-use GUI and asset correlation to produce fast, accurate results (less than 1% false positives). The robust feature set of Fortra VM includes:

- [Security GPA® security posture rating](#)
- [Insight peer comparison](#)
- [Network Map asset visualization](#)
- [Threat Rank exploitability context](#)
- [Connect API](#)

Some of Our Customers' Favorite Features

Security GPA®

Security GPA is an easily understood metric that facilitates simpler security conversations. It is based on an algorithm that takes into account both the network security posture rating and the business risk associated with discovered vulnerabilities.

Client-defined Risk Ratings

Set the business risk level of your IP devices to a level based on the device's criticality to the organization. Easily pinpoint areas of high risk and focus efforts on defending your enterprise.

Superior Customer Support

Our loyal and happy user base consistently gives us 90+ customer satisfaction scores and Net Promoter Scores (NPS) of 75 or better.

Experience a powerful, user-friendly solution backed by top-shelf expert support

Prioritize Security Threats for Faster Remediation

When vulnerabilities are detected, Fortra VM quickly provides prioritization and remediation information so immediate action can be taken.

Fortra's VM allows security teams to:

- Leverage Fortra's technical expertise and world-class customer support.
- Focus on core business functions to save time, money, and effort by reducing the administrative burden and tedium of performing vulnerability scans with complicated tools or unmanaged open source solutions.
- Demonstrate your commitment to information security with comprehensive reporting on the security posture of your network.
- Detect possible security vulnerabilities and respond quickly with actions based on your pre-defined security policies.

- Quarterly/monthly/unlimited scan frequency
- 24/7 support
- Access to Active View Dashboard
- User-friendly, aggregated scan results
- Robust filtering and labeling capabilities
- Patented host correlation

Vulnerability Management Pro

Vulnerability Management Pro provides the same industry leading solution subscription as VM Advanced, but adds a Personal Security Analyst (PSA).

PSAs perform the work of running your scans, analyzing the results, generating reports, and providing direct remediation planning guidance for you, as opposed to your security team doing that themselves. It's the ultimate outsource for all size organizations and is especially helpful for organizations that have limited security management time or expertise.

Vulnerability Management Advanced

Vulnerability Management Advanced is our [flagship vulnerability management](#) subscription offering. Powerful and effective, VM Advanced is conveniently bundled into a rich, affordable, and easy to consume annual subscription that includes:

- VM scanning and features
- Unlimited users

Join the thousands of customers who trust Fortra VM to protect their business critical assets.
